PUBLIC DEPARTMENT.

NOTIFICATION.

Ootacamund, May 18, 1929.

No. 173.—His Excellency the Governor in Council and the Ministers have received with deep regret intelligence of the death at sea on the 12th May 1929 of the Hon'ble Sir Victor Murray Coutts Trotter, Barrister-at-Law, Chief Justice of the High Court of Judicature at Madras, and they desire to place on record their high appreciation of his valuable services to this Presidency.

2. The Hon'ble Sir Victor Murray Coutts Trotter was a Judge of the High Court for over fifteen years, for the last five years of which he was Chief Justice. His wide experience of judicial procedure and legal practice in England were of great value to the court; in his conduct of cases and in his judgments he invariably displayed an admirable lucidity and wide learning; as Chief Justice it was especially his constant endeavour, while maintaining high standards in the administration of justice throughout the Presidency, to diminish the delays in obtaining judicial decisions. By his death the High Court has lost an able administrator as well as a Judge of outstanding ability.

3. As a mark of respect to his memory, the Government direct that the Secretariats at Madras and Stonehouse Hill and all courts (civil and criminal) be closed for the day on which the information is received by them and that their flags be hoisted half mast high until sunset.

APPOINTMENT.

No. 174.—Whereas intimation has been received of the death on the 12th May 1929 of the Hon'ble Sir Victor Murray Coutts Trotter, Chief Justice of the High Court of Judicature at Madras, the Governor in Council is pleased, in pursuance of sub section (1) of section 105 of the Government of India Act, to appoint the Hon'ble Justice Sir Calamur Viravelu Kumaraswami Sastriar, B.A., B.L., to perform the duties of Chief Justice of the High Court until some person has been appointed by His Majesty to the office of Chief Justice of the High Court and has entered on the discharge of the duties of that office.

A. Y. G. CAMPBELL,
Chief Secretary.

POLITICAL DEPARTMENT

NOTIFICATION.

Fort St. George, May 21, 1929.

No. 21.—The following notification of the Government of India is republished :—

FOREIGN AND POLITICAL DEPARTMENT.

Simla, the 7th May 1929.

No. 306-G.—The Governor-General in Council is pleased to recognize the appointment of Mr. G. Braunschweiler as Acting Honorary Consul for Switzerland at Madras, during the absence of Mr. J. H. G. Heer.

A. Y. G. CAMPBELL,
Chief Secretary.

JUDICIAL DEPARTMENT.

APPOINTMENT.

Fort St. George, May 24, 1929.

No. 137.—Captain T. V. Rajaratnam Pillai, M.C. & CM., Senior Assistant to the Principal and Assistant Professor of Medical Jurisprudence, Medical College, Madras, to be Police Surgeon, Madras, for three years or till further orders.

NOTIFICATION.

Fort St. George, May 20, 1929
(G.O. Mis. No. 207, Judicial).

No 138.—Applications are invited from **Muhammedans, Non Brahman Hindus and Anglo-Indians** (and dates only to fill two vacancies in the Indian Police Service of this Presidency by direct recruitment

2. A candidate must be a male and either (*i*) a British subject of Indian domicile who was and whose father and mother were born within His Majesty's Dominions and allegiance; or (*ii*) a British subject of Indian domicile whose father was at the time of the candidate's birth and still is (or if dead, continued until his death to be) a British subject or a subject of a State in India; or (*iii*) a ruler or a subject of a State in India in respect of whom the Governor-General in Council has made a declaration under section 96-A of the Government of India Act.

3. A candidate's parents must reside in the Madras Presidency or in Coorg at the time of his application or either he (otherwise than as a student of a University only) or his parents must have so resided for a period of not less than three years:

Provided that a person resident in a State in India who in otherwise qualified may become a candidate for the vacancy.

(Ordinarily a candidate from a State in India will not be selected as a rule unless the State is in the neighbourhood of the Madras Presidency.)

4. A candidate must be in good mental and bodily health and free from any physical defect likely to interfere with the efficient performance of the duties of a member of the Indian Police.

5. A candidate must satisfy the Public Service Commission that his character is such as to qualify him for employment in the Indian Police Service.

6. A candidate must be under 25 years of age on the 1st of January 1930.

7. A candidate must hold a Degree of a University approved by the Governor General in Council, or have passed the diploma examination to the 1st or 2nd division from the Aitchison College, Lahore; Mayo College, Ajmere; Daly College, Indore; Rajkumar College, Rajkot; or the Rajkumar College, Raipur; or have passed the Cambridge School Certificate Examination.

NOTE.—Applications for admission to the coming examination for the Indian Police Service submitted by candidates who have appeared for the degree examination but whose degree results may not be announced by the last date fixed for the receipt of applications will be accepted provisionally pending the declaration of the results provided that such candidate furnishes proof as soon as possible thereafter that he has passed the examination.

8. Candidates eligible under the foregoing paragraphs will be required to appear before a Selection Committee for interview and no candidate will be selected who does not satisfy the Selection Committee that he is suitable in all respects for the Indian Police Service in the province for which he is a candidate. The time and place of the interview will be communicated later.

9. Candidates selected by the Selection Committee will be required to appear for the competitive examination to be held at Madras, beginning on Monday, the 9th September 1929, the object of the examination, in their case, being merely to test their ability to attain a qualifying standard.

10. Candidates selected by the Selection Committee will be required to appear before a Medical Board and no candidate who is found after examination by the Medical Board not to satisfy the requirements of paragraph 4 will be admitted to the examination.

11. No candidate shall be admitted to the examination who has not received a certificate of admission from the Public Service Commission.

12. Candidates must pay the following fees :—

(i) Five Rupees with the Application Form,

(ii) Sixteen Rupees before examination by a Medical Board, and

(iii) If selected for admission to the examination, Fifty Rupees within three weeks after the notification of selection.

No claim for a refund of these fees will be entertained.

13. The written examination will include the following subjects, each of which will carry 200 marks.

Section A.—To be taken by all candidates :—

(1) English,
(2) Geography,
(3) Indian History,
(4) Elementary Mathematics,
(5) General Knowledge,

Section B.—Candidates are allowed to take up not more than two of the following :—

(6) Sanskrit,
(7) Arabic,
(8) Persian,
(9) Latin,
(10) French,
(11) Physics,
(12) Chemistry,
(13) Botany and Zoology,
(14) Higher Mathematics,
(15) Political Economy,
(16) English Language and Literature,
(17) Computational Law,
(18) Criminal Law and Procedure,
(19) British History.

NOTE 1.—The standard in subjects in Section A (except Mathematics) will be that of the Intermediate examination of an Indian University. The standard in Mathematics will be as shown in the Annexure. The standard in subjects in Section B will be that of the B.A. (Pass) examination of an Indian University.

NOTE 2.—Papers set for the Indian (Imperial) Police Service Examination in India in previous years are obtainable on payment from the Manager, Government of India Central Publication Branch, Calcutta.

14. The Public Service Commission will, if they think it desirable, determine what shall be the qualifying marks in all or any of the subjects of examination.

15. From the marks assigned to candidates in each subject, such deduction will be made as the Public Service Commission may consider necessary in order to secure that no credit is allowed for merely superficial knowledge.

16. If a candidate's handwriting is not easily legible a deduction will be made on this account from the total marks otherwise accruing to him.

17. Credit will be given for good English including orderly, effective and exact expression combined with due economy of words in all the subjects of the examination, and not only in the subjects which are specially devoted to English.

18. Candidates must apply before the 20th June 1929, through the Collector of the district in which they reside to the Chief Secretary to the Government of Madras. A candidate from Coorg must apply through the Chief Commissioner of Coorg. A candidate from a State in India must apply through his Political Officer or Agent. Collectors or the Chief Commissioner of Coorg or the Political Officer or Agent should forward to the Chief Secretary to Government the applications with the certificate in the form attached to the application so as to reach him not later than the 1st July 1929. If in any case it is impossible to complete the inquiries by the date, the Collector or the Chief Commissioner of Coorg or the Political Officer or Agent should send the certificate subject to any necessary reservation and should furnish the result of his enquiries as soon as possible. Copies of the application form may be obtained from the Chief Secretary to Government.

19. No allegation that an Application Form or letter requesting such form has been lost or delayed in the post will be considered unless the person making such allegation produces a Post Office certificate for posting. Candidates who delay their applications till a late date do so at their own risk.

20. No recommendations except those invited in the form of application will be taken into consideration. Any attempt on the part of a candidate to obtain support for his application by other means may disqualify him for selection.

ANNEXURE.

SYLLABUS IN ELEMENTARY MATHEMATICS.

The course is as follows :—

(1) *Arithmetic*.—The whole of arithmetic. (the use of algebraical symbols and processes will be permitted.)

(2) *Algebra*.—The four simple rules; Fractions; Greatest Common Measure, Least Common Multiple; Factors; Remainder Theorem; Proportion; Simple Equation of one or more unknown quantities with easy problems; Quadratic Equations, with easy problems and theory of Quadratic Equations, Graphs and their applications. (Candidates should be provided with squared paper.)

(3) *Geometry*.—Practical and Theoretical Geometry.

The questions on Practical Geometry will be set on the constructions contained in the annexed Schedule A, together with easy extensions of them. All figures should be drawn accurately, for which purpose every candidate should provide himself with a graduated scale, a pair of set squares, a protractor, a pair of compasses and a hard pencil.

The questions on Theoretical Geometry will deal with the subjects enumerated in Schedule B (and may include easy riders and numerical illustrations). Any proof of a proposition will be accepted which appears to the examiners to form part of a systematic treatment of the subjects. In the proof of the theorems hypothetical constructions will be permitted.

SCHEDULE A.

(Candidates will be provided with squared paper.)

Bisections of angles and of straight lines.
Construction of perpendiculars to straight lines
Construction of an angle equal to a given angle.
Construction of parallels to a given straight line.
Simple cases of the construction from sufficient data of triangles and quadrilaterals.
Division of straight lines into a given number of equal parts or into parts in any given proportions.
Construction of a triangle equal in area to a given polygon.
Constraction of tangents to a circle and of common tangents to two circles.
Simple cases of the construction of circle from sufficient data.
Construction of a fourth proportional to three given straight lines and a mean proportional to two given straight lines
Construction of regular figures of 3, 4, 5 or 6 sides in or about a given circle.
Construction of a square equal in area to a given polygon.

SCHEDULE B.

Angles at a point.
Parallel straight lines.
Triangles and rectilineal figures.
Triangular and quadrilateral areas.
Simple loci.
The circle
Properties; similar triangles.

ACQUISITION OF LAND.

Fort St. George, May 21, 1929.

Under section 6 of the Land Acquisition Act, the Governor in Council hereby declares that the land specified below and measuring 0·22 acre, be the same a little more or less, is needed for a public purpose, to wit, for constructing an approach road to the sports ground of the Malabar Special Police; and, under sections 3 and 7 of the same Act, the Revenue Divisional Officer, Malappuram, is appointed to perform the functions of a Collector under the Act, and directed to take order for the acquisition of the said land. A plan of the land is kept in the office of the Revenue Divisional Officer, Ma'appuram, and may be inspected at any time during office hours.

No. D./2757-R. II.—Mr. G. Sakhuram Rao has been appointed a probationer in the Indian Audit and Accounts Service, with effect from the 12th April 1929, and has been posted to the office of the Accountant-General, Madras, for training.

Simla, the 9th May 1929.

No. D./3112-R. II.—Mr. G. Narainswami Iyer, a Senior Accountant in the office of the Deputy Accountant-General, Posts and Telegraphs, Madras, has been appointed to officiate as an Assistant Accounts Officer in that office with effect from the 15th April 1929.

Simla, the 8th May 1929.

No. F./33-R I./29.—The following resolution passed by the Secretary of State in Council is published for general information :—

In exercise of the powers conferred by subsection (2) of section 96-B of the Government of India Act, the Secretary of State with the concurrence of the majority of votes at a meeting of the Council of India held this 16th day of April 1929, hereby makes the following amendment to the Fundamental Rules, namely :—

AMENDMENT.

In Rule 109 of the said Rules after the words "military leave rules" the following shall be inserted, namely :—

"(other than military officers serving with such Frontier Irregular Corps as may be specified on this behalf by the Governor-General in Council),"

And the said Rule shall have effect and be deemed always to have had effect as though it had been made as so amended.

No. 49.—The following resolution of the Government of India is republished :—

FINANCE DEPARTMENT.

Simla, the 9th May 1929.

No. F. 7-V-Ex. I/29.—His Majesty's Secretary of State for India in Council has been pleased to cancel clause (a) of rule 1 (9) of the rules appended to the Government of India, Finance Department, Resolution No 1449 E. A, dated the 29th September 1922, as subsequently amended.

H. A. WATSON,
Secretary to Government.

No. 50.—The following notifications of the Government of India are republished :—

FINANCE DEPARTMENT (CENTRAL REVENUES).

CUSTOMS ESTABLISHMENTS.

Simla, the 20th April 1929.

No. 30.—Mr. C. G. Taylor, Head Appraiser, Madras Custom House, has been appointed to act as an Assistant Collector in the Imperial Customs Service at Madras, with effect from the 15th April 1929, during the absence on leave of Mr. P. N. Chandevarkar.

CUSTOMS.

Simla, the 12th May 1929.

No. 24.—In exercise of the powers conferred by section 23 of the Sea Customs Act, 1878 (VIII of 1878), and in supersession of the notification of the Government of India in the Finance Department (Central Revenues) No. 89 Customs, dated the 10th September 1927, the Governor-General in Council is pleased to exempt—

(*a*) scientific instruments and apparatus belonging to *bona fide* educational or research institutions, and

(*b*) surgical instruments and X-ray apparatus belonging to hospitals or dispensaries where patients are regularly treated free of charge,

which are re-imported into British India for the use of such institutions, hospitals or dispensaries after having been exported for repairs, from so much of the import duty leviable thereon under the Indian Tariff Act, 1894 (VIII of 1894), as is in excess of the duty which would be leviable if the value of the instruments or apparatus were equal only to the cost of such repairs; provided that the Collector of Customs is satisfied—

(1) of the identity of the instruments or apparatus;

(2) that no drawback of duty was paid on the occasion of their export;

(3) that there has been no change in the ownership of the instruments or apparatus between the time of export and re-import; and

(4) that not more than one year has passed since the instruments or apparatus were exported.

CENTRAL BOARD OF REVENUE.

CUSTOMS ESTABLISHMENTS.

Simla, the 20th April 1929.

No. 31.—Consequent on his return from leave on the forenoon of the 15th April 1929 and his appointment to act as Assistant Collector in the Imperial Customs Service from the same date, the unexpired

portion of the leave granted to Mr. C. G. Taylor, Head Appraiser, Madras Custom House, in the Board's Notification No. 18-Customs Establishments, dated the 2nd March 1929, viz., from the 16th April to the 17th April 1929, is hereby cancelled.

Mr. E. E. Greene, Officiating Head Appraiser, Madras Custom House, continues to act as such until Mr. Taylor reverts to his substantive appointment.

CUSTOMS.

Simla, the 4th May 1929.

No. 22.—In exercise of the powers conferred by section 12 of the Sea Customs Act, 1878 (VIII of 1878), the Central Board of Revenue directs that the following amendment shall be made, with effect from the 15th June 1929, in the notification of the Board of Revenue (Separate Revenue), Madras, dated the 12th June 1913, published on page 969, Part II, *Fort St. George Gazette*, dated the 18th June 1913, namely :—

For the word 'Kilakarai', occurring in the fourth line, the word 'Tuticorin' shall be substituted.

Fort St. George, May 21, 1929.

In the declaration under section 6 (1) of the Land Acquisition Act I of 1894, published at pages 202-203 of Part I of the *Fort St. George Gazette*, dated 29th January 1929, in respect of the lands required for the South Indian Railway Company for the realignment of the main line and the construction of a new bridge near the Thoothe bridge at mile B 373/12-28 in Kuriyanur village, Ponnani taluk, Malabar district—

'Page 203, item 9, *for* '0·04 acre' *read* '9·19 acre.'

NOTIFICATIONS.

Fort St. George, May 21, 1929
(G.O. Mis. No. 1015, *Revenue).*

No. 177.—The following amendments are ordered in Schedules A and B appended to the rules framed under section 1 A of the Madras Irrigation Cess Act of 1865, as amended by Madras Act V of 1900 and Madras Act II of 1913 and published with Revenue Department Notification No. 208, dated 22nd April 1914, on pages 621 to 647 of the *Fort St. George Gazette*, Part I, dated 29th April 1914:—

Delete the following item in Schedule A.—

'Kistna district, Bhimavaram taluk, Kontivada zamin.'

Insert the following in Schedule B:—

'West Godavari district, Bhimavaram taluk, Kontivada zamin.'

Fort St. George, May 21, 1929
(G.O. Mis. No. 1004, *Revenue).*

No. 178.—Under section 4 (*b*) of the Madras Abkari Act, 1886, the Government (Ministry of Public Health) hereby appoint the officer named below to perform the acts and duties of an Abkari Inspector mentioned in sections 40-53 inclusive of the said Act:—

Name of the officer.	Designation.
Shaik Abdul Razzook Sahib.	Assistant Inspector of Excise, Third grade.

Fort St. George, May 17, 1929.

No. 179.—The Governor in Council hereby declares under the provisions of section 24 of the Madras Forest Act V of 1882 that the area, the boundaries of which are set forth in the schedule below which was declared to be reserved forest under section 16 of the Act in Notification No. 11, dated 13th December 1892, published at pages 17 and 18 of Part I of the *Fort St. George Gazette*, dated 10th January 1893, shall cease to be reserved with effect from 1st June 1929.—

SCHEDULE.

South Arcot District, Tirukoyilur taluk,
Sangiyam village.

[Athipakkam Reserved Forest portion, 0·95 acres, R.S. No. 99/1-B.]

BOUNDARIES.

Starting from a point 300 links from the south in the field boundary line between R.S. No. 105/13-B of Ja. Sithamur village and R.S. No. 99 of Sangiyam village and then running towards the east in a distance of 2,310 links through the forest and meeting the western boundary of R.S. No. 93-1 of Sangiyam village which connects cairn Nos. 76 and 77 in the west of the forest at a distance of 630 links from cairn No. 77 and then running along the said boundary line towards the south to a distance of 300 links towards cairn No. 75 and then turning towards the west and running parallel to the Tirukkoilur-Manalurpet road in the south to a distance of 2·25 links and meeting cairn No. 76 which lies in the south-eastern corner of R.S. No. 105-13-B of Ja. Sithamur village, then running to a distance of 300 links towards the north along the said field boundary and meeting the starting point.

BRIEF DESCRIPTION AND REASON FOR DISCONTINUATION.—The area contains shrubs and Cherry growth and that too not close but scattered. It is proposed to assign the land to Adi-Dravidar for house building after disreservation. Its suitability for dwelling purposes has been certified to by the District Health Officer.

Fort St. George, May 21, 1929
(G.O. Mis. No. 1005, *Revenue).*

No. 180.—The Governor in Council hereby declares under the provisions of section 24 of the Madras Forest Act (V of 1882) that the areas described below which were declared to be a reserved forest under section 16 of the Act in Notification No. 825, dated 1st August 1885 published on page 943 of Part I of the *Fort St. George Gazette*, dated 14th August 1885, shall cease to be reserved forest with effect from 1st June 1929—

SCHEDULE.

Anantapur District, Hindupur taluk,
Gummanayanpalli village.

[Name of the reserved forest, portions of which are disreserved—Somasamudram.]

Block No. I, area 42·12 acres.

BOUNDARIES.

East.—Starting from the north-west corner marked circuit stone of S. No. 347 southward along the west and south sides of that field to the north-west corner of S. No. 344, thence along the west and south sides of that field to its south-east corner, thence a straight line to the north east corner of S. No. 340, thence the north and west sides of the latter field to its south-west corner.

South.—Thence along the north sides of S. Nos. 339 and 333 to the second survey stone from its northeast corner of the latter field.

West.—Thence a straight line with a bearing of 346-10 for a distance of 744 links, thence a straight line with a bearing of 309-37 for a distance of 484 links, thence a straight line with a bearing of 319-06 for a distance of 537 links, thence a straight line with a bearing of 317-21 for a distance of 298 links, thence a straight line with a bearing of 346-10 for a distance of 291 links, thence a straight line with a bearing of 260-15 for a distance of 381 links, thence a straight line with a bearing of 344-42 for a distance of 583 links, thence a straight line with a bearing of 47-25 for a distance of 832 links, thence a straight line with a bearing of 349-37 for a distance of 982 links, thence a straight line with a bearing of 268-28 for a distance of 536 links, thence a straight line with a bearing of 352-2 for a distance of 485 links

North.—Thence a straight line eastward with a bearing of 87-37 for a distance of 808 links to the starting point.

Block No. II, area 3·75 acres.

North and west.—Starting from the south-east corner of S. No. 822 north eastward along the east side of that field to where it meets the west side of S No. 824.

East.—Thence south along the west side of that field to its south-west corner, thence a straight line with a bearing of 160° for a distance of 537 links

South.—Thence a straight line north-west for a distance of 720 links to the starting point

Block III, area 70·16 acres.

North.—Starting from the north-east corner of S No 819, a straight line with a bearing of 28-18 for a distance of 447 links, thence a straight line with a bearing of 17-33 for a distance of 286 links, thence a straight line with a bearing of 61-16 for a distance of 332 links, thence a straight line with a bearing of 40-17 for a distance of 268 links, thence a straight line with a bearing of 87-24 for a distance of 260 links, thence a straight line with a bearing of 83-18 for a distance of 1,093 links. Thence a straight line with a bearing 96-29 for a distance of 700 links.

East.—Thence (along the base of Jarlakon-da hill) a straight line with a bearing of 171-18 for a distance of 200 links, thence a straight line with a bearing of 111-30 for a distance of 383 links, thence a straight line with a bearing of 210-51 for a distance of 474 links, thence a straight line with a bearing of 216-42 for a distance of 492 links, thence a straight line with a bearing of 241-30 for a distance of 718 links, thence a straight line with a bearing of 200-35 for a distance of 404 links, thence a straight line with a bearing of 170-52 for a distance of 476 links, thence a straight line with a bearing of 211-13 for a distance of 160 links, thence a straight line with a bearing of 178-26 for a distance of 520 links, thence a straight line with a bearing of 171-44 for a distance of 252 links, thence a straight line with a bearing of 216-28 for a distance of 278 links.

South.—Thence a straight line westwards with a bearing of 252-07 for a distance of 151 links, thence a straight line with a bearing of 251-55 for a distance of 213 links, thence a straight line to the south-east corner of S. No. 821.

West.—Thence along the east sides of S. Nos. 821, 820 and 818 to the starting point.

Extent of exemption and reason for its abrogation.—The area acquired yields no income and is fit for cultivation. The trees growth consists of kuruga and margosa. The blocks are required for assignment to the landless poor.

Fort St. George, May 18, 1929.

No. 181.—Under section 48 (1) of the Land Acquisition Act I of 1894, as amended by Act XXXVIII of 1923, the Governor in Council hereby withdraws from the acquisition of an extent of 97 cents of land in S. No 387 of village No 88 Muddapuram in Hospet taluk included in the notification under section 4 (1) of the Act, published at pages 163 and 164 of Part I of the *Fort St. George Gazette*, dated 31st January 1928.

ACQUISITION OF LANDS.

Under section 6, Act I of 1894, His Excellency the Governor in Council hereby declares that the lands mentioned below and measuring 0·14 acres, be the same a little more or less, are needed for a public purpose, to wit, for the extension of the station yard, Hospet, by the Madras and Southern Mahratta Railway; and, under sections 3 and 7 of the same Act, the Sub-Collector, Hospet, is appointed to perform the functions of a Collector under the Act and directed to take order for the acquisition of the said lands. Under sub-section (1) of section 17 of the Act, the Governor in Council further directs that the possession of the said lands may be taken on the expiry of fifteen days from the date of the publication of the notice mentioned in section 9 (1) of the Act. A plan of the lands is kept in the office of the Sub-Collector, Hospet, and may be inspected at any time during office hours.

Government, wet, R.S. No. 327/7 E, (H S No 188 D part), belonging to Kalidasu Pallamraju and Kalidasu Lakshmi Gopalakrishnamraju, bounded on the north by R.S. No. 327, east by R.S. No. 327/7 C; south by R.S. No 413, west by R.S. No. 327/7 A.	0·13

Under section 6 of the Land Acquisition Act, the Governor in Council hereby declares that the lands specified below and measuring 11·85 acres, be the same a little more or less, are needed for a public purpose, to wit, for the construction of the Salem-Attur-Vriddhachalam Railway; and, under sections 3 and 7 of the same Act, the Special Deputy Collector, Salem, is appointed to perform the functions of a Collector under the Act and directed to take order for the acquisition of the said lands. Under sub-section (i) of section 17 of the Act the Governor in Council further directs that the possession of the said lands may be taken on the expiry of fifteen days from the date of publication of the notice under section 9 (1) of the Act. A plan of the lands is kept in the office of the Special Deputy Collector, Salem, and may be inspected at any time during office hours.

Salem district, Attur taluk, Navakkurichchi village.

H. R. PATE,
Secretary to Government.

DEVELOPMENT DEPARTMENT.

LEAVE.

Fort St. George, May 21, 1929.

No. 167.—M.R.Ry. Rao Sahib C.S. Ramachandra Ayyar Avargal, Superintendent, Government Industrial Institute, Madura, leave on average pay for one month with effect from date of relief.

Fort St. George, May 23, 1929.

No. 168.—M.R.Ry. Rao Sahib N. R. Balakrishna Mudaliyar Avargal, Assistant Superintendent and Acting Superintendent, School of Arts and Crafts, Madras, leave on average pay without medical certificate for six months from 1st May 1929.

APPOINTMENTS.

Fort St. George, May 2, 1929.

No. 169.—The Government are pleased to appoint M.R.Ry. D. P. Roy Chowdhury Avargal, Assistant Superintendent on probation, School of Arts and Crafts, to officiate as Superintendent, School of Arts and Crafts, Madras, on Rs. 600—50—1,000, *vice* M.R.Ry. Rao Sahib N. R. Balakrishna Mudaliyar Avargal, granted leave from 1st May 1929.

Fort St. George, May 21, 1929.

No. 170.—M.R.Ry. V. Rama Rao, Assistant Superintendent, Government Industrial Institute, Madura, to act as Assistant Industrial Engineer and Superintendent of the Institute during the absence of M.R.Ry. Rao Sahib C.S. Ramachandra Ayyar on leave or until further orders.

POSTINGS.

Fort St. George, May 18, 1929.

No. 171.—Mr. A. N. Ananthanarayana Sarma, Deputy Conservator of Forests, on return from leave, to be attached to the Conservator of Forests, III (Working Plans) Circle until September and thereafter to be Working Plans Officer, Wynaad.

A. McG. C. TAMPOE,
Secretary to Government.

Fort St. George, May 27, 1929.

No. 172.—(1) F. Ware, Esq., Director, Veterinary Services, is, as directed by the Government of India and pending definite orders from the Government of India, directed to proceed to Muktesar to join duty as Director of the Research Institute, Muktesar.

(2) T. J. Horley, Esq., Professor of Surgery and Acting Principal, Madras Veterinary College, to act as Director, Veterinary Services, *vice* (1) or until further orders.

(3) M.R.Ry. V. Krishnamurti Ayyar Avargal, Professor of Pathology and Bacteriology, to act as Principal, Madras Veterinary College, *vice* (2) or until further orders.

NOTE.—(1) Should hand over charge to (2) at Coimbatore and who will hand over charge to (3) by wire.

M. C. B. ROMAN,
Under Secretary to Government.

NOTIFICATIONS.

Fort St. George, May 14, 1929
(G.O. Mis. No 854, Development).

No. 173.—The following draft of an amendment to the rules published with the notification of the Local Government in the Revenue Department No. 483, dated 2nd October 1915, published at pages 1039–1042 of Part I of the *Fort St. George Gazette*, dated the 9th November 1915, as subsequently amended, which it is proposed to make in exercise of the powers conferred by sub-sections (1) and (2) of section 43 of the Co-operative Societies Act, 1912 (II of 1912), is published as required by sub-section (4) of the said section for the information of all persons likely to be affected thereby, and notice is hereby given that the said draft will be taken into consideration by the Governor acting with Ministers on or after the expiry of two months from the date of the publication of this notification.

Any objection or suggestion which may be received from any person with respect to the said draft within the said period will be considered by the Governor acting with Ministers.

DRAFT AMENDMENT.

After the second paragraph in clause (*a*) of rule IX of the said rules, the following paragraph shall be inserted, namely:—

"Credit societies with shares and whether with limited or unlimited liability which have for their main object the accumulation of their members' savings are exempt from setting apart as reserve fund any portion of their profits, provided they have provision in their by-laws neither for borrowing from non-members nor for lending to their members."

Fort St. George, May 22, 1929.

No. 174.—Under the provisions of section 1 of the Madras Cattle Disease Act, 1866, the Government, Ministry of Development, hereby direct that the provisions of the said Act shall be put in force in the village of Sankarankoil in the Sankarankoil taluk of the Tinnevelly district from 22nd July 1929 to 22nd August 1929.

No. 175.—Under the provisions of section (1) of the Madras Cattle Disease Act, 1866, the Government, Ministry of Development, hereby direct that the provisions of the said Act shall be put in force in the whole of the Nilgiris district for a period of one year from 8th July 1929.

Fort St. George, May 14, 1929
(*G. O. Mis., No.* 882, *Development*).

No. 176.—In exercise of the powers conferred by section 3 (1), clause (a) of the Madras Agricultural Pests and Diseases Act III of 1919 as amended by Act VII of 1925, the Government (Ministry of Development) hereby declare that the plant known as 'water hyacinth' (Eichhornia speciosa Kunth) is a 'noxious weed.'

Under section 3 (1), clauses (*f*) and (*g*) of the Act, the Government (Ministry of Development) prohibit the transport of this weed from one village to another or its transplantation from one water source or receptacle to another in the Chatrapur and Berhampur and Ichchapur taluks of the Ganjam district for a period of one year from 1st June 1929 and direct that the plant wherever found in the said area be killed.

No. 177.—In exercise of the powers conferred by section 21, clause (*a*) of the Madras Agricultural Pests and Diseases Act, 1919, the Government (Ministry of Development) hereby declare that in respect of the plant known as water hyacinth, the word 'plant' shall include the 'seed of the plant.'

No. 178.—In connexion with the destruction of the water hyacinth in the Chatrapur, Berhampur and Ichchapur taluks of the Ganjam district the following are appointed inspecting officers under section 12 of the Madras Agricultural Pests and Diseases Act III of 1919 as amended by Madras Act VII of 1925:—

(i) Revenue Inspectors, Minor Irrigation Overseers, Supervisors, Overseers and Sub-Overseers of the Public Works and Local Fund Department, Sanitary Inspectors and Overseers attached to the municipalities in the Chatrapur and Berhampur taluks of the Ganjam district.

(ii) Under section 21 (*f*) of the aforesaid Act, the Government (Ministry of Development) are pleased to direct that appeals under section 6 of the Act shall lie to the Tahsildar or Deputy Tahsildar in independent charge having jurisdiction over the water-sources or premises concerned.

ANNEXURE I.

(1) The fact of the publication of the notification enforcing the provisions of the Madras Agricultural Pests and Diseases Act, 1919, in respect of water hyacinth should be made known to the public by beat of tom tom in the areas concerned. The leaflet prepared by the Director of Agriculture on the water hyacinth should be published in English and the vernacular in the village sheet of the district gazette. Spare copies of the leaflet should be distributed to the Agricultural Associations and the chief landowners in the tracts and posted in the village chavadies and other prominent places.

(2) The period (to be specified by the inspecting officer in the notice issued under section 5 (1) within which the occupier shall carry out the remedial or preventive measures will be left to the discretion of Tahsildars (or Deputy Tahsildars in independent charge) who should give general or special instructions to inspecting officers, subject to the condition that in no case should the period allowed exceed eleven days.

(3) Appeals under the Act are subject to the usual stamp duty of 1½ annas. The Collector should add a note to this effect at the foot of the rules issued under section 21 of the Act.

(4) In order to enable inspecting officers to meet the cost of the remedial or preventive measures carried out under the Act each inspecting officer shall be given a permanent advance of Rs. 25.

(5) Instructions regarding the procedure to be adopted in the issue and re-occupment of permanent advance are printed in Annexure II.

ANNEXURE II.

(1) The advances required by Inspecting officers to carry on the remedial measures may be drawn by them on the form for 'Bill for Miscellaneous payments' countersigned by the Tahsildar of the taluk or Deputy Tahsildar in independent charge. The charges incurred should be debited to "Advances repayable—Special advances—Advances for the destruction of Agricultural pests and diseases—Madras Act III of 1919."

(2) Tahsildars and Deputy Tahsildars will maintain a register showing separately the advances drawn by each inspecting officer specifying the particulars for which the advances were sanctioned. In this register, particulars of recoveries effected should also be noted, the required information being obtained from the Treasury Officer. They will also be responsible for the adjustment of all such advances drawn from the treasury.

(3) Each inspecting officer should also in his turn keep a register showing all advances drawn by him, the demand issued and the recoveries effected, the last information being obtained from the Treasury officer.

(4) As the work in each area progresses, the inspecting officer will submit to the Tahsildar or Deputy Tahsildar vouchers in support of the expenditure incurred by him and on its completion he will refund any unexpended balance. Amounts refunded will be treated as abatement of charges under the advance account concerned.

(5) All recoveries on account of the remedial measures carried out by Government should be credited as receipts under the advance head concerned, i.e., 'Advances repayable—Special advances—Advances for the destruction of agricultural pests and diseases—Madras Act III of 1919.'

(6) Fines realized under section 14 as well as those realized under section 15 should be credited to 'XVI-A Law and Justice—Courts of Law—General fees, fines and forfeitures.'

(7) Remittances of amounts recovered by village officers should be specifically described in the chalans as 'Recovery of advances for the destruction of Agricultural pests and diseases—Madras Act III of 1919.'

Fort St. George, May 10, 1929.

No. 179.—The Governor in Council hereby declares under the provisions of section 13 of the Madras Forest Act V of 1882, that the area, the boundaries of which are set forth in the schedule below, shall be constituted a reserved forest with effect from 1st July 1929.—

SCHEDULE.

Salem District, Hosur taluk.

[Name of block—Ayer extension No. II—Area 325 acres—Number of block 219.]

BOUNDARIES.

North.—Starting from cairn No. 1 situated on the eastern boundary of Gullatti reserved forest, 1,482 links south of its north-east corner, the line runs with a bearing east-south 19½° for 132 links to cairn No. 2 at the south-west corner of S.F. No. 267 of Bettamugilalam thence along the south side of that field for 208 links to cairn No. 3; thence along the same boundary of the said field for 375 links to cairn No. 4 at its south-east corner; thence with a bearing of 70½° for 149 links to cairn No. 5; thence with a bearing of 19½° for 440 links to cairn No. 6; thence with a bearing of

18° for 466 links to cairn No 7; thence with a bearing of 8° for 840 links to cairn No 8; thence with a bearing of 93° for 509 links to cairn No 9; thence with a bearing of 95° for 566 links to cairn No. 10; thence with a bearing of 96° for 371 links to cairn No 11; thence with a bearing of 87° for 440 links to cairn No. 12; thence with a bearing of 94° for 508 links to cairn No 13; thence with a bearing of 96° for 631 links to cairn No. 14 on the western boundary of Aiyur reserved forest 460 links north of cairn No 97 of the said reserve.

East.—Thence southwards along the western boundary of the Aiyur reserved forest to its south-west corner; thence along the west boundary of Sanars reserved forest to the north east corner of Nyamanandirum Agraharam reserved forest (i.e., the junction of Sanars, Nyamanandirum Agraharam reserved forests)

South.—Thence westwards along the northern boundary of the Nyamanandirum Agraharam reserved forest till it meets the northern boundary of the Thalavahitta reserved forest; thence along the northern boundary of the Thalavahitta reserved forest till it meets the eastern boundary of the Gulhatta reserved forest.

West.—Thence northwards along the eastern boundary of the Gulhatti reserved forest to the starting point.

RIGHTS.—The following public rights of ways have been admitted to a width of 30 feet for all kinds of traffic.

1 Cart-track from Aiyur to Siddapuram via. Nyamanandrum Agraharam and Sanars reserves.

This enters the reserved forest at cairn No. 14 on the northern boundary of the reserve and runs generally south and southeasterly directions for a distance of about a mile and leaves the reserved forest at cairn No. 10 of the Nyamanandirum Agraharam reserved forest.

II. Cart-track from Jeyamanandiram to Siddapuram via Nyamanandirum Agraharam reserved forest.

This enters the reserved forest at cairn No 1 and runs generally s uth along the western boundary for about half a mile; thence in a southeasterly direction through the reserve for about 2 furlongs and leaves the reserved forest at 50 yards south of cairn No. 32 of Nyamanandiram Agraharam reserved forest.

ACQUISITION OF LAND.

Fort St. George, May 18, 1929.

Under section 5 of the Land Acquisition Act, the Governor in Council hereby declares that the land mentioned below and measuring 0·36 of an acre, be the same a little more or less, is needed for a public purpose, to wit, for the formation of a branch road to Forest coupe XI and under sections 3 and 7 of the same Act, the Sub Collector, Sermadevi, is appointed to perform the functions of a Collector under the Act and directed to take order for the acquisition of the said land. A plan of the land is kept in the office of the Sub-Collector, Sermadevi, and may be inspected at any time during office hours.

Tinnevelly district, Nanguneri taluk,
Inam Vadagarai village.

	ACRE.
Portion of inam Vadagarai village, nature—inam, dry, belonging to the Holmes Sridhar Pandarasannadhigal of Thiruvaduthurai Athinam, bounded on the north by Reserved reserve forest; east by ardra inam Vadagarai; south by Vanguarai-Arasapatta road; west by ardra inam Vadagarai ..	0·36

A. McG. C. TAMPOE,
Secretary to Government.

PUBLIC WORKS AND LABOUR DEPARTMENT.

LEAVE.

Fort St. George, May 21, 1929.

No. 272.—M.R Ry. M. V. Ramaswami Ayyar, Assistant Engineer and Personal Assistant to the Superintending Engineer, Coimbatore Circle, leave on average pay without medical certificate for one and a half months from date of relief.

Fort St. George, May 22, 1929.

No. 273.—Mr. L. Henshaw, Executive Engineer, Workshops and Machinery Division, Cauvery-Mettur Project, leave on average pay for three weeks from the 6th May 1929, afternoon.

EXTENSION OF LEAVE.

No. 274.—M.R.Ry. S. Krishnaswami Ayyar Avargal, B.A., B.E., Executive Engineer, extension of leave on average pay on medical certificate for three months from the 6th May 1929.

APPOINTMENTS.

No 275.—Mr. F. M Dawley, Executive Engineer and Personal Assistant to the Engineer in-Chief, Cauvery Mettur Project, to hold full charge of the Workshops and Machinery Division, Cauvery-Mettur Project, in addition to his own duties, during the absence of Mr. L. Henshaw, on leave or until further orders.

Fort St. George, May 21, 1929.

No. 276.—M.R.Ry. K. Srinivasa Ayyangar Avargal, B.A., B.E., Assistant Engineer and Instructor, College of Engineering, Guindy, to officiate as Executive Engineer, Guntur division, Bezwada Circle, with effect from the date of taking charge.

NOTIFICATIONS.

Fort St. George, May 23, 1929
[G O Ms. No. (7-8) I].

No. 277.—The following notification of the Government of India is republished:—

HOME DEPARTMENT.

The 17th May 1929.

No F. 180/29-Judl.—The services of the Hon'ble Mr. Justice Arthur Page, K.C., Barrister-at-law, a Judge of the High Court of Judicature at Fort William in Bengal, are placed at the disposal of the Government of Madras with effect from the 19th May 1929, for appointment as Chairman of the Madras-Mysore Arbitration in connexion with the Cauvery Dam Gangings.

Fort St. George, May 22, 1929.

No. 278.—Under sub-section (1) of section 48 of the Land Acquisition Act I of 1894, as amended by Act XXXVIII of 1923, the Governor in Council hereby withdraws from the acquisition of land mentioned below and measuring 0·33 of an acre notified for acquisition in page 1049 of Part I of the *Fort St. George Gazette*, dated 3rd July 1928, as required for the construction of quarters for the Police staff in 34. Tiruppanandal village, Kumbakonam taluk, of the Tanjore district.

Tanjore district, Kumbakonam taluk,
No. 34. Tiruppanandal village.

	ACRE.
Unenfranchised minor inam, dry, religious. S No 180 part, belonging to T D No. 898, Kovilpathu, Kasivadi Sri Annapurneswaraswami temple, present Manager for Fasu Sri Kasi Subbiamu Deekar, Paudara Sannadhi, Adhikarkarbar, Dharmapuram, Mayuvaram taluk, bounded on the north by Nos 177-1, 2, 3, 4, 6 & 8 and 178-2, east by No 179-10-1 south by Nos. 208-1, 212-1 and 213-1, west by Nos 182 and 181-1, 2, 3, 4, 5 & 6	0 33

Fort St. George, March 22, 1929 (*G.O. No.* 990 *I.*).

No 279.—The Special Executive Engineer's reports in regard to the fixation of the excluded as well as the permanent and rotational zones for second crop zone in the Godavari Western Delta will be published in English and Telugu in the *Fort St. George Gazette* and in the District Gazettes of the West Godavari and Kistna districts. The reports will also be placed on the table of the Legislative Council. Objections, if any, to the introduction of the proposals should be sent so as to reach the Board of Revenue (Land Revenue and Settlement) not later than the 1st August 1929. The Board will consider and report on the objections to Government.

2. The Senior Translator to Government will arrange to furnish the Superintendent, Government Press, with a Telugu translation of the reports for publication in *Fort St. George Gazette* and District Gazettes as early as possible.

ANNEXURES

(i)

PRELIMINARY REPORT ON THE SECOND CROP PROJECTS.

Second crop ayacut figures.

In the final report on localization, mention has been made of the fact that the ayacut of the delta, taking into account all the area included in the permanent zone, and that taken in the rotational zone on the basis of a common scheme of triennial rotation, is 125,500 acres, against 131,000 acres, the paddy crop ayacut fixed for the delta in the second crop season—vide paragraph 55 of the report.

Balance available.

2. The deficit in the area to be covered is thus 5,500 acres and in this connexion, the suggestion was made that instead of resorting to a biennial scheme of rotation for some of the lands in the delta, it was decidedly better to develop purely second crop projects, on lands which are at any time unfit for first crop by reason of heavy submersion in the first crop season.

The object of this report is therefore to enquire into the possibilities of such development and bring the several relevant facts to the notice of Government with a view to order a fuller investigation, and later the execution of these projects.

It is to the extent of 5,500 acres or 4,200 in omitting the reserve of 1,300 acres kept (see final report, paragraph 66) that new lands outside first crop ayacut can be brought into the second crop ayacut.

Possibilities of supplying Government waste lands.

3. The question next arises as to where these extensions are to be looked for. There are in the delta, large extents of assessed waste, and patta dry lands, more or less unfit for first crop, in the following villages: Muthyalapalli, Vempa, Vemuladevi and Kolpatnam villages of Narasapur taluk, Losarigutlapad, Kalvapudi, Annaceder, Kalla, Seesali, Doddanapudi, Bondada of Bhimavaram taluk. There are also large areas in the bed of the Collair available for second crop cultivation, but it is useless to think of them in connexion with the supply of canal water, as all easily accessible lands have already been proposed for inclusion in the permanent zone, and the bed of the rest is such that it is not possible to convey water to them, as the Ellore canal, by which water has to be sent down, is incapable of taking any additional supply.

Lands under Undi canal

4. On going into this matter in detail, it is seen that the lands of Seesali, Kalla and Doddanapudi have to be left out, as the channels intended for them have to be taken from the last and unnavigable reach of Undi canal, whose capacity for carrying increased discharge is very limited, due to the various masonry works and the tiny section of the canal below Undi aqueduct. Even if improvements be carried out and these overcome, there is still the disadvantage, that extensions must be sought, not under one channel, but under several of them, as large additions to any one individual channel are not easily achieved. The lands of Bondada are perhaps better than the others, but not only are they very much in the interior and difficult of access, but a longer channel is also necessary in their case, and in consequence the entire area of waste blocks cannot be effectively commanded for the levels obtainable on the Undi canal. Further, two parallel channels will be required—one on either side of the Bondada channel to take care of its existing irrigation and the central and existing channel should be improved and reserved for the waste lands. This

Costly works necessary.

would mean a lot of costly acquisition and many new masonry works. The Geography of this tract is not also well known and the possibilities are that large drains (old course of Yenamadurru drain) may have to be crossed, if large areas are to be irrigated. Perhaps the largest area that can be commanded in this tract by a new channel is not more than 1,500 acres, judging from the figures furnished by the Special Deputy Collector in regard to the area available in this village.

5. The other villages that remain over for consideration in Bhimavaram taluk are Kalavapudi, Annecoder and Losarigutlapad villages. The lands of Annacoder have to be commanded by Annacoder channel, but here again, the area that can be taken is small and is out of proportion to the expense involved in acquisition and the alignment of a new channel. The lands of Kalavapudi are proposed to be assigned for development as a pumping project, and consequently are best left out of account. Even if it were otherwise, the expense of bringing a channel nearly four miles through wet land is likely to be very expensive. The lands of Losarigutlapad are in two parts, the area to the east of Yenamadurru drain and the area to the west of it, and it is the area west of it that is proposed to be first dealt with. At the head and the best part of this block lies the pumping installation of the Circars Agricultural Company, covering an area of 1,500 acres, and any new channel or extension of an existing channel, would therefore have to cross their territory. They themselves ask for inclusion in the second crop ayacut and offer to create all the necessary facilities from the existing channels, without any expense to Government, and it is a matter for the consideration of Government whether their request should be granted. The possibilities of turning water on to assessed waste lands on this side are therefore not very attractive and consequently these lands have to be relegated to the second line of choice.

Pumping installation—Circars Agricultural Company.

6. Dealing next with the villages of Narasapur taluk, the villages for consideration are Muthyalapalli, Vempa, Vemuladevi and Kalipatnam villages. The other villages near the coast are separated by Upputeru and are therefore left out as works of very large magnitude will be required.

Government waste lands in Muthyalapalli.

7. The area in Vemuladevi village is in the hands of the Narasapur Agricultural Company. This company has also applied for the inclusion of its lands in the second crop ayacut and its case is analogue to that of the Circars Agricultural Company only for the outside view. I leave this out also, with the passing remark, that here again there is no possibility of going in for large projects without also taking in the company's lands.

Vemuladevi project.

8. In regard to Vempa and Muthyalapalli villages, lying between Gunupudi South drain and Gontera drain, there are extensive Government waste lands (estimated at about 2,500 acres) in both villages fit for only second crop. The lands are all under submersion during the most part of the first crop season, and are very low lying 0·7 to 1·5 feet above sea level. They are also subject to tidal ebb and flow and saline in character. Almost the entire area is Government waste land, comparatively easy of access and lies close to well populated villages and labour seeking members of depressed classes and has in fact every desirable feature to commend itself. Speaking generally, as it is also a large block, larger than any one block hitherto considered, it is comparatively cheaper to carry water on to it. This block which was once reserved forest, has been disafforested by depressed classes, who are very keen on taking over the land and bringing them under the plough, if only water supply is made available.

Conditions obtaining in Muthyalapalli block. See Index Map.

9. The only other villages to consider are the portions of Losarigutlapad village, east of the Yenamadurru drain and the lands in Kalipatnam village. The two villages, merging into one another, form one block and if to it, the very small areas of Vempa and Muthyalapalli west of Gunupudi South drain are added, it would constitute all the available area between Gunupudi South drain and Yenamadurru drain.

Conditions obtaining in Losarigutlapad and Kalipatnam.

The levels of this block are very nearly the same as those of the block of Muthyalapalli last described and the chief difference lies in the lie and nature of Kalipatnam village which is slightly more sandy, and alluvial, and less saline, and is clearly on a higher level than Muthyalapalli and Losarigutlapad lands. The area Losarigutlapad and Muthyalapalli villages belongs to Government, while that in Kalipatnam is held by the Raja of Mogalaturru, from whom a lease has been taken by one Mr. A. Venkataraman of Narasapur, who in his turn has offered to alienate 500 acres of it to the depressed classes, if all the lands are taken into the second crop ayacut. The total area of the block can only be guessed, but it would be a near enough estimate to put it at 7,000 acres—three thousand the area of Losarigutlapad, Vempa and Muthyalapalli and the rest of Kalipatnam (4,000 acres). Out of the Losarigutlapad, 500 acres have been given over to the pumping installation to the east of Yenamadurru drain, and another 500 acres are proposed under the existing Yenamadurru channel in the permanent zone. The question of including this latter pumping scheme in the permanent zone is under the consideration of the Collector. Of the area of 3,000 acres only 2,300 acres are conveniently commanded, the rest being too low or requiring an aqueduct across a local drain for a very small area of commandable land.

Kalipatnam lands—Application for inclusion in second crop ayacut.

Smaller pumping installation.

Of this, as 1,000 acres are already taken up by the pumping installation and the permanent zone proposed, there is only 1,300 acres of commandable Government land. This together with the Muthyalapalli block makes up to 3,700 acres. There is thus a balance of 500 acres or nothing according as the pumping installation is or is not taken into the second-crop ayacut.'

10. The peculiar feature of both blocks is the facility with which new channels can be taken to them. In the case of Muthyalapalli, the Muthancodu channel is a big one and till about two miles from the block is a very wide and deep channel. In the portion where most of works are required, it runs through a tract, where comparatively little acquisition is necessary. In the case of the Yenamadurru channel, the greatest advantage is that the existing channel is short, has ayacut only on one side and its banks can be used as one bank for the new channel. All these features tend to reduce the initial outlay on these two projects.

Supply facilities.

11. Assuming then, that the two projects, one for the lands to the east of Gunupudi South drain and the other to the west of the drain, are the most likely ones to be taken up, I proceed to discuss the detailed arrangements necessary for bringing about their cultivation. The case of Muthyalapalli and Vempa, to the east of Gunupudi South drain and west of Gontern, will be first considered, and will be shortly termed Muthyalapalli project for sake of convenience, while the other will be called Losarigutlapad project.

12. *Muthyalapalli project—Technical features.*—The area to be commanded is about 2,500 acres and cannot be more accurately estimated, as the area has not been surveyed.

Area available.

13. This area has to be supplied by improving the Muthancodu channel. The proposals for doing the same are outlined below.

The Muthancodu channel is a branch of the Adivicodu channel, which again, is a channel taking off from the Gostanadi and Velpur canal at 35 miles 22½ chains, above Vissacoder lock. The second crop allotments to the Adivicodu channel omitting the permanent zone are for three years in the new scheme as follows:—

Rotation and permanent zone—How it affects the project.

First year.	Second year.	Third year.
1,217	3,701	3,483

The total area of permanent zone under the Adivicodu is 1,905 acres and hence the maximum area to be supplied is 3,701 plus 1,905=5,606 acres. As the project area is 2,500 acres, the channel should be able to supply water for 5,606 plus 2,500=8,106 acres, or say, 8,100 acres roughly. This is within the capacity of the channel to carry, as the first crop ayacut is 10,921 acres.

14. Taking Muthanoodu channel, the areas omitting permanent zone for three years are as follows :—

First year.	Second year	Third year.
839	1,982	2,185 *

* 2,185 acres below No. 8 dam now in third year turn 328 acres to be transferred to first year's turn (2185—352=1833).

The total area of permanent zone under the channel is 1,209 acres (inside wet) plus 437 (outside wet) or = 1,646 acres. Hence the total area to be supplied is 1,833 plus 1,646=3,479 acres. If the channel should irrigate 2,500 acres more, it should carry water for 2,501 plus 3,479=5,979 acres. The first crop ayacut of the channel is 6,215 acres. The first crop ayacut below dam No. I of the channel is 6,037 and that below dam No. II is 5,115. The latter figure is 900 acres below the proposed second crop ayacut, viz., 6,000. The channel section is therefore short by 14 per cent nearly. The F.S.L. depth of the channel is 3·25 and the bed width 16'—0" as per register of C. Works (also agrees with the cross sections of the channel). The cross sectional area of the channel is 73 square feet and the extra 14 per cent or 10 square feet required can be obtained by running an increased depth of 6" over F.S.L. This can well be managed and in fact represents 70 duty supply against 90, accepted duty for second crop. Consequently, no alterations are required to the channel up to No. II dam. In this year (third year of rotation), the ayacut to be supplied second crop commences at 3/5 and consequently water for 5,980 acres has to be carried up to 3/5. The first crop ayacut at 3/5 is 5,115 — 876=4,242 acres. The first crop section of the channel here is 14/3·25. Just below K. Bathapudi Branch which takes off at this point, the ayacut is only 3,560 acres, requiring a section of 12/3·25. We already noticed that a depth of 6" over F.S.L. was necessary at No. II dam at 2/2. At 3/5 (above head of K. Bathapudi Branch) the depth required is about 1·2 over F.S.L. for 84 cusecs and this will continue as such till 5/2, without any further rise, as all the ayacut from 3/5 to 5/2 is opened for second crop in that year, and consequently the offtakes will be drawing off proportionately.

Existing channel up to 2/4 sufficient.

Below 5/2, we have to supply 2,400 acres every year (vide statement in the Gostanadi and Velpur canal Subdivisional officer's file), and an additional area of 2,500 acres (project area). Hence in all the three years, water must necessarily be carried for 4,900 acres. The ayacut will at 7/3 be only the project area or 2,500. Hence the following channel sections will be required :—

13 × 3·5 at 5/2 (just below dam).	10 × 3·75 at 6/4.
11 × 3·75 at 5/4.	10 × 3·5 at 7/0.
10 × 3·75 at 6/0.	10 × 3·0 at 7/3.

Hence the following proposals emerge from the above discussion :—

(1) That the channel section for first crop can carry the supply required for project lands with 6" extra depth, from No. 1 dam (1–0½ F) to 2/4.

Measures necessary for working out the project.

(2) From 2/4 to 3/5, an extra depth of 1·2 feet is required to force the required supply for all the lands including the project lands.

(3) That from 3/5 to 5/2, very nearly the same state of affairs will obtain.

(4) That from 5/4 to 7/3, the channel cannot take water at all for the project and that it requires considerable widening.

The following improvements are therefore necessary :—

To widen the channel from 2/4 to 5/2 and then from 5/2 to tail end to enable the required water-supply being carried on to the project lands.

When this improvement is effected, the section of the channel will be wider than is required for first-crop requirements, and consequently, the water-levels in the main channel may fall too low for purposes of command. It is found on calculation, that to carry the required discharge without exceeding 6" over F.S.L. the channel should be widened to the following bed widths : 16 feet at 2/4, 14 at 3/5 and 13 at 5/2. The bed widths required for first crop are only 14 at 2/4 and 12 at 3/5. The water level is therefore likely to fall down about 5" below F.S.L. in the first-crop season and consequently to enable command being maintained, a dam at 3/5 will be necessary. This should be a dam operated by turns, and a head of 0·25 to 0·3 maintained therein in the first-crop season. This is unavoidable.

First-crop difficulties due to alterations and how met.

The commandable level below this new dam in first-crop (3/6) will be maintained by operating No. 3 dam at 5/2 which is within one mile four furlongs of this new dam. The commandable level below No. 3 dam 5/2 can be maintained in the first-crop season by closing the dam at head of Muthancodu project channel (7/3). The wider section of the channel will induce a flatter surface fall; but as the water level below dam in second-crop is designed 6" over F.S.L. and the fall is 0·5 per mile, the closing of the dam at 7/3 will make the channel work with a fall of at least 0·25 per mile, and for two miles, it would mean that at 5/2, F.S.L. would be realized, in practice. (It is for eliminating and reducing command difficulties that the second-crop water-level is assumed 6" over F.S.L.)

Works to be carried out in three stages.

15. To avoid large initial outlay, I suggest that the improvements may be carried out in the following stages:—

(1) The project channels and distributaries and the widening of the Muthancodu channel from 5/2 to 7/3 in the first stage.

(2) Widening of the Muthancodu channel from 2/4 to 5/2, with a new dam at 3/6 (a little below K. Bethapudi branch) in the second stage.

(3) The provision of parallel channels from 2/4 to 5/2 as a last step if it is found that the two dams (existing dam No. 3 and the new dam proposed at 3/6) are found in operation to cause serious supply difficulties to the project lands or wet lands in first-crop season.

16. In accordance with the above proposals for remodelling the channel to supply project lands in three stages, I have framed my estimates.

The proposal for the new channel is as follows:—

Proposed alignment.

A channel from 7/3 will be excavated along the alignment indicated up to 9/3. It will throw two distributaries each for 500 acres at (1/0 or 8/3) and a second set at 9/1. Thus the channel will have four distributaries each for 500 acres and will itself irrigate 500 acres at the very end.

The alignment shown on the tracing is considered best, as the channel will then run along the nearest possible approach to a ridge along this line and will lie in the middle of the block. There will be depression to be crossed somewhere about 8/4 or 5, and an under-tunnel may perhaps be necessary to equalize water-levels in the rainy season, as otherwise channel banks may get breached.

The hydraulic particulars are noted below:—

HYDRAULIC PARTICULARS.

New project channel 7/3 to 9/5 below.

	7/3	8/3	9/1
Ayacut	2,500	1,500	500
Duty	70	70	70
Discharge	36	22	7
Fall per mile	0·5	0·5	0·5
B. width	10	6·0	3·0
Depth	3·0	2·0	2·0
F.S.L.	+ 3·5	3·0	2·6
B. level	+ 0·5	0·0	+ 0·6

DISTRIBUTARY.

At head

Ayacut	500	Fall			0·5
Duty	70	B. width			4·0
Discharge	7	Depth			2·5

With the above particulars, I roughly estimate the cost as follows:—

Rough estimate of costs.

Enclosures. L.S. and C.S. sheets of Muthancode channel and statement of E.W. calculations.

Works required on channel from 7/3 below:—

		Rs.
1-a.	New channel for the project lands. 2 miles 6 furlongs E.W. units. 700 × 7	4,900
1-b.	Land acquisition—Exchanges can be granted on Government land.	
2.	Four new distributaries (see Special Deputy Collector's report) about 6 furlongs long 480 × 7 ... acquisition—exchanges can be granted.	3,360
2-5.	Piping of distributaries	100
3.	Head sluice for four distributaries 4 × 300	1,200
4.	Drainage crossings at the valleys, U/T 1,000 ...	1,000
5.	Excavating of drains to connect with existing creeks.	1,500
6.	Widening channel from 5/1 to 7/3. Units 950 × rate 7 = ...	6,650
7.	Dam at 7/3	300
8.	Improvements to Adivicodu channel H.S. if required.	500
	Total ...	20,000 roundly.

WIDENING CHANNEL from 5/1 to 7/3.

Hydraulic details.

	Bed width.	Depth.		Bed width.	Depth.
At 5/2	12 ×	3·75	At 6/4	10 ×	3·75
„ 5/4	11 ×	3·75	„ 7/0	10 ×	3·5
„ 6/0	10 ×	3·75	„ 7/3	10 ×	3·0

Second step—earth work. Kannan's figures for Srungavrukham are Rs. 1,000 to 2,000 per acre and for Veeravanam Rs. 1,000 to 1,200 and Tondarm Rs. 700 to 1,000 against Rs. 1,263 assessed.

		Rs.
	Widening channel from 2/4 to 5/2 ... ... 460 × 7 =	3,220
	Land acquisition—5 acres at 1,200 or 1,400 per acre including 15 per cent compensation for compulsory acquisition (for laying banks on an average)	7,000
	Dam below K. Bethapudi branch	800
	Total ...	11,020

Third step.

		Rs.
	Earthwork for parallel channels and main channel (1,226 units of earth work) 1,2·6 × 7 = ...	8,582
	Deduct earthwork, second step	8,120
	Net ...	5,462
	Land acquisition 15 acres (20—5) at 1,200 or 1,400 including 15 per cent for compulsory acquisition	21,000
	Total ...	26,462
	Dam on Muthancodu	800
	Head sluice for right side parallel channel	500
	Do. left side parallel channel	300
	A new head sluice for K. Bethapudi branch	500
	Removing and fixing pipes on parallel channel	200
	Total ...	28,762
		or 30,000 roundly.

Hence the cost of the full scheme for irrigating 2,500 acres will be as follows:—

	Rs.
First stage	20,000
Second stage	11,000
Third stage	30,000
Total ...	61,000
Contingencies and petty supervision	4,000
Total ...	65,000

Of this, the first-crop share may well be put down at 5,000 to 6,000 rupees, as the existing channel banks are not up to the first-crop standards. Hence, the works may be taken to cost Rs. 60,000 of which Rs. 30,000 may be avoided, if the parallel channels are given up. Indeed, it is enough if Rs 20,000 is spent to start with. As the irrigation expands, the widening of the channel from 2/4 to 5/2 can be taken up and lastly if need be, the parallel channels from 2/4 to 5/2.

First-crop share.

17. Much of the drainage improvements, and field distributary works may be taken up by the interested ryots and depressed classes on at least lower rates than have been provided, and the actual cost of execution may thus be even lower than proposed.

18. The cost of improvements including the new channel is Rs. 21 for the complete scheme and Rs. 12 if the parallel channels are abandoned. The lands are believed to be worth considerably more than the amounts arrived at, and consequently the project is likely to prove very remunerative.

Cost per acre of the project.

LOSARIGUTLAPAD PROJECT.

Technical features.

19. The area available in Losarigutlapad east of Yenamadurru drain omitting the pumping installation is as follows:—

Area available.

		ACRES.	
		1,646·47	as per karnam's statement enclosed.
Deduct ...	...	500·00	Permanent zone under Yenamadurru channel.
Net area ...	...	1,146·47	
		250·00	Deduct low lying area at level 0·5 and below not likely to clear of water and fit for dalwa till after the transplantation season is over.
		200·00	Deduct channels, drains, high mounds not commandable and puntas for bothus, distributaries, etc.
		696·47	
		500·00	Unsurveyed lands in Vempa estimated as fit for second-crop west of Gunupudi south drain.
Total	...	1,196·47	

or say 1,200 acres.

20. It is best to design the project therefore for 1,500 acres if only Government lands are to be taken up. This may have to be for 1,700 acres if pumping installation lands are included in the permanent zone under Yenamadurru channel. In case the project channel is to be excavated, it is better to take under it Survey Nos. 280, 281 and portion of 279 of Dirusumarru under it, as acquisition and new bothies proposed for them from the Yenamadurru channel will be avoided. They amount to 244 acres, of which 200 acres alone may be taken under this channel. Besides, 500 acres of Losarigutlapad proposed under Yenamadurru channel is also best taken under this channel.

Project channel to command also area proposed under Yenamadurru channel.

Hence the channel will have to supply 1,500 plus 500 plus 200 or 2,200 acres.

21. The proposals will be as follows:—

The existing Yenamadurru channel will be taken up as project channel and a new channel run on acquired land from 0,0 to 8,0 and joined to existing channel at the latter place to irrigate the wet ayacut all along.

Proposals for alignment.

From 3/0, the new project channel will run alongside the Yennamdurru drain till 6/4 (very near Tokadibba), and will throw out a distributary at 3/7 (boundary between Lowrigutlapad and Dirusumarru). This distributary will run along the boundary, through S. Nos. 280, 281 and then up to Gunupudi drain. The alignments of the channels will be as shown on the enclosed tracing.

22. The hydraulic particulars of the channel will be as follows:—

IMPROVEMENTS TO EXISTING CHANNEL.

New Yennamdurru channel.

	0/0	1/0	2/0	2/4	3/0
Ayacut	3,903	2,874	2,452	1,993	1,993
Duty	70	70	70	70	70
Discharge in cusecs	56	41	35	29	29
Bed width	10	8·0	6·0	6·0	6·0
Depth	4·0	4·0	4·0	3·5	3·5
Surface fall per mile ...	0·5	0·5	0·5	0·5	0·5
F.S.L.	7·13	6·63	6·13	5·88	5·63

Earthwork calculation sheets and C.S. sheets enclosed.

The cross sections have been plotted on the C.S. sheets and the approximate estimate of costs is as follows:—

The karnam's figures for Gunupudi and Yennamdurru are Rs. 1,200 to 1,500 and 1,500 to 2,000 respectively and in Dirusumarru Rs. 600, against Rs. 1,200 taken. This requires verification, as the karnam's figures seem to me to be over-estimated

	rs.
New head sluice on Gastanadi and Velpur canal ...	2,500
Earthwork 886 at Rs. 7	6,062
Land acquisition 12 acres at 1,400 (average) including 15 per cent for compulsory acquisition	16,800
New sluices in masonry in places of existing parallel sluices	1,100
Contingencies and petty supervision 7½ per cent ...	1,338
	27,800
Main channel—	
Earthwork 3/0 to 6/4—320 units at 7	2,240
No acquisition is provided for, as there is enough margin between the drain and the patta lands from 3/0 to 3/7.	
Crossing for channel to pumping installation ...	800
Pipes for irrigation	160
	3,200
Distributary—	
Earthwork 120 units × 7	840
Two under-tunnels for disposal of field drainage of Dirusumarru lands	1,000
Catch drains for the under-tunnels	400
Land acquisition 6 furlongs × 10 chains × 3/4 chains = 4½ acres at Rs 600 (rough estimate)	2,700
Pipes for irrigation	100
	5,040
Drainage improvements—	
A new drainage channel in waste lands for 6 furlongs to connect with Gunupudi drain—please see line on tracing 25 square feet × 9 × 660 = 100 units.	700
Total ...	8,940
Contingencies and petty supervision at 7½ per cent ...	660
	9,600

Hence the total cost of the scheme is as follows :—

	Rs.
New Yenamadurru channel	27,800
New Project channel and distributary	9,000
Total ...	37,100

Share of expense necessary for improvements to existing channels.

Against this must be set off the cost of effecting necessary improvements to Yenamadurru channel for bringing under cultivation 700 acres of assessed waste already proposed under it, but now transferred to this channel. This may be taken as Rs. 2,400 including acquisition for bothies, and consequently the net cost of the scheme is Rs. 35,000. The project is designed for 1,500 acres of Government land, but it was mentioned that the actual area available would be roughly 1,200 or 1,700 acres according as the pumping installation lands are taken into the permanent zone or not. Whether the project is for 1,200 acres or 1,700 acres of new land the difference in capital outlay will not be very great, as most of the estimated cost in the first three miles of the new Yenamadurru channel will be unaltered. On 1,200 acres, the cost therefore works out to Rs. 29 and on 1,500, Rs. 23 and on 1,700, perhaps also the same amount, allowing for the larger sections of channels required.

Cost per acre.

Land values assumed.

The above rates are based on the assumed value of Rs. 1,200 (plus 15 per cent) or 1,400 per acre of wet land in Yenamadurru and Gunipudi villages but if the actual compensations to be paid per acre are higher, the projects will prove more costly.

Lands subject to water-logging.

Works required and assumptions made.

23. It is well to note here that the estimates of cost made out, are based on land values assumed by me as reasonable, block levels and such information as could be got from local inspection and enquiry. The one other assumption made is that the area of 1,200 acres of Losarigullupad (omitting 500 acres already included in permanent zone) will be emptied of the drainage water before 15th January to enable the lands being transplanted. It is ascertained from ryots that Muthyalapalli block on the east of Gunupudi south drain has been free from water this year from 1st January, and is usually so every year and consequently no difficulty is likely to be felt about irrigating that block. As regards the block east of Yenamadurru drain, and west of Gunupudi drain, I noticed during my inspection of the lands on 19th February 1929 that the ground was slushy in Survey Nos. 130 (East part) and 149 and I was informed that water was on the ground till about 10th February. This date is too late for raising a second-crop. This is chiefly stated to be due to the higher water-levels obtaining on the Yenamadurru drain, than on Gunupudi south and Gontoru drains and comparing this with the Muthyalapalli block. I am of opinion that it would be possible to get for this block the same freedom from submersion that the latter enjoys, by excavating a connecting drain to Gunupudi south drain and closing up, the drain falling into Yenamadurru drain at Nayudupalem, somewhere opposite Tokadibba (Resurvey No. 122). This will not keep in the first-crop season, when the drainage to be passed is considerable, but it can be re-formed at very little expense in January and will thereafter serve till the end of second-crop season, as the second-crop drainage will easily flow into the Gunupudi south drain.

Further investigation needed.

No recorded readings of this drain are available and hence, I have based my report on the possibility of irrigating this block only on local enquiries and the condition as reported of Muthyalapalli lands. I therefore suggest that this point may be re-examined after taking fresh levels before actually preparing detailed estimates for the project channel.

Improvements common to both projects.

24. The only other important technical features that have to be mentioned here are the improvements necessary on the Gostanadi and Velpur canal. The second-crop ayacut for this canal including permanent zone is 19,441 acres. The two projects add 4,200 acres and hence the area to be supplied is 23,641 acres. The head lock can easily pass the required discharge at 90 duty and as the water discharges at the head lock with a clear overfall, and the weir has tambogies and lock culverts to supplement supply in very bad years such as 1921, no costly improvements are called for. The banks in the last reach may require slight strengthening as we are making the additions at the tail end of the canal, but as the canal has a minimum navigable bed width, it can carry the required discharges easily.

General aspects.

Applications for inclusion in ayacut.

25. Having fully dealt with the possibility of undertaking the projects solely for the benefit of Government waste lands, I may conclude by referring to the several applications pending for the grant of water during the second-crop season for patta and pumping lands. Reference has already been made to the three projects which are pumping installations and another for inclusion of patta dry zamindari lands of Kalipatnam.

As already stated, there are 4,200 acres to which water can be spared, and it has been noted that in cases of both the projects discussed at length, the full scheme is likely to cost Rs. 22 and 30 per acre. It is not likely to exceed Rs. 30 in any case. Of course the partial scheme for Muthyalupalli is already noted to cost about Rs. 12 per acre. It is further to be noted that the Government waste lands which can be conveniently commanded by the project channels amount to about 3,700 against 4,200 acres available. (This is only rough. It may be from 3,500 to 4,000 acres after actual detailed survey and 3,700 acres seems a fair average.)

26. In this connexion, I enclose the several * petitions presented by the several applicants for inclusion in second-crop ayacut. There are four of them (1) from the owners of the pumping installation of Losarigutlapad on the left side of Yenamadurru drain; (2) the owners of the pumping installation on the right side of the Yenamadurru drain—Circars Agricultural Company; (3) the owners of Vemuladovi surplus water project, Narasapur Agricultural Company; (4) the lessee of Kalipatnam lands.

Pumping installation in Losarigutlapad of Yenamadurru drain.

The first block is 500 acres and is the smallest of the four. The lands have been already recommended for inclusion in the permanent zone under Yenamadurru channel by the Revenue officers and the matter is under consideration of the Collector.

Pumping installation—right side of Yenamadurru drain.

The extent of pumping installation land owned by Circars Agricultural Company is 1,500 acres, and is on the right side of the Yenamadurru drain. It has to be commanded by taking a channel parallel to the Bhimavaram branch of the Annacoder channel, and taking it over the Rayalem drain by means of an aqueduct.

Vemuladovi project lands.

The area of Vemuladovi project is 2,000 acres but not more than 500 acres has ever been cultivated first crop till now. Portions of this are high and are commendable only by lift. The expense of bringing them under second-crop cultivation is not likely to be so large as in the case of others, as much of the capital outlay required has already been incurred in developing first-crop resources.

* Not printed.

The next and the last are the Kalipatnam lands. Very nearly the same arrangements as have been proposed for the new project channel for Losarigutlapad will be required in their case, but an aqueduct will also be needed to cross a local drain shown on the tracing. Such levels as have been taken of them show that the lands are commandable but the channel will have to be designed very wide and with a very flat fall to enable all the area or a large part of it being effectively commanded. This can be done, as the project is purely for second crop, and water in second-crop season is clear and conditions as regards critical velocities will not apply.

Kalipatnam lands

The promoter of the Kalipatnam scheme according to his petition enclosed offers to bear all expenses in connexion with the excavation of the channel and carry out the works if he is granted water for 4,000 acres. He has also offered to set apart 500 acres of his land to depressed classes. What his attitude will be if a smaller area than 4,000 acres is granted water and what will become of his promise to give away land free to depressed classes, are at present only matters for conjecture. It is also doubtful how far his gift deed is valid.

27. The material factors which have to be considered in this connexion, and in the matter of final choice between Government waste lands on the one side, and patta dry and pumping lands on the other side, are the following :—

Material factors affecting decision.

(1) Whether the sale value of Government land in Losarigutlapad and Mothyalapalli villages will be so high that the two projects will not only pay Government all the expenses incurred in bringing out the new channels, but will give something more by way of profit.

(2) Whether the assessment and revenue returns on the lands held by applicants compare favourably among themselves and again as between them and the Government lands proposed for inclusion.

In connexion with these projects, the differential rate only has to be taken into consideration, as water can be used on wet lands elsewhere in delta, by changing over from a triennial rotation scheme to a biennial rotation scheme in part. It differs in this respect from a first crop project. If the patta lands are assessed higher and it is not practicable to raise the rates on Government lands to the same level, it is a further question for consideration whether the initial sale value of Government land is sufficiently high as to capitalise the difference in rates of assessment. Thus if the assessment on Government land is Rs. 3-8-0, and it is not possible to raise it and that on patta dry land is Rs. 5, the sale value of Government land should be high as not only to meet the cost of the project, but give Government the capitalised value of Rs. 1-8-0, the difference in rate.

Differential rate only to be reckoned

The above are matters for investigation and report on the revenue side. The material and economic conditions in the tracts are also matters for their investigation and may be such as to turn the scales in favour of the Government lands.

Revenue investigation required.

28. Nearly all the patta zamindari and pumping lands inclusion of which is sought, are irrigable in the second-crop season as already noted, provided channels are excavated or improved, but perhaps the whole area of 4,000 acres of Kalipatnam may, not be commanded. Possibly the commandable area will only be between 3,000 and 3,500 acres owing to the very great distance of these lands from the sources. I am making no detailed estimate of costs in respect of these schemes, as all applicants have offered to carry out the works themselves and at their cost. If however a very rough estimate of cost were desirable, it may be put down as Rs. 25 to 30 per acre, depending on the distance to which water has to be carried.

All lands irrigable.

29. Beyond drawing attention to the facts that of these the lands of Kalipatnam are reported by the Special Deputy Collector to be assessed at a higher rate than Losarigutlapad (Divisional Officer's note on the village enclosed), I have no remarks to offer. In this connexion it is a matter to be enquired into if the difference in rate said to exist would be there, if as is likely to be the case, both the Government lands, and the Kalipatnam lands are kept under *dry* head. The lands cannot be converted into wet as there will be no purely second crop wet land as such, there being no guarantee for supply of water in second-crop season. The registry being dry, presumably, the water-rates would be the same as between Government and zamindari lands. This is however a point for revenue enquiry.

Special Deputy Collector's report.

Kalipatnam lands.

30. The smaller pumping installation on the left side of Yenamadorru drain has already been reported on favourably for inclusion by the Revenue Department and is 500 acres in extent. Its claims for inclusion in the second-crop ayacut are well set out in the reports under the consideration of the Collector, and beyond drawing attention to the facts that the lands will be all but enveloped by the project channels, and that there is room to develop the 3,700 acres of Government land proposed and still include the lands in the second-crop ayacut, I have no remarks to make. The applicants have also offered to pay inclusion fees, and it is under the circumstances, a matter for consideration whether their request should receive a preference over those of the other applicants. The spirit of the conditions of grant and the history of the installation are also matters for investigation and if their claims are considered as proved, they can be, as already noted, taken into the ayacut of the Yenamadurru channel with inclusion fees or without them on condition of paying for any supply facilities that may have to be created for them; and the Government waste land of 500 acres may then be transferred to the project channel. In the latter case, the one project will be for 2,500 acres of Muthyalapalli and the other for 1,700 acres of Losarigutlapad, covering up the whole area available.

Smaller pumping installation

31. It is now known definitely that water is available for 4,200 acres, outside the regular ayacut. The merits of the case as regards Government waste or other lands have been discussed on the purely technical side, and after such enquiry as may be found necessary on the revenue and administrative sides, it is for Government to decide which of the several alternatives mentioned below should be adopted.

Results of technical scrutiny

The following alternatives are possible:—

(1) To substitute a biennial rotation scheme in part for a triennial rotation;

(2) To proceed with the two projects for Government lands leaving the balance as additional reserve, or assign this reserve to the smaller pumping block of 500 acres, increasing the commandable area under the second project from 1,200 acres to 1,700 acres;

(3) To proceed with one of the two projects preferably Muthyalapalli which is cheaper, and give the other area to one or other of the applicants who have applied for it;

(4) To give up all the projects for the Government lands and allot the water to the several applicants in shares or to any one of them. If this alternative be considered and decided upon, it is obvious that the applicant whose request is allowed, should be required to carry out the works himself and at his cost subject to such other conditions as may be imposed.

Alternatives for consideration.

32. Orders are solicited on the above matters to enable further investigation being taken up, as regards projects for Government lands.

29th *February* 1928.

A. R. VENKATACHARI,
Executive Engineer on Special Duty.

APPENDIX I.

Copy of the statement furnished by the karnam of Losarigutlapad village, Bhimavaram taluk.

Statement showing the resurvey numbers and extents on the eastern side of the Yanamadurru drain in the village of Losarigutlapad, Bhimavaram taluk.

Survey number.	Extent. ACS.	
195	108·40	These are registered as cattle-stand porambokes.
196	20·29	
197	102·11	
198	126·03	
199	169·43	
200	165·19	
201	287·58	This is registered as old drain but it seems according to the survey plan only an extent of nearly 100 acres is the drain.
149	31·56	Unassessed waste lands and cattle-stand porambokes.
130	182·64	
129	122·24	
128	21·36	
127	115·74	
	1,648·47	

In Survey Nos. 129, 128, 130 and 199 an extent of about 100 acres is higher.

APPENDIX III.

Gostanadi and Velpur canal.

Kalipatnam Agraharam.—Kalipatnam is an Agraharam village. The zamindar has leased out 2,500 acres to Mr. Venkataraman who has in his turn offered to transfer 500 acres from this extent for the benefit of the depressed classes, the trustees on whose behalf are Mr. G. Ramachendra Rao, and Ch. Hanumanth (retired Government Telugu Translator). The three gentlemen have applied for a channel to irrigate the whole extent. It is to come from the Gostanadi and Velpur canal either as an extension to the Dirusumarru channel or as a separate one independent of it.

The extent of land available is nearly 4,000 acres according to local estimates. Neither the leasehold of Mr. Venkataraman, nor the land dedicated to the depressed classes has been localized on ground. There are a few high areas, known as Dayyala Thippa, Komativani Thippa, Jodubokkulu, Nidi Thippa, Mara Thippa, Peddari Thippa, etc. The whole is otherwise a level stretch of low land in continuation of Losarigutlapad village on its west, and Dirusumarru and Vempa villages on the north. Drains and creeks bound the area in the east, south and part of the west, the landslide so favourable for carrying a channel into the area only from the north. This is, in fact, the only direction from which water can be brought.

The population of the village is about 2,000. About 1,000 are Pallis, Settibalijis and Kapus make up the bulk of the rest. The fishermen in these parts are very keen cultivators, and the other castes in the village are equally keen to have irrigation extended to their village. Agasa Nayudupalem, Toka Thippa, Losarigutlapad, Golavani Thippa, which surround this area have also a large number of cultivators. There is therefore no lack of cultivators. Nor is labour scanty or costly. As already mentioned, an extent of 2,500 acres has been leased to Mr. Venkataraman, Bar-at-law, and the rest is zamindari, lying fallow. The first-named gentleman is prepared to finance the scheme, and also the ryots. Thus both capital and labour are available to make the project a success.

There is no ryotwari land within the limits of the village. The whole is an inam village and not a cent of it is wet. Consequently no land is entitled to free irrigation. But unlimited extents are available in the Losarigutlapad and Vempa villages, to which the irrigation might also be extended. In fact, the assessed wastes, i.e., between the aycut of the Dirusumarru channel and this block Losarigutlapad is not properly surveyed and it is only possible to guess the extent of waste land available.

The irrigation is likely to spread quickly as the ryots have no other work to adequately engage them. I expect that within five or six years the whole area might come under cultivation. All that is needed is to dig up some of the high fields and to put up bunds. Neither manuring nor flood banks are needed as the irrigation is for the second crop only. A few washings of the saline lands would set them right for the present.

The whole project is in an embryo stage. The petitioners themselves are unable to lay definite proposals for scrutiny. Two points have to be decided: (1) whether the irrigation facilities proposed for this block may fruitfully be diverted to Government waste lands in

Losarigotlapadu, Dirisumarru and Vempa villages, and (2) how is water to be carried to the lands in question. With regard to the first point, it must be noted that land in Losarigotlapadu is assessed to a rate of Rs. 1-4-0 per acre (*dry*) and Rs. 4 (*wet*). For Dirisumarru, the rates are Rs. 1 and 5 respectively. The lands of Kalipatnam would, on the other hand, pay Rs. 3 per acre in the shape of water-tax. Lands in the vicinity which are usually waste have been sold at Rs. 50 per acre. Even the land granted to the Kshatriyas for the pumping project east of the Yenamadurru drain is said to be worth no more though it is actually irrigated for second crop. Hence the probable sale value of the Government assessed wastes should, I think, be Rs. 50 per acre or a little higher, especially as there is to be no guarantee of water during second crop. The assessed wastes lie nearer the source. In fact, they lie between the Kalipatnam block and the ayacut of the Dirisumarru channel. In other respects, the conditions of the two blocks are identical. I do not think that any enlargement of the head of the Dirisumarru channel will be desirable. It is best to give an independent source to the new project whether it be Kalipatnam or Losangotlapadu. Else there would be never-ending trouble between the present ayacutdars of the Dirisumarru channel (under which also there is to be a permanent zone), and those of the new ayacut. The digging of a parallel channel is the only feasible course, provided of course that the water which would be spared for the new irrigation is sufficiently large in quantity. The whole ayacut of the Dirisumarru channel lies to its east. Hence the new channel has to be dug along its west. For this there is no space as the channel and the Yenamadurru drain lie side by side. The only solution is to acquire land a chain in width (the present channel width) along the east of the present channel for a distance of 2¼ miles at a cost of not less than Rs. 1,000 per acre. For most of the rest of the length Government land is available. It might probably be necessary also to acquire land in the pumping project of the Kshatriyas. The entire length of the channel would be about 3 miles. All the sluices opening into the ayacut of the Dirisumarru channel will have to be constructed in the left bank of the new channel which would be the future Dirisumarru channel. The existing channel will be the project channel. An additional head sluice will also have to be constructed. The petitioners are prepared to bear the cost of the acquisition, construction, etc. A rough idea of the cost can be arrived at only after technical scrutiny.

3rd April 1927.

AZIMULLA KHAN,
Special Deputy Collector.

(ii)

FINAL REPORT ON THE LOCALIZATION OF THE SECOND-CROP AYACUT IN THE GODAVARI WESTERN DELTA.

History.

Description.

The Godavari river rises on the slopes of the Western Ghats in the Bombay Presidency and in its long course of over 500 miles drains a basin of 115,000 square miles. Much of this river basin is clad with thick forests and this circumstance not only mitigates the severity of the floods in that river, but also ensures for it a steady and even low water-flow for the greater part of the year, unlike the other big rivers such as the Kistna and the Cauvery. Thus in a normal year, the state of supply from January to April is found sufficient to support a second-crop irrigation of nearly 1½ lakhs of acres.

2. Assured as it is of a perennial supply, second-crop cultivation in the Godavari Western delta has been growing by leaps and bounds, from about 12,000 acres in 1877–78, to about 190,000 acres in 1918–19. Since the latter year there had been a steady decline until in about 1923, it had reached a figure somewhere about 146,000 acres (including dry and garden crops).

Second-crop cultivation.

3. The one factor which gave an impetus to the growth of this second-crop irrigation is the expectation, almost bordering on certainty, of a fair crop to the ryot during every second-crop season, provided a fair supply of water all along is available. In this season all nature is favourable to the ryot, and the one marked feature in it is the absence of heavy rainfall, and the losses consequent on heavy submersion. The prevailing wind "pyru gali" exerts a great influence for the welfare of the crops, and is not favourable for the propagation of insect pests which take not a small toll of the first crop. Thus so long as the actual second-crop cultivation did not out-distance the reasonable performances of the river supply, there was little trouble in evidence, but once the limit was passed, both the scarcity of supply felt all the more in one or two adverse seasons, and the growing exhaustion of the soil as a result of growing two crops with but short periods of rest, contributed

Factors affecting second-crop cultivation.

to the decline in the area cultivated. Under these conflicting forces, conditions were nearing a state of equilibrium in 1924, though the backward swing of the pendulum had not been finally set at rest.

Proposals for localization.

4. It was in these circumstances that it was decided to localize and put on a satisfactory basis the second-crop cultivation in the delta. An attempt to localize the area and fix the rotation programme made in 1920 had to be given up as the conditions were unsettled and, in the working of the programme, various difficulties were encountered. Government accordingly sanctioned the establishment consisting of an Executive Engineer and a Deputy Collector with necessary staff under them for one year from 1st April 1926 in G.O. No. 226 W., dated 19th February 1926.

Scope of the work.

5. The objects with which the special party was formed are set out with great clarity in the Superintending Engineer's letter to the Chief Engineer for Irrigation in his No. 1 W./1-15, dated 1st April 1924. The special party was to prepare detail figures of ayacut of all lands which should be excluded from second-crop paddy altogether; it was to list out all lands so liable to submersion during first-crop season that they do not get a first crop on the land; it was also to draw up a scheme of rotation for the rest of the area. Some details were also given as to how this should be achieved. They are not reproduced here, as the procedure subsequently followed which will be described in the proper place will, to a great extent, cover the same ground

The fixing of the total second-crop ayacut for the delta.

Fixing of second-crop ayacut discharge figures.

6. As a first step, my predecessor soon after his joining the duties had to decide what area could be supplied with water in the second-crop season as on this everything rested. In the Superintending Engineer's letter No. 866-M/W.L-15, dated 3rd September 1923, to the Collector, Kistna, an area of 200,000 (2 lakhs) was suggested as a possible ayacut figure to work to; but the Collector in replying to that letter in October 1923 in D. Dis. No. 10460, dated 29th October 1923, stated that "Experience has shewn that 160,000 acres is the largest area to which supply of water for second crop can be safely guaranteed. I understand that on two occasions when this area was exceeded, it proved impossible to supply water to all the lands." With a view to fix the area of second-crop cultivation, an investigation into the discharge figures was made, and it was found that calculations of river discharges available were based on assumed co-efficients for such low heads as 0·2 when the calibration formula of $Q = 1{,}100\ G = 3{,}700$ was clearly inapplicable The disparity in the discharge figures given by the calibration formula and the ordinary discharge formula on co-efficients whose accuracy had not been tested for a gauge reading of 4·6 was found to be as much as 150 cusecs and increased as the gauge fell lower. It was difficult to correctly read the afflux when the head was so small and this element as also the possible inaccuracy in the assumed co-efficients introduced an unknown error into all such discharge calculations. Moreover, the second-crop duty of 90 was found to be not based on such reliable data as 70 for first crop, and no experiment has been made to ascertain if the duty of 90 nearly, if not absolutely, represented the normal requirements of second-crop paddy. In these circumstances, it was decided at a conference of the Superintending Engineer, Collector, Executive Engineer, Godavari Western division, and my predecessor held in Bezwada on 12th May 1926 that "no reliable inferences could be drawn from the river supplies in the past as to the probable supplies in the future, and in consequence the only thing to do was to take the average area of second crop in past years, omitting the obviously 'false figures' as a basis for the future." As a result of this principle being laid down, a statement was prepared by my predecessor and the average area of cultivation was found to be 1,47,000 acres inclusive of dry and garden crops, the latter alone covering nearly 22,500 acres on an average. As the supply to these crops was about half as much as was required for paddy, the equivalent area in paddy was taken as 11,250 acres giving together with the regular paddy crop of 124,600 acres, a total of nearly

Second-crop ayacut on basis of actual cultivation figures.

136,000 acres The supply available was thus assumed to be sufficient to support a paddy crop area of 124,800 acres and the other crops covering an aggregate area of 22,500 acres.

Principles and procedure—Instructions to special staff.

7. While these investigations were in progress, Government, in the Revenue Department, issued in their Memorandum No. 874-B/26-2, dated 30th April 1926, further instructions as to how the localization should in their view be carried out. Inter alia, they required the Public Works Department to decide "the quantities of water available at the different seasons in the different parts of the delta" and added "that the question where water would be most profitably used from an agricultural and a revenue point of view would be one on which the ordinary Revenue and Settlement officials would be in the best position to advise" They also requested the Board of Revenue to arrange to hold at an early date a conference with the Collector, the Special Executive Engineer and the Special Settlement Officer and to draw up a scheme for the guidance of the special staff. The memorandum further noted the following as the three problems which required special consideration :—

The functions of Public Works Department and Revenue.

"(1) Whether water was to be first allotted for second crop on lands growing a first crop or for lands which are submerged and are therefore uncultivable in the first-crop season?

Questions of detail.

(2) Whether water was to be used for extending the area of cultivation or for waste?

(3) What special treatment was necessary for such crops as orange groves and dufassal crops?"

In paragraph 4 of the note accompanying this memorandum, which is mainly in the nature of a criticism of the Superintending Engineer's letter, reference was made to the three classes of lands and to the fact that there was no legal obligation on the part of Government to supply water to second crop; and some of the new points brought up for consideration were the existence in Baburzalli estate of a class of lands called Dalwa inams, and in other places of garden and other dufassal crops. It was also suggested that, as the average second crop on wet and dry lands was only 110,000 acres, it was unsafe to fix it any higher than 160,000 acres suggested by the Collector. The question was however left open for examination on the technical side. It was also forecasted that second-crop cultivation on single-crop lands not excluded permanently or taken into the permanent zone, may have to be fixed on a basis of three years. Another point for consideration was whether channels should be closed or opened entirely in the rotation programme.

8. Materials on all these matters were collected and my predecessor's report No. 50-M., dated 14th July 1926, sets out at length the results of these investigations. A note defining the principles and procedure to be followed was also enclosed to this letter.

On 23rd July 1926 the conference suggested in the Government memorandum was held at Bezwada under the presidency of Mr Macmichael with all the officers and the matter finally thrashed out. The conclusions of this conference are embodied in a statement of instructions suggested to be issued to the special officers for the localization of second-crop area in the Godavari Western delta. These rules framed at the conference were referred to the Irrigation Advisory Board for opinion and their remarks were reviewed by the Board of Revenue referred to the Collector un-officially in its W.O. No. H-1900/26-3, dated 9th October 1926. Some of the points brought up for consideration at this stage were as to how the total area should be allotted to various canals and whether it would be possible to apply this principle to Ellore canal. Some questions were also raised about the control to be exercised in the matter of supply of water to dry and garden crops. As a result of discussion of the new issues

Final conference and decision on various matters of detail.

Reference to Irrigation Advisory Board.

raised, a set of rules was finally evolved and Government in G.O. Mis. No. 2138, Revenue, dated 14th December 1926, approved of the final instructions drafted by the Board for the guidance of the special staff. A copy of these rules is appended to this report.

Final instructions—Appendix II.

Methods of work.

9. In the instructions issued to special officers, the main work set for them is the constitution of three zones in the delta; first, the regular or permanent zone of all lands "unable to grow a first wet crop;" secondly, the excluded zone of all lands which cannot conveniently be supplied with water for second crop; and, thirdly, the rotational zone in respect of which the special officers were to suggest the most economical distribution of water for all lands not included in classes (1) and (2). I have to fix myself lands which should be grouped under class (2), viz., excluded zone, and in regard to the other two zones, the work was to be jointly done. I thus started on the exclusion work soon after the tentative rules were framed, and as soon as the Deputy Collector joined duty in September 1926, he began the work of selection of lands for the first or regular zone.

Division of work.

Procedure adopted in regard to the working out of the excluded zone.

10. According to the rules, lands which cannot conveniently be supplied with water for second crop were to be excluded. It was first suggested in the Superintending Engineer's letter that high level lands should be cut out; but later on, it was found that the criterion as regards command should not be the sole test as to whether a particular land should or should not be excluded for paddy crop. The expression "lands which cannot be conveniently supplied" was therefore advisedly used. In practice, lands falling under the following categories had to be excluded for paddy crop cultivation :—

Class of land excluded.

(1) Lands difficult to command in the second-crop season;

(2) Lands under one source which though commandable, lay so mixed up with high and uncommandable lands that it would be impracticable to define the boundary between the two lands;

(3) Lands which though commandable under one channel were mixed with the uncommandable lands under the ayacut of another channel so that percolation difficulties were likely to be raised, if the one was open for second crop and the other not;

(4) Lands which did not utilize the concession granted to them in the past of growing a second crop;

(5) Lands for which an adequate quantity of water cannot be sent down the channels irrigating them; and those so remote from sources that it would be impracticable to supply them in the second-crop season;

(6) Lands which lay in the way of large areas of permanent zone.

11. In regard to this work the procedure suggested in the Superintending Engineer's letter was "to examine all the survey numbers in each and every village from village accounts, inspection on ground accompanied by levelling work, and the preparation of exclusion records on the basis of the information collected in the course of such an enquiry." In September 1926, I had to point out that the difficulties attendant on the adoption of such an elaborate method were very great, and what was more important, the result might not justify such a large expenditure of time and labour, and the work would in that case cover three years. The best method of dealing with this question was described in my No. 82-Spl., dated 1st September 1926, and the suggestions made therein, and approved by the Superintending Engineer in his No. 24-A.S., dated 8th September 1926, modified slightly in the light of actual experience gained in its working were actually followed, and are described below.

Procedure.

Special Divisional Officer's lists of lands.

12. Before starting on the exclusion work, lists were obtained from all the subdivisional officers of the channels and blocks served by them, which in their experience were found difficult to supply.

Tabulation of readings, water levels and discharges.

A particular canal was then taken up for investigation and a list of all sluices made out reach by reach in that canal. Taking for instance Narasapur canal, there were five reaches in it and each reach was taken up separately. The last reach was again split up into two. From the water registers available for years 1921 to 1926 (prior to 1921 were not taken into account as the Kakarasparru regulator had not been built then) an average reading in front and rear of the various locks was fixed for the latter portion of March and the first part of April, as 15th March to 15th April in any year is about the most critical period for Dalwa paddy. The fixing of the readings is largely a matter of judgment and where canals were found to be worked on turns, the normal readings available during the turn and non-turn periods were taken. Having fixed the readings, which judged by the results are those agreeing very closely with the actual readings in 1925 (a very normal second-crop year) (years 1921 and 1926 were marked by great scarcity and profuse supply respectively), the intermediate water levels were worked out at the heads of the several channels. The corresponding reduced levels were in many cases posted on the block maps and thereafter they served as a guide in determining the margin of command available. In the case of the bigger channels the rear water levels having regard to front water levels were also fixed, and in the case of high level channels the discharging capacity was also examined. On the levels so fixed, notes were prepared as to wherein the blocks requiring investigation lay. Notes were also made in regard to the rotation programme usually followed in the several channels under consideration. The notes so made will be found contained in pocket books 1 to 6, so far for the indoor portion of the work. The next step was to verify the block levels on ground and decide with regard to the boundaries to be fixed for the excluded lands by actual inspection as far as this was possible

Levels of lands in head reaches of delta.

13. In the head reaches of Attili and Junction canals and occasionally in other canals where the contours dropped so very rapidly that it was unnecessary to take fresh levels, the exclusion work was done after inspection of the channels and taking here and there such check levels of the lands on the spot as were necessary to show that block levels were fairly correct. After such inspection boundaries, up to which it was necessary to exclude lands, were laid out. This has been done by me in a large number of cases, and in others by overseers acting under specific instructions.

Levels of fields—Methods of determination.

14. In case of lands of doubtful commandability, levels were taken in two ways according as the one or the other method was suitable for the individual case; with the levelling instruments where levels of the block in the interior were required; with a spirit level and 10-ft. rod with reference to channel water levels in case of lands lying by the side of the channels. As the reduced levels at the head sluice of a channel can be determined and that at a dam on the channel at a known distance below the head can also be worked out by taking actual readings, at both places on the day the observations were taken, it was found possible to determine the intermediate water levels from the observed fall, and from them the field levels.

Method of taking levels.

This method had the great merit that it was impossible to commit the errors sometimes made in taking levels with the levelling instruments, and what is more, directly indicated the margin of command available between the field and the water levels, provided the regulation at the sluice had been pre-arranged to reproduce as far as possible the conditions obtaining in the second-crop season. Not only was it free from errors, but it made it possible for me to see for myself in very many cases how things will shape themselves actually in the second-crop season; this was particularly necessary as in the majority of cases no recorded readings exist on the channels at the various dams and regulators. The adoption of this method in the

remodelling of channels would be attended with considerable advantage, as if not anything else, it furnishes a ready means of verifying the field levels and locating errors, while its simplicity adds a great deal to the facility and expedition with which the work can be done.

Record of levels.

15. These levels taken by the overseers, in many cases in my presence, will be found recorded in their pocket books. They were in all cases reduced the same day and posted into the white sheets or coloured maps and consequently were not recorded in levelling field books. On the results shown by actual inspection, and the field levels, and water levels, decisions have been reached as to whether a particular block should be excluded or included.

Margin of command.

The general principle followed at this stage was in all cases to seek a margin of command of about 1·0 foot between main canal levels and field levels and about 0·5 between water levels in branch channels and the fields. Where this margin was found to exist for a large area in the block or the uncommandable area was not particularly large or could be irrigated by normal and reasonable manipulation of dams in the channels, the block was included in the rotational zone, otherwise it was excluded. This principle had however to be departed from in cases, where percolation difficulties occurred. The circumstances of these cases will however be found noted in the pocket books mentioned. In some cases, where it was known that the ryots were not utilizing the concession granted to them of raising a second crop, chiefly in the non-Collair villages of the Baharzalli estate on the Chinakapavaram channel, and tail ends of Jinnur and Mogalaturru channels, actual areas cultivated in one or two fasls, and the fact that they were permitted second crop, were marked out on the maps; and this was used as the means of determining the actual distribution of cultivation in the second-crop season. If the result showed that the cultivation was in patches, only the blocks where cultivation was concentrated were allowed and the rest excluded. However, I tried to enquire into the causes for such fitful cultivation, and also considered the question in its other bearings before finally excluding such blocks. In the more important cases, the Special Deputy Collector was also requested to make enquiries as to whether there was a demand for a rotation zone in the villages concerned.

Failure to raise second crop previously.

Distribution of second-crop cultivation—Application to exclusion work.

16. In a few cases, the actual disposition of cultivation in regard to area open, was also studied to help in arriving at decisions in regard to exclusion on other considerations than one of default. Thus in the case of Seripalem, and Moglaturru villages, under Jinnur channel, lands left waste for second crop, bahog wet lands and lands which grew a poor second crop (As. 2 to As. 4 crop) were posted on the map. It then readily showed that there was little that was not marked. This feature was one of the strongest arguments in favour of their total exclusion, though in the two cases, it was also necessary to exclude the lands in the interest of the very large area of permanent zone lands.

Subdivisional Officer's lists.

17. Full consideration was also given to the lists of lands furnished by the regular Subdivisional Officers in actual charge of regulation and, opportunity, as it offered, was also taken to discuss with them the difficulties experienced in applying the difficult and high blocks.

Boundaries for excluded lands.

18. Where it was decided to exclude particular blocks, the boundaries were inspected on ground in many cases. At this stage owing to the absence of suitable boundaries, many blocks had to be given up. In other cases, where it was not possible to isolate high lands, a small area of low land was also excluded. In still others, where puntas were not available, opportunity was taken to utilize the strong bunds existing along the field boundaries and bothies in the blocks. There was no alternative available except adopting these boundaries as puntas were not to be had

Boundaries other than puntas.

in such cases within reasonable distances of the line up to which it was necessary to exclude the lands. In some cases, these bunds were found going through middle of survey numbers and subdivisions and consequently infringed rule 4 of the instructions. The departure from the rule, to permit of these bunds being utilized, was approved in Board's Resolution Rt. No. 3653, Land Revenue and Settlement, dated 1st July 1927, which permitted new subdivisions being made.

Percolation difficulties—How met.

19. The one point raised by me in this connexion was the question as to how far Government can count on the strong bunds in patta lands being retained intact, as a means of preventing percolation difficulties. As the banks are on private buildings, it is to the interest of the ryot owning the excluded land to remove these banks and bring up complaints as regards percolation damages. On the other hand, if the owner of the included land is made to feel that the concession given to him of growing a second crop, is subject to the maintenance of this boundary or if he is informed that his land is liable to be thrown out, along with the exrluded land in the event of this boundary not being maintained (a small width of uncultivated land 15 links wide along side the excluded block would do as well) no trouble need be anticipated. With such a powerful weapon as exclusion in the hands of Government, and tactful handling of the difficulties as they arise, no troubles need be expected except perhaps in very stray cases. If every avenue of settlement open should fail in any individual case, Government, on general administrative considerations, might create a punta by acquisition. Advantage was also taken in a few cases of the fact that though very satisfactory banks did not exist, no percolation complaints *were raised in the past* when lands on either side of the boundary were open for second crop in different years; it is obvious in such cases the percolation damages could not have been material, or the bank is such that it is good or required only very little strengthening to make it work absolutely satisfactorily. In a case often, the ryots had no objection to fix field bunds as boundaries so that they could at least have the commandable lands retained in the rotation zone. Only in very few cases have such applications been accepted; and even then with the opinion taken from the Revenue Department. To avoid complications, as far as possible, unsatisfactory bunds were avoided, even where some ryots offered not to complain about percolation or proposed to strengthen them, except where the bunds were weak only in one or two survey numbers.

Baling wet lands.

20. The one other case that has to be mentioned is that of baling wet lands at the ends of channels and canals. In Narasapur, and bank canals and more rarely in other canals, there was a class of lands which though baling wet lands, was actually cultivated in the second crop season with dalwa paddy. The supply to these lands in the past had not been attended with any difficulties and all that they required was some supply of water which they could bale out. There was no need to maintain any high water levels in their cases, and provided supply to them was not opposed to the interests of other low lands, there was no object gained by denying water to them. Further, if the turns arranged on channels were terminated at the end of such a block, no conceivable reason can be urged for their exclusion, as it formed the last block to be supplied on the channel. With the approval of the Collector and the Superintending Engineer, baling blocks which are located under such specially favourable circumstances were not excluded but allowed to have their turn in the rotational zone.

Lands in the way of permanent zone lands.

The last case is that of lands excluded in the interest of permanent zone. A few lands though low and commandable for levels maintained in the branch channels required the cross bunding of bothies flowing down to the permanent zone. Where such cross bunding would seriously prejudice the interests of the permanent zone lands, they were excluded; further it was only fair that the lands which got a good first crop should stand out of the way of the wet lands which grow no first crop or at best a nominal one. In Seripulem, Matchapuri, Kopparru and Mogalturru, Tundurru, Kamasalabethapudi villages, it was found necessary to exclude some lands for this reason.

21. Much of the exclusion done according to the above principles, is mainly in the shape of large blocks, small uncommandable blocks, individual survey numbers being left out, as they will in course of time be lowered and brought under cultivation by flow. Even amongst the excluded areas, it may so happen that the ryots may lower them in future and make them fit for second-crop cultivation. It is not anticipated that there will be any objection to raise the prohibition in their case, provided they are small and entire blocks and not individual survey numbers. Their inclusion in the rotation zone is unlikely to considerably increase the total ayacut fixed for second crop.

Exclusion restricted to big blocks.

22. In the case of the ayacut of the Adivicodu channel above No. 1 dam, the exclusion is temporary and applies only until such time that the new sluices sanctioned on the Gostanadi-Velpur canal are built. In the case of the Kolamapalli lanka channel, the ayacut of the channel above dam No. 1 has already been proposed to be irrigated by direct sluices, one on either side of the channel. The exclusion of the lands above dam originally made has therefore been cancelled. They cannot be excluded conditionally as proposed in the first case, as the area under other channels will be affected by percolation.

Conditional exclusion.

23. Brief notes will be found in the pocket book of the reasons why particular lands have been excluded. Firstly, the preliminary technical work is noted on; subsequently, after field inspection and levels, final conclusions have been noted. As nearly 500 channels had to be investigated, and the mass of technical detail was very great only important considerations which influenced the decision are noted, and in nearly all cases, these should be read with the reports of inspections found in the investigation files, levels on the block sheets and the overseer's pocket books in still rare cases. Material on which the decisions are based will be more occasionally found in the Revenue Inspector's reports regarding percolation difficulties, and where connected with the permanent zanjo or the absence of a demand for second crop, in the Special Deputy Collector's reports. It is pretty certain that in every case, if the connected records and maps are gone into with the pocket books 1 to 6, ample justification will be found for the exclusion in all cases.

Notes in pocket books.

It is therefore very necessary to keep the records and more particularly all maps intact for at least some years until the scheme is fully in operation and no difficulties are raised or heard.

Importance of preserving records and plans

24. It is an argument frequently urged by the owners of excluded lands adjoining boundaries fixed, that lands in the same level as their lands have been included in the rotation zone. The reply to it is obvious. The lands in the delta are not terraced but fall imperceptibly from one end to the other. For sake of boundaries, puntas and natural features have had to be adopted, and so long as it is necessary to do so, and the country fall is gradual, there cannot but be lands which are equal in level on both sides of the boundaries fixed. Therefore, the test to be applied to all cases of excluded lands is not whether the lands on either side of the boundaries fixed are equal in level, but whether the excluded block *taken as a whole* is not more difficult to supply than the included block.

Exclusion of few low lands—Inevitable explanation.

25. The one point to note about the excluded lands is, that the prohibition applies only to the raising of dalwa paddy. Unless specifically prohibited, the fact that a particular land is found in the excluded zone is no bar to its raising irrigated dry or garden crops or even the raising of first or second crop seed beds. In the case of seed beds, to prevent misuse of the permission conveyed herein, it is desirable to rule that the excluded lands on which seedlings are kept beyond 1st February are liable to be penalized.

Exclusion—No bar to raise dry or garden crops or second crop seed beds.

Procedure adopted as regards selection of lands for the permanent or regular zone.

26. Paragraph (1) of the instructions to the special officers states that the purposes of this enquiry are (1) to form a regular second-crop zone of all lands

Public Works Department and Revenue side.

unable to grow a first crop. According to paragraph 3, the decision as to what lands should fall under this category should be made by the two officers jointly. Hence there are two phases to this question: the Revenue and the Public Works Department phases. The functions of the Revenue and the Public Works Department officers are defined in the same paragraph and need no repetition here.

Revenue Investigation.

Method of selection of lands.

27. A list of submersible lands obtained from the subdivisional officers was furnished to the Special Deputy Collector as a guide for his work. The work done by him in this regard cannot be better described than in his words in his report to the Collector D Dis. No. 78/26, dated 21st January 1927. He writes "A brief outline of the mode of our operations will here be helpful. Our chief difficulty has been to get at all possible cases deserving of special treatment for the permanent zone. At first local and general enquiries were tried. But this source of information is unsatisfactory and might lead to mistakes. Rainfall and remission figures were then obtained from the several taluk offices for the past five years and fasli 1335 was found to have experienced the heaviest rainfall and consequent loss of crop by submersion. The general remarks of the agraharam officers also showed the same. We have since been examining the adangal account and the karnam's inspection note-book of each village for fasli 1335, and making out a list of all cases which showed a yield of six annas and less. Estimates for the last five faslis (1331 to 1335) or as far as they are available are then got posted in a register. With the register in hand, villages are visited and further enquiries are made as to whether a six annas crop really means loss to the ryot. It has so far been found that a six annas crop is a crop fetching two to three bags per acre which is not sufficient to repay the outlay and labour of the ryot plus the assessment on the land. (That this estimate made at the time of localization of the permanent zone lands is correct is amply supported by the Settlement Officer's remarks in paragraph 40 (*f*), chapter V, of the Resettlement scheme report for the Kistna and the Godavari districts. He writes 'If however a rough estimate of expenditure required to produce a standard crop of paddy is desirable, I suggest Rs. 35 as the reasonable allowance on settlement lines for the best lands'. This is roughly equivalent to 5 bags of paddy at Rs. 7 per bag, as against two to three bags assumed.) Cases are then marked out which show a general loss of crop. Usually loss in three years out of five is taken as an unsatisfactory case. Rough sketches are then got prepared and these bad cases marked in them. Isolated and scattered patches are rejected. As proposals have to be made with reference to channels, small blocks of one village which adjoin larger blocks of another have to be tacked on to it. The larger blocks are then formed into zones with reference to natural boundaries where they do not exist, a tentative boundary is marked with the information as to the nature of the adjoining fields culled from the ryots and the village officers. The block is then ready for inspection and final proposals. During inspections, it has to be verified that the loss of crop is real and due to causes beyond ryots' control. In most cases it happens to be due to late supply of water and subsequent submersion from drains. Care has also to be taken that fields adjoining the permanent zone, but excluded from it are not likely to suffer from percolation, to which the ryots attach (with reasons) great importance. It has also to be seen that the channels or bothies which have to be kept flowing do not similarly affect the lands through which they pass."

Crop value—What is taken as loss to ryot—Settlement Officer's estimate.

Boundaries.

28. In case of lands not already in the first-crop ayacut, the Special Deputy Collector was requested to investigate into the existing irrigation facilities (bothies) in regard to internal distribution and suggest measures for improving the facilities or providing the new facilities. Where the formation of the permanent zone made it necessary to shut off the usual sources on the score of percolation troubles, the Deputy Collector had also to suggest alternative arrangements to enable the zone lands being cultivated. The

Sources for new lands selected for permanent zone—Internal distribution of water-supply.

share of the Deputy Collector's work and the stage at which the Revenue investigation stopped was thus at a point when the lands fit for inclusion had all been inspected, bonndaries laid out to avoid complaints as regards percolation and field channels investigated. The Special Deputy Collector then reported to me for technical scrutiny all the finished cases as he proceeded with his investigations.

Technical Investigation.

29. The work on the engineering side started at the point where it was left by the Special Deputy Collector. While on the exclusion and rotational zone work, I had collected a lot of technical material which would be of help in completing the investigation. Before the exclusion work was completed, the Deputy Collector was removed and consequently the changes that became necessary as a result of the technical investigation had all to be done by me, with the help where possible from the regular revenue officers.

30. The chief technical questions involved are set down below.

Conditions of inclusion.

The inclusions had necessarily to be limited with reference to the actual carrying capacity of the channels feeding them for first crop.

Assumptions made

In regard to this, the following assumption was made :—

That the channel would be maintained to the standards required for first-crop, both as regards section of the channel but also its banks and so on; thus if the existing channel section was wider, it was assumed that it would be contracted and vice versa.

With this limitation it became easy to dispose of all cases falling inside the first-crop ayacut. They were straightaway taken into the zone. In regard to the lands outside the ayacut, the following device was tried:—

Devices adopted.

To frame a rotation programme on the channel, as would leave (having regard to boundaries) a surplus and available channel capacity for feeding new lands; thus if a channel irrigating first crop on both sides of the channel is opened for second crop on one side of it in one year, and the other side of it in another year, at any point of the channel the capacity available is the difference between the first-crop ayacut below that point and the area open for second-crop in that year. If it were then possible, to tap off a source at a point where the channel capacity is in excess of the second-crop requirements below that point, it is obvious that it would be possible to include an area outside first-crop ayacut under that source. This principle has been freely applied in the case of many of the channels under which new lands have been included.

Duty question.

31. The question of duty to be applied in regard to the determination of the new areas which can be brought under the permanent zone, had then to be settled. The continuous supply duty for second crop is about 90, but so long as the supply at the distributing end is as high as 90 (which corresponds to a head duty of about 75), there is in practice no need to resort to turns. When the head duty falls to 90 to 100, the supply at the distributing end is in the neighbourhood of 100 to 120, and water generally falls too low for purposes of command. It has been the practice in the delta, to resort to external turns by closing one set of channels for a week or less, and opening it for another week. The period of opening and closing of the channels varies with the several subdivisions, and is based on past experience. In most cases, the open and closed periods are about equal. Hence during the time that they are open, they have to be worked from 60 to 80 duty and these figures have been taken in all cases except in the case of the Chinakapavaram channel. Here the turns observed in practice are somewhat irregular. In future, it is believed that it would be quite possible in periods of scarcity to keep open the channel for five days in the week and close it for two days. This would give a turn equivalent

External turns as affecting duty.

Chinakapavaram channel.

duty of 110 × 5/7 = 80 assuming that it is unnecessary to resort to external turns until the regulation duty falls to 110. If the supply is more copious, it would be possible to work the channel closing it for one day in the week and, if still more copious, it may be worked continuously. This seems to accord generally with the past practice. If the channel is closed for longer periods, it may be found difficult to irrigate all the area of the zone proposed; and to assume that the channel will be opened or closed for equal periods would seriously affect the area of the zone to be included, as the bothies can carry very little more than has been worked out for them, and unlike those under other channels have serious limitations. Owing to the comparatively larger discharges they have to carry and the great lengths they run (sometimes 8 or 9 miles), widening or deepening them in the low-water season would not be quite as practicable as elsewhere.

Area slightly underestimated than over-estimated.

The error if at all will be found to be on the side of underestimating the area allowable than overestimating it. Details of all these particulars will be found recorded in Pocket Book No. VII containing notes on the permanent zone and in VI so far as the G and V canal is concerned.

Discharge of field channels—How taken.

32. Discharges of bothies were in most cases calculated by actual observation with surface floats verified by working out sluice discharges by the usual formulæ. The surface width and depths of water in the field channels were taken and surface floats timed with a stop watch. The cross sectional area multiplied by 0·8 times the surface velocities in three compartments, the two sides and the centre, gave the discharge of the bothie. It is a noteworthy fact that, in spite of the very crude method of gauging, the bothie discharges worked out for all the Cellair sluices on the Chinakapavaram channel were in marked agreement with the sluice discharges individually and their sum total with the head sluice discharge on the whole. Gaugings of the Chinakapavaram channel also taken in this manner revealed strikingly small errors between discharges calculated by the usual formula and those obtained by gauging.

Administrative questions.

33. On an analysis of all the cases sent up for consideration by the Special Duty Collector they were found to fall under the following classes—vide my report No. 300 M/C/2-a, dated 11th October 1927, and Collector's R O.C.A/2/1767/A-2—27, dated 8th December 1927 and the same number dated 20th December 1927 and Superintending Engineer's No. 2931/E, dated 27th October 1927.

Classes of land included in permanent zone

(*a*) Lands which do not require any new irrigation facilities

(*b*) Lands which require only the provision of a new source to irrigate them or an increase of vent way of an existing irrigation sluice.

(*c*) Lands which require a new source and which need in addition a bothie to be excavated through Government poramboke or assessed waste land.

(*d*) Lands which require both a new source and a bothie in respect of which however the necessary land can be acquired by private negotiation or grant of exchange in Government waste lands.

(*e*) Lands which require a new source as well as a new bothie in patta land in respect of which the remedy suggested under (*d*) is not available.

(*f*) Lands for which water has to be taken through zamindari codus.

34. The policy adopted in regard to their inclusion in respect of the above is as follows:—

Policy adopted.

Lands falling under classes (*a*) and (*b*) were straightaway included. Those falling under (*c*) were also taken in, as no trouble was anticipated by the Special Deputy Collector in regard to the excavation of the bothies by the interested ryots. In regard to (*d*) and (*e*), all lands in respect of which the Deputy Collector stated that the interested ryots were willing to pay the cost of acquisition of land for the

bothies or were willing to relinquish land to enable bothies being excavated were included, in a few cases he had suggested exchanges in place of relinquished land, and these cases were also taken in as these were assessed waste lands in the blocks for whose benefit bothies were necessary.

Acquisition and excavation of bothies.

In regard to blocks containing Government waste lands, in respect of which Government had to provide facilities, the inevitable assumption has been made that Government will acquire land at their cost for bothies; in regard to the actual digging of the bothies, it is not anticipated that any difficulties will arise, as the disposal of the lands may be made conditional on proper bothies being excavated. It may, however, be necessary for a technical officer to verify if the bothies will serve the needs of the whole block as if they are made too small as the limited interests of the individual owners would tend to make them, it may prove impossible to bring the entire blocks under cultivation. It would further be necessary not to assign all the waste land; but leave such portions of it as may be required for field distributaries inside the block. For the success of the schemes, field to field flow should not be resorted to very extensively as it would tend to hamper the growth of irrigation.

Assignment of lands.

In the case of Government lands falling under the last class, I have included them in consultation with the Collector in all cases where the following principle is satisfied:—

"All lands both zamindari and Government waste which can be cultivated from the existing zamindari codus which do not need anything more than mere weed clearance may be included in the permanent zone."

Zamindari codus—Assumptions made.

This principle would seem to work smoothly in all the villages of the Babarzalli estate as between Government and zamindari ryots if (as suggested by the Special Duty Deputy Collector) in the case of Government lands where a new interest is created hereafter, the zamindari ryots are allowed to possess a share in it.

35. It will not be out of place to mention here that as the permanent zone lands were to be jointly fixed by both Revenue and Public Works Department officers and as the Government Memorandum No. 874-B-26-2, dated 30th April 1926, noted clearly the part of each officer, in practice, the selection of all lands for permanent zone having regard to their first-crop yields was left entirely in the hands of the Revenue Officer; the modifications by the Public Works Department were only so far as technical considerations rendered them necessary. Even in such cases the opinion of the Special Deputy Collector or the regular Revenue Divisional Officers was taken.

Function of the Revenue and Public Works Department

36. One other point, which it is necessary to note here, is that the lands included in the permanent zone are not necessarily the lowest in the submersible blocks. The sole and only criterion that has been applied is the first-crop yield in those particular blocks. For instance, by proper system of embankments and so on, many of the submersible lands are raising a good first crop and they have therefore not been included in the permanent zone by the Special Deputy Collector. Others, by virtue of their favourable location as regards sources, are able to transplant earlier and resist submersion later without losing their crop. In other cases, the area growing a poor crop forms so small a fraction of the entire block that it would not be justifiable to include the entire area in the permanent zone. It is because of the above conditions that apparent inconsistencies judged by levels will be occasionally noticed (for instance, in Venpa and Dharmavaram villages), and it is these, judged by the volume of representations received, that the ryots are quick to take hold of an excuse.

Criterion as regards inclusion in permanent zone—Some fallacies explained.

For the reasons noted above, it is no argument to say that, because the lands included in the permanent zone are higher or equal in level with the lands not taken into the permanent zone, the latter have been unjustly thrown out.

37. Notes on the permanent zone will be found recorded in Pocket Books VI and VII, the former containing notes on Gestanadi and Velpur canal alone. Relevant records will be found in files—Special Deputy Collector's reports—canalwar, and other details in Revenue Investigation files.

Notes—Where recorded.

Rotation Zone Work.

38. Paragraph 2 of the instructions issued to the special officers requires them "to suggest the most economical distribution of water for second crop for all lands not included under (i) and (ii)".

This zone was to be jointly decided by both the Special Deputy Collector and the Executive Engineer.

Joint responsibility.

I pointed out that as lands other than those falling under the other two zones were decided, there was no need to decide what lands should go into the rotation zone. It was therefore assumed that the intention of the rule was that the rotation programme should be the really joint affair and that consequently the programme ultimately adopted should not only satisfy technical considerations but should be in consonance with the wishes of the ryots as far as possible; and the Special Deputy Collector was taken to play his part in consulting the ryots and give the Executive Engineer the benefit of his views formed by local enquiry and past tradition in the matter.

Rotation programme.

39. The technical questions that came up are fairly simple in character.

The Superintending Engineer's letter already referred to suggested "as far as possible, particularly in the case of the short channels, it would be desirable to so adjust areas on the rotation basis so that the total ayacut under a channel if selected for second crop is permitted at one and the same year to raise second crop".

Suggestions as regards framing rotation programme.

This point was further raised in the Government Memorandum No. 814-B/26-2, dated 30th April 1926, Part III-2, of the office note accompanying it. My predecessor's report in paragraph 5-III of his letter No. 50-M, dated 14th July 1926, meets the arguments raised in both the letters.

40. The arguments for and against the opening of the channels as a whole are set down below:—

For opening channels fully instead of by reaches.

(1) The number of channels to be kept open are fewer in number.

(2) Theoretically, first-crop conditions are reproduced and consequently the element of uncommandability artificially introduced in long channels by opening them in separate reaches does not exist.

Conditions affecting rotation programme.

(3) Blocks are likely to be more concentrated though it is possible under the alternative system to make them nearly so, by framing a judicious programme of rotation.

The arguments against such opening are—

(1) The seasonal conditions in the second-crop season are entirely different in character to those in first crop. Thus, though a channel may work even very well for first crop, it does not fulfil the requirements in second crop.

(2) The critical period in first crop is the transplantation season, while that period in second-crop season is in the latter part of March and beginning of April, when the crop has attained nearly full growth and needs a lot of water for tillering and eating. The former is always marked by copious supplies in the river and heavy local rains, while the latter is as clearly marked by low supplies, dry and hot winds, and a total absence of rain.

In any first-crop season, the usual practice is for the low lands to be cultivated first and, as soon as their requirements are satisfied, the pipes are kept closed partly or opened to supply only high lands, so that supply becomes available for other lands at the end of the channel. Thereafter it is to the interest of the low lands to keep out water, while it is that of the high lands to take it, and hence a condition of equilibrium tends to be reached very soon in any first-crop season. In second-crop season, the interest of both high and low lands are the same, namely, to take as much water as is good for a bumper crop and consequently, once the water falls low, the situation gets rapidly worse. The piping and remodelling of the channels based on first-crop conditions is thus definitely in favour of the upper ryots in the second-crop season and the ryots in the lower reaches of the channel suffer under serious disadvantages. Further, there is the one compelling necessity to the ryot, viz., to save his crop at any cost and consequently, in a period of scarcity, the upper ryot will take all steps he can to save it. In the first crop, on the other hand, in an unfavourable season, the lower ryot has only to wait until transplantation in the upper reaches has had a start and once he gets water he is not faced with the possibility of it's ever again falling short.

Practice in first-crop season and how it differs from second-crop season.

Thus even under channels in the best of conditions, it is difficult to meet the more exacting needs of a second crop. It may well be imagined how much more difficult it will be to distribute supplies in a channel not in good order wherever so slight inequalities in distribution are greatly magnified under the second-crop conditions.

(3) The opening of the channels by reaches is in effect the reservation of the supply to the block intended to have it. Thus, if in a channel opened fully, the supply taken strictly in proportion is 50 cusecs at head and 25 cusecs below half the length of the channel, the actual discharge half way down the channel might more be probably in the neighbourhood of 15 than 25. But, if the channel is opened in two years, one year for the upper reach, and in the other for the lower reach, the supply will be 25 cusecs, and the inequalities of distribution existing in the upper reach will not markedly show themselves in the reduced discharges available for the ayacut below half way down the channel. That these inequalities do exist in the present condition of the channels in *the second-crop* season is clearly indicated in the unanimous opinion among the ryots in the delta that the channels should be opened by reaches; and an answer to that opinion has already been given by the concession made to it in the existing and very widely prevalent practice of opening the channels by reaches.

Reservation of supply.

Unanimous opinion of ryots.

(4) The practice of opening channels by reaches leaves less in the hands of the subordinates than one of opening of channels fully. Thus, internal turns are always necessary to enable the supply in a fully opened channel reach the tail end. The obvious troubles that this would give rise to, may be more easily imagined than described. With a channel opened in convenient reaches, all internal manipulation would be unnecessary and command difficulties can be solved by working the channel on external turns. The supply to the channel may be given at half the regulation duty for a week and the channel closed for a week. A modification of this practice might also be followed, as is now being done, of allowing a high and a low supply in the alternative periods, the high supply for command and the low for the low level lands.

Internal and external turns compared.

The adoption of these external turns forces the ryot to conserve the supplies on the field as low lands are not in a position to waste water which they could do to their favourable situation which the continuous flow system enables them to do.

Conservation of supply.

(5) As under long channels, covering 15 to 20 miles long, irrigation will be confined to a particular reach usually terminating in a dam, it will be easier for

Facility of control.

the Public Works Department Subdivisional Officer to keep a control over the supply and watch for its distribution in the channel better than he could when the entire lengths of the channels are opened.

Supply to dry crops.

(6) There are other crops, such as gingelly and long-standing gardens, under a very large number of channels in the delta. They have to be opened every 15 or 20 days to supply these crops and consequently, though the channel might remain closed for paddy, it will have to be opened for other crops. Hence the one outstanding advantage of keeping an entire channel closed is to a large extent non-existent in practice.

Discharging capacity of channels.

The discharging capacity of the channels is another very important factor. In a very large number of cases, entire ayacuts of channels cannot be supplied with water in one and the same year owing to the main canal supply levels falling too low.

(7) Thus it will be seen that the peculiar conditions prevailing in the delta make it desirable to open channels by reaches in many cases.

General principle.

41. As a general principle, however, the channels are opened only fully as far as possible. Thus, all pipe sluices and channels under 1,000 acres, not suffering under any peculiar disabilities, are opened fully in one year. In other cases, not more than two-year turns have been proposed, in order that it might be possible to carry out repairs in one year (closed year) out of three.

Two and three-year turns.

42. In a very few instances three-year turns are proposed. The two-year turns worked on them have already been altered in practice to three years and it is only the practice in those cases that has been recognized in the new turns. The turns themselves have been modified where considered desirable in the light of technical considerations. The turns are almost always stopped at a dam, though, for sake of regular boundaries, it has been found necessary to slightly deviate from that principle. The discharging capacities of the sluices have also been taken into consideration in fixing the turns.

Rotation programme as applied to permanent zone lands.

43. The only other cases are those where the rotation programme has been particularly modified to suit the needs of the permanent zone now formed. It is believed that the turns as framed will ensure the most favourable conditions for supply to permanent zone lands; but as to whether it would meet all their requirements, only experience can show. If at all, troubles may arise in the case of zone under Rapaka channel and under V. West side channel in Veeravasaram village and under Azzamur channel in Doddanapudi village. I consider that supply to these zones can be easily arranged by arranging turns between permanent zone lands and the rotation zone lands. To enable equitable distribution being made in particular turns, it might be necessary to provide cross bunds with pipes of suitable calibre or wooden notches where turns have not been terminated at the dams, but these can be easily provided where necessary and will most probably be required only once in three years. Thus, in the case of Rapaka channel when the middle reach gets a turn, it may be necessary to put in a cross bund with a pipe to divide the supplies proportionately between the permanent zone lands of Tillapudi and permanent and rotation zone lands under Chikkala No. 2 branch.

Temporary expedients in second-crop season necessary.

Again, a wooden notch or a 2 feet diameter pipe may be necessary in a cross bund, when Machapuri permanent and rotation zone lands have to be supplied with rotation zone lands above Veeravasaram-Bhimavaram road. A notch might again be necessary to supply permanent zone when Kalla and Kuppampudi and Akeed lands get a turn on Azzamur channel. Further, in any particular case it would always be possible to give the permanent zone lands a separate turn by keeping the channel open to supply only those lands

during the non-turn period for the channel. But in all cases, with judicious and well-considered arrangements for distribution, no difficulties should be encountered. If however difficulties should prove insuperable and experience should show, that supply to them cannot be conveniently diverted, they may be given second crop twice every three years; the closed year being the turn for the reach with which it is most difficult to combine them.

Conditions of sale of Government waste lands.

The sale of Government waste lands in all these blocks as also elsewhere should reserve for Government a right to change their classification from the permanent to the rotation zone, at their convenience.

Dalwa Inams.

44. There are a class of lands called Dalwa inams in the Baharzalli estate to which reference is made in paragraph 5 of the instructions, comprising portions of the Bhimavaram and Tadepalligudem taluks. The total extent of these inams is 519·16 acres lying scattered in four villages of the Bhimavaram taluk and eight villages of the Tadepalligudem taluk. Of these all excepting 3·43 acres of Thokalapalli and 13·73 acres of Devaragopavaram are irrigated by the Chinakapavaram channal and are included in the permanent zone proposed.

Total extent of Dalwa inams

A few of the more important features of these Dalwa inams might perhaps be noted here. Fuller details are given in the Special Deputy Collector's report to the Collector, No. 173/27, dated 22nd August 1927.

How enjoyed.

These inams are unlocalized and comparatively few inamdars enjoy the right of free irrigation on their own holdings. Their extent in fact covers only 197·23 acres and the rest 321·93 acres is either enjoyed by leasing out or not enjoyed at all. Localization of these inams is complicated by the fact that such a course is open to objection by the zamindars who stand to lose their rent by localization of these lands on ryotwari lands. The Dalwa inams pay quit-rent to the Government and the inamdars would naturally refuse to pay rent to zamindar in addition. It is open to localize them on Government waste land but Government in that case have to give away nearly 500 acres of their land free of cost, acquisition of these is another solution. There have been sales of this abstract right from Rs. 25 per acre to Rs. 50 per acre. This would be a costly affair. A more suitable arrangement would be to transfer these rights to first-crop fields, but this is bound up with the question of the localization of first crop.

Difficulties of localisation.

Remedies—Acquisition or transfer.

For the present however, no acquisition of the rights would be necessary as the bulk of the area lying under Chinakapavaram channel, has been included in the permanent zone and proposals have been formulated to supply water to them annually. But in regard to the area under Ellore Canal which is classed under a special rotational zone getting water once every two years, with a complete closure of the canal once in five years it may be necessary to allow two and a half times the extents of Dalwa inams free irrigation in the year they are opened for second crop or arrange for the transfer of those rights to other Government lands included in the permanent zone in Siddhapuram village. In the event of this not being found possible, it may be necessary to acquire the rights in respect of 3·43 + 13·73 = 17·16 acres in Thokalapalli and Devaragopavaram villages. Negotiations in this case are already in progress through the Collector—vide Collector's R.O.C. No. 82/1767–26, dated 24th January 1928. Detailed lists of Dalwa inams have already been sent to the Collector and a classified abstract of them is enclosed for ready reference.

Acquisition unnecessary except under Ellore Canal

Appendix III.

Garden Crops.

45. As per paragraph 8 of the instructions, a notification was issued in

Notification.

the District Gazette by the Collector, West Godavari, in his notification, dated 20th January 1927, copy of this is attached to this report.

Appendix IV.

Lists have also been prepared by the Special Deputy Collector of the different kinds of permanent gardens to which water should be supplied by the Public Works Department at convenient intervals in the second crop season, and they have been sent up for publication.

Lists.

The areas of permanent gardens are as follows :—

Areas.

	Acs.
Narasapur taluk	1,661·01
Tanuku taluk...	1,287·17
Bhimavaram taluk	139·96
Nidadavole taluk	53·41
Tadepalligudem taluk	8·61
Ellore taluk	4·04
Total for the Godavari Western delta,	3,154·20

Second-crop allotments for the various canals and the Ellore Canal.

46. The instructions as regards the allotments to various canals, as the rules stand, are as follows :—

For every canal, the excluded and the permanent zones should be formed ; and what is left should be formed into a triennial rotation zone. The only point of importance in this regard that needs to be mentioned is the following :—

How future allotments affect exclusion work.

The excluded zone has been worked out on the water levels based on the past allotments for the various canals and if the future allotment for the same canals be very different from the past allotments, a different set of water levels might actually obtain in the future, with the result that some of the area actually treated as commandable might actually not be commanded or the excluded area might be well commanded under the higher water levels on other canals.

Comparison of past and future allotments.

So long as the discrepancy is not very great, the differences can be easily made up by a well arranged system of regulation. I reported in No. 215-M., dated 26th October 1926, that a difference of 15 per cent either way would not call for a revision of exclusion work based on past water levels. The proportionate allotments of the various canals reckoning on the figures for 1335 are as follows :—

	Acs.
Venkayya and Weyyeru Canal	22,340
Undi Canal	24,760
Gostanadi and Velpur Canal	17,840
Bank Canal	11,564
Attili Canal	9,821
Narasapur Canal	28,640

The actual figures for these canals are as follows :—

		Deficit or increase per cent.
Venkayya and Weyyeru Canal	19,645	— 12
Undi Canal	20,926	— 12
Gostanadi and Velpur Canal	23,783	+ 32
Bank Canal	10,500	— 9
	(approximately)	
Narasapur Canal	27,572	— 4
Attili Canal	11,709	+ 27

Reckoning on 1334 figures when Ellore Canal was closed, on the Attili Canal, we find a small deficit instead of an increase, while in the Gostanadi and Velpur Canal, the percentage of increase is only 18. In Venkayya and Weyyeru Canal, the deficit increases to 15 per cent, while in the case of Undi Canal, it disappears altogether. Thus it will be seen in nearly all canals, the increase or decrease is

hardly more than 15 per cent, except in the case of Gostanadi and Velpur Canal where the substantial addition is due to the two projects proposed under it. Hence the variations in water levels are not likely to be great on any canal. Even on Venkayya and Weyyeru Canal, where the fall in ayacut is greatest, water levels will not be affected, as the surface fall in this canal is very very flat, 0·2 per mile for the greater portion of the first reach, and 0·08 per mile in the second reach. In the Gostanadi and Velpur Canal where water levels will be obviously higher than in the past, exclusion work based on the Main Canal water levels have been revised so as to give the benefit of the revision to certain high lands close to the Main Canal which were not easily commandable under the old water levels, e.g., Palavoder, Juttiga and Mogallu lands. These do not affect the water levels in the channels and hence the exclusion done inside the channels are unaffected

Revision of exclusion work unnecessary except in few cases

It will thus be seen that triennial rotation would work suitably in all canals. For obvious reasons, Ellore Canal, Kukarapparru Canal, Main and Junction canals are not taken into account as the levels in them will be unaffected by the allotments to those canals.

Ellore Canal.

47. The past allotment to this canal was about 9,000 acres and the proportionate allotment in the new proposals works out to 7,360 acres. But the actual cultivation in this canal has been very discouraging and is to a large extent due to the inadequate supply drawn through it. Having regard to these features the second-crop ayacut of the canal has been fixed at 5,300 acres—vide my report No. 451-Spl., dated 1st January 1928 and Superintending Engineer's No. 3770-E., dated 3rd January 1928.

Past and proposed allotment.

48. For the purposes of this investigation, the Ellore Canal is taken to begin from below the head of the Junction Canal, as suggested by my predecessor, and the canal up to that point treated as Main Canal. The reason for doing so, is that there is a tricanal rotation zone in the canal between Junction Canal and the Kukarapparru Canal heads, while under the Ellore Canal proper, there will be only the special rotation zone. Further, the canal below Junction Canal head will be fully closed once in five years for thorough silt clearance, vide my predecessor's No. 50-M., dated 14th July 1926, paragraph 5 (iv). This canal was actually closed for clearance in the years 1921 and 1925, below head of Junction Canal.

What is treated as Ellore Canal.

49. Inside the Colleir submersible area, the order of choice has been fixed as follows with the approval of the Collector, subject to limitations as regards existing irrigation facilities :—

Selection of lands and classification.

(1) Registered wet lands.
(2) Registered dry lands.
(3) Assessed wastes.

The area was fully investigated by the Special Deputy Collector in the same manner as permanent zone under other canals and consequently great care has been taken not to include lands which in similar circumstances would not have been included in the permanent zone elsewhere. The occupied dry lands in the Colleir submersible area under this canal were preferred to Government waste lands for the following reasons :—

(1) Dry lands were unfit for any dry crop and the owners would relinquish the lands if no second crop is allowed to be raised on them.

Preference given to dry lands over assessed waste.

(2) They were already paying taxes to Government and getting no return on them.

(8) The Government waste lands were not so valuable under this canal, as they would get water only twice in five years and the canal being fully closed every five years.

My report and the Collector's orders on the subject will be found in 151-Spl./C.2-8, dated 1st January 1928 and R.O.C. A-2-1757/27, dated 6th January 1928, respectively.

Biennial rotation—Reasons for adoption.

50. It came out as a result of the investigations that an area of nearly 11,000 acres was available for inclusion in the permanent zone, as against 5,300 acres, allotted for the canal. Thus, although all these lands are unfit for first crop, it has been found impossible to supply all of them every year and hence in the final proposals, the area has been proposed to be opened once in two years in equal extents of 5,340 acres, *as had already been anticipated and provided for in the instructions issued to the Special officers.*

Some lands adversely affected.

51. It is well to note here that as a result of the above distribution, some of the lands that were hitherto receiving water almost every year, will in future get it only once in two years. On the other hand, lands that hitherto were not supplied with water, will have an equal chance with those that got them annually in the past. In fact, during the whole course of the Revenue investigation into the lands fit for second crop under this canal by reason of heavy Collair submersion, no distinction has been made between lands which were hitherto irrigated and those which were not. The only criterion has been as to whether particular lands proposed for inclusion are really unable to grow a first wet crop by reason of submersion a principle which has been applied to the permanent zone lands under other canals. Thus, there are cases of lands chiefly under No. 1 escape channel of this canal which get a biennial rotation in the new scheme as against an almost annual rotation in the past. No special treatment has been proposed for them as under instructions issued to Special Officers, no permanent zone is contemplated under the canal, and it is not yet obvious from the Revenue reports that these lands should be singled out for special treatment. The matter is under consideration of the Collector.

All lands outside Collair excluded.

52. As there were more than 11,000 acres of area in the submersible Collair zone, it was out of the question to give any wet land outside it the benefit of any rotation. Further it is only fair that those that get a good first crop should stand out of the way of other lands wet and dry not growing any crop whatever.

In these circumstances, the entire wet ayacut under the Ellore Canal (outside the Collair submersible area) has been permanently excluded from the second crop ayacut.

Some deserving lands not included due to supply difficulties.

53. The only other point that needs to be mentioned in this connexion is the existence of other lands wet and dry submerged by the Collair, which though they have every claim for inclusion in the rotational zone have not been included in the ayacut taken up in the Ellore Canal. Thus the lands of Bosapad, Kovvali and other villages at the very tail end of the Ellore Canal are badly affected by submersion and many of them recently included in the first crop ayacut. But their location is such that there is no possibility of including them in the second crop ayacut, as the Ellore Canal below Agnallanka channel head sluice silts up so heavily that it is impossible to force any appreciable quantity of water below it in the second crop season. Their only hope of salvation lies in the development of their first crop resources, and their raising a second crop seems only a vague possibility, when the West Tammilaru Reservoir scheme materializes.

Deviations from the Triennial rotation programme.

54. The instructions to the Special Officers contemplate only the formation of two kinds of rotation zones; the Triennial rotation zone under all canals except Ellore Canal, and the Special rotation zone under the Ellore Canal. This general

scheme has been followed in the case of all canals and found to be workable. The following deviations were however found necessary. A four-year rotation scheme for Mid-Level channel was necessary, as it was found that, owing to the very great length of the channel and the limitation as regards the total cultivable area under the Junction Canal, it was undesirable to divide the channel into three reaches. Again in the case of Singavaram Ava channel, a five-year rotation programme was arranged, as there is a permanent zone under the channel whose discharging capacity was barely sufficient to feed the permanent zone and a fifth of the rotation zone. A biennial rotation was also proposed for two blocks on low level channel, and one on Venkayya and Wayyeru Canal as it was not possible to supply the lands annually and the ryots do not want it though there is a case for including them under the permanent zone. The Dharmavaram and Kottada lands proposed to be included under the permanent zone cannot be supplied annually, without exceeding the carrying capacity of the old Weyyeru Canal. They are therefore permitted second crop in two years out of three, i.e., in the years in which the rotation zone in the Siddapuram village is not opened. These deviations have been reported in my No. 566-M.C./2-A., dated 12th November 1927 and approved in No. 1543-M., dated 13th December 1927.

Four-year and five-year rotation programmes.

Biennial rotation—Junction Canal.

Discussion about the second crop ayacut for the delta and a comparison of the new proposals with the existing arrangements.

55. The second crop allotment for the delta is for some years now at 160,000; but the actual cultivated area as per statements accompanying the instructions is only 124,600 acres. Thus in the past there has been considerable deficit between the area cultivated and the area open. The question as to how far the actual cultivation in future will fall short of the area opened has therefore to be considered.

Past and future second crop ayacuts.

On going into this in detail, it was found that the deficits were mostly under canals, where large areas were excluded. It was also found that the excluded area amounted to 60,000 acres in all canals omitting Eluru Canal and as this area was getting second crop on an average once in two and a half years in the past, and as it was difficult to irrigate, it should have contributed to the large deficit in the past and might well account for as much as 25,000 acres of the area left uncultivated.

Deficit in cultivation.

In the past, a small percentage of deficit must have been also due to the neglect of the ryots and their unwillingness to exhaust the fertility of the soil; but under the new scheme of second crop, this would not exist as the ryot will if he foregoes his one chance in three years, have to go without second crop for five years on end, instead of three years under the past scheme of biennial rotation. In the Junction Canal, under some channels, he will have to wait for nearly seven years to get another turn for his land.

New scheme will lead to intensive cultivation.

Further, the need for asking and getting open a larger area to induce the Public Works Department to issue proportionately larger quantity of water, to cultivate a smaller area with greater certainty, will not exist in future as in the past. The ryots will be quick to realize that, with the lower ayacut figure and a better system of distribution, second crop cultivation would not prove to be the sort of gamble that it was in the past, and if any doubt should linger in his mind the performance of the Public Works Department in the first few years that the scheme is in operation, will make it clear to him, that he can as successfully grow a second crop as he is now doing the first.

Other favourable factors.

In view of the above circumstances, and the enquiries made by the Special Deputy Collector in the villages, as to the probable area that will be left waste by ryots, it has been decided to make an allowance of 5 per cent over the ayacut

Special Duty Deputy Collector's enquiries

Five per cent allowance.

figure of 124,600 fixed as the second crop paddy ayacut for the delta. My reports and the Collector's replies on the matter will be found in Nos. 360-M., dated 12th November 1927 and 366-M., dated 5th January 1928 and Collector's No. K.C.A.-2-1767/26, dated 9th January 1928.

Thus the second crop ayacut in respect of paddy will be 130,800 acres or 131,000 acres in round figures.

Unlocalized permanent zone lands in Dharmavaram village and under Singavaram Ava channel.

Dharmavaram.

56. A programme opening 300 acres twice in three years has been framed in respect of Dharmavaram village. As the actual cultivation is in patches, if all the survey numbers are included in the zone, there is the risk of a large percentage of the area opened, not being cultivated. The Special Deputy Collector has therefore proposed that an area of 300 acres might be fixed and irrigation permitted in the blocks amounting to 472 acres specified by him.

After the irrigation has settled in the village, it might be possible to localize the extent on the exact survey numbers that grow second crop in practice.

Singavaram Ava lands.

In regard to the Singavaram Ava channel, the Special Deputy Collector has proposed a second crop zone of 802·03 acres. The channel cannot carry water for more than 400 acres of permanent zone, as there is a rotation zone also under it. It is however understood that the supply to Ava lands gets supplemented in normal years by the Yerracalva water.

The suggestion made by the Special Deputy Collector to restrict the permanent zone under Singavaram Ava channel to 400 acres and leave it unlocalized, has therefore been accepted. As the channel cannot draw more water than is required for 400 acres of permanent zone, there is no harm in allowing a larger area to be cultivated if it can be done with Yerracalva water.

Difficulties of localization.

The zone consists of 358·38 acres of wet land and 443·70 acres of dry land. One difficulty in the way of localization is that the zone has to be localized only on wet lands, as most of them do not grow first crop, while it is precisely those lands that are favourably situated as regards supply facilities from Yarracalva.

If any troubles should arise, the zone will have to be localized on wet lands, though they do not form a compact block and they are indeed more difficult to supply than dry lands lying higher up on the channel and close to the pipes feeding them.

Waste lands included in the permanent zone.

Acquisitions necessary.

57. Proposals for acquisition have been made in many cases to enable the blocks being brought under cultivation. To enable the irrigation of these lands to come about as quickly as possible, I consider that the following steps should be taken:—

Steps to be taken.

(1) Land required for bothies should be acquired immediately the proposals are approved.

(2) Where the blocks are big and not subdivided, they should be surveyed into smaller plots, with puntas created in them of 15 to 20 links width at intervals of not more than one furlong for field bothies inside the block.

(3) Temporary sources should be given on the channels feeding the blocks. In case of occupied waste lands, it is very desirable to see that all bothies are properly excavated and inspected by the Public Works Department Officers before the sources are provided; else there would be no co-operation among ryots, and extension of irrigation will not come about quickly.

In case of Government waste lands, bothies should be excavated as completely as possible before the sources are provided.

Government waste lands. Conditions as regards assignment or sale.

58. The conditions of sale or assignment inter alia should comprise the following:—

Conditions of sale—To include.

(1) That Government do not guarantee water for second crop.

(2) That Government reserve the right to transfer the land from the regular or permanent zone to the rotation zone at their convenience.

(3) That Government reserve the right to penalise a block by suspension of second crop if such a step is called for in their view, and that they reserve the right to close down a particular channel or source at their convenience at any time, without giving rise to a claim for compensation.

Government will stand to gain considerably if they lease out the blocks for second crop for five years, till cultivation has settled down, and then sell them outright. As to how far this would be practicable, it is for the Revenue Officers to decide.

Lands in Collair.

As already noted, great care should be exercised in assigning or selling away waste blocks inside the Collair. It is absolutely essential for their successful irrigation that an entirely new interest should not be created in those lands.

Conditions as regards occupied lands—Five years' limit suggested.

As regards occupied lands, it may be made a general condition that lands not brought under cultivation within five years that the new scheme has been at work, are liable to be removed from the permanent zone. Unless this is made clear, some of the owners may be very slow about bringing the new lands under the plough.

Prompt measures necessary.

As nearly 10,000 acres of land in the permanent zone lie outside first crop ayacut, it is obvious that unless very prompt measures are taken to bring these lands under cultivation, there is likely to be great disparity between the areas opened for second crop and the areas actually cultivated.

Ryots' Conferences—Opportunities for taking ryots' views on the new proposals.

59. Ryots' conferences were held in all the taluk headquarters in connexion with the rotation programme. One such conference relating to Kakaraparru canal was held by the Special Deputy Collector before his term expired. Those relating to the other canals were held on 4th and 5th January 1928 at Bhimavaram, 6th at Narasapur, 12th at Nidadavole, 17th at Tanuku, 20th at Tadepalligudem and 31st at Ellore.

Dates and places of conferences.

The rotation programme was published in the villages along with the conference dates and such suggestions as were made and allowed by me and the respective Revenue Divisional Officers who sat jointly at these conferences have been incorporated into the final programme as far as possible; in a few cases, it has not been found possible to give effect to them and my remarks against these cases will be found in the file conferences-rotation programme. Most of the objections at these conferences resolved themselves either into requests for the substitution of a biennial to a triennial scheme of rotation or substitution of an annual turn to the biennial one for some lands under Ellore canal. The demand for a triennial rotation was most in the case of the tail ends of Gostanadi and Velpur, Venkayya and Weyyeru, and Narasapur canals and in the case of Ellore canal under No. 1 Escape.

Objections allowed incorporated in the programme.

Objections not allowed.

As under instructions, programmes had been framed with a triennial rotation for the other canals and a biennial one for Ellore canal (see remarks under

Ellore canal) it was impossible to allow any of these requests. Further it was considered advisable to utilize the surplus water to develop projects, instead of trying to create invidious distinctions in the delta by the formation of biennial rotation lands or what may be properly regarded as favoured lands.

Excluded zone—No opportunity given for expression of ryots' views.

60. In regard to the excluded zone no objections were invited or heard. It is obvious that there cannot but be objection to the permanent exclusion of even so small an area from second crop. It is because of this, that the rules provided for no occasion to the ryots to urge their objections in regard to exclusion work and it was ordered to base entirely on merits of the cases as investigated by me. This part of the work has been done as carefully as is possible in view of the very large area covered, and to avoid numerous and possibly legitimate complaints, I have freely consulted the local officers, and has also inspected very many cases on ground to check levels, and see the excluded lands, and boundaries. There must still be, as there is always bound to be, an error here or an error there, which might need rectification. But this should indeed be very very small compared with the volume of work turned out. More so, as the Revenue Inspectors and Karnams who prepared exclusion lists, were told to give out the areas excluded in the villages, so that if any cases of genuine complaints came to my notice I might rectify them.

Permanent zone—Ryots consulted by Special Deputy Collector.

61. In regard to the lands taken into the permanent zone, the ryots were more freely consulted by the Special Deputy Collector, as his work progressed, and the final recommendations made by him represent not only what is best taken in on other considerations, but also what should satisfy the reasonable views of the local ryots.

Subdivision Sketches.

New subdivisions required.

62. Where the boundaries fixed for the excluded and permanent or rotation zone run through middle of the fields, new subdivisions were found necessary. Sketches for these new subdivisions prepared, should be sent to the Revenue Divisional Officers for effecting the necessary subdivisions on ground.

Rules for the irrigation of dry lands.

Crops affected.

63. In compliance with paragraph 9 of instructions, an enquiry was undertaken with a view to frame rules for the irrigation of what are somewhat promiscuously termed dry and garden crops. The term dry and garden crops is found to include quite a large number of crops and in this generic term, everything that is not paddy, is now classed. The real garden crops are only trees of the lime and orange families, betels, sugarcane and plantains. These crops have already been referred to in paragraph 45 and consequently the investigation under this head covers only crops other than those mentioned above.

Provision made in ayacut.

The average cultivation in the delta of the above crops (vide column 5 of the statement accompanying the instructions issued) is seen to be 22,500 acres, and as the ayacut figure provides for the irrigation of these crops, these crops have to be supplied with water in the second crop season.

Difficulties of the Public Works Department.

The chief difficulties attendant on the supply of water to these crops are that it is not known at the beginning of any season where the dry crops will be raised and what quantity of water should be sent down individual channels. It is further an area, shifting from year to year, variable between very wide limits, depending on seasonal conditions and the scheme of dalwa rotation. It is not also so intensively cultivated as dalwa, as the gingelly and chillies, the chief crops, can only be grown on good and fertile lands, and even then under certain limitations.

My informal enquiries among the ryots show that the ryots are not for any fixed scheme of rotation for dry crops; one of the reasons urged is that the rotation scheme applied to large blocks will not work as dry crops will not be raised over large areas as wet crop, and consequently much of the area thrown open for dry crops in any one year, may not grow them at all. It is a debatable point how far this localization would prove a success (the measure of success would probably be in the inverse ratio to the size of blocks), but until and unless we know, as we do in the case of dalwa paddy, that the dry crop cultivation would be as extensive as the latter it would be premature to devise any scheme of rotation for it; and even if we do, the one object, namely, that it would enable us to know beforehand what area will be cultivated with dry crops and arrange for water-supply accordingly, will not be gained. There is the great danger, on the other hand, of killing the irrigation of the dry crops by the imposition of what appears to mean unduly severe restriction in the present circumstances, when no serious difficulty has been felt in the past in supplying them.

Rotation programme not applicable to dry crops.

While therefore, it is inadvisable to apply the rotation scheme to dry crops in the present stage of their development, there is no harm in restricting the growth of such irrigation to such areas only, as have hitherto utilized the concession of growing the dry crops unrestrictedly. Statistics have therefore been collected giving the areas cultivated under various channels in the delta for the two faslis 1335, 1336, appended to this report and these have been freely used in the preparation of schedules I and II attached to the draft rules.

Restrictions necessary.

Appendix VI.

With these statistics on hand a conference was arranged at which the Executive Engineer, Godavari Western division, myself, all the Public Works Department Subdivisional Officers and Subordinates and the Revenue Divisional Officer or (the Special Deputy Collector) were present, where the draft rules framed by me were discussed.

Conference.

The objects underlying the draft rules are (1) to cut off water to small areas of dry crop which were hitherto being supplied, with water, as it would not in future conduce to economy to do so, (2) to impose restrictions on the cultivation of the dry crops in the upper reaches of channels opened for dalwa in the lower reaches, where such cultivation badly competes with second crop paddy for water, resulting in heavy losses to the paddy crop and (3) to fix a date beyond which water cannot be supplied to dry crops, having regard to the conditions of water-supply and to the minimum requirements for the successful irrigation of the dry and paddy crops.

Draft rules.

As a result of a full and complete discussion of all the issues involved, the rules and the schedules pertaining thereto and enclosed to this report have been framed.

Appendix VII.

The one important point that deserves mention here is that the particulars given in Schedules I and II are subject to alteration, and this is specially done to enable new channels being permitted to raise dry crops at the discretion of the Executive Engineer, should there be an organized demand from the ayacutdars, stipulating to grow a minimum area of say 50 or 100 acres of dry crops under one or other of the closed channels. A statement of objects and reasons are also appended to these rules.

Schedules I and II.

Appendices IX and X.

Appendix VIII.

I wish to point out that as the rules have been framed carefully to achieve a definite purpose, any alteration made to them should be done only after consulting the present Revenue Divisional Officer, Nidadavole and the Executive Engineer, Godavari Western division, who are aware of the full details and would be able to comment on any changes that may be considered necessary.

Alterations to be made.

Statistics—As affecting water regulation.

It is obvious that the statistics furnished would enable a better method of distribution of water-supply to dry crops in future, as their distribution in the past shown in the statements, would be useful guide for water regulation in the future. For the same reason, it is desirable that similar statistics for the next six or seven years are also collected. It may then be possible to develop more effective and systematic methods of control, and perhaps also introduce a scheme of rotation for dry crops, when things settle down.

No necessity to amend rules relating to distribution of water in second crop season.

It was also considered at this conference mentioned above whether any alteration is necessary to the existing rules of regulation in the second crop season, printed on page 28, G.O No. 18 I., dated 10th January 1920, and it was decided that no change is necessary as the rules applied to the three deltas, and were sufficiently elastic so as not to conflict with any of the decisions reached in the present localization, and chiefly related to the distribution of water-supply. If at all, rule 2 or rule 3 (1) may require slight modifications to suit the new conditions created by the localization so far as the western delta is concerned.

Preparation of Registers.

64. The arrangement of the details in regard to the exclusion, rotation zone, and permanent zone is as follows:—

Detailed lists of survey numbers and descriptive lists.

The excluded zone is written up villagewar in five volumes, and duplicate copies of them in four volumes have also been prepared. Description of excluded area channalwar are also written up in the same registers, so that in case of doubt, the lists would show clearly what the block excluded is.

Checking.

The registers and all the details given in them prepared by the Special Revenue Subordinate staff from villagewar accounts have been checked with the descriptive lists by the Special Overseers. The originals prepared are also kept separate and are in loose sheets all stitched together.

Details.

The principle observed here is to enter all survey numbers including puntas in the excluded block, but note the wet extent only against the survey numbers which were wet. In other cases, no area is noted in the area column, but the areas are sometimes given in the remarks column, and in other cases omitted. Included lands which did not pay up inclusion fees have all been treated as dry.

Baharzalli estate—Mamul wet unlocalized.

In the Baharzalli estate and other estate villages where mamul wet was not localized, whatever is usually cultivated first crop has been taken as wet and rest as dry and in consequence of this and the omission of lands which did not pay inclusion fees, the figures given are likely to differ from those in divisional ayacut registers. As the object of the second crop localization is to strictly define blocks and numbers, and not leave them undefined as in the case of first crop, which simply allowed a lump figure of 34,000 for Baharzalli estate and another for the other estate villages, it became necessary to deviate from the first crop proposals, so far as these cases were concerned.

Permanent zone register.

The permanent zone lands have all been entered in one register—also prepared by the Special Revenue staff. The extents were in most cases taken from the Special Deputy Collector's reports and in others from the Revenue Investigation files.

Sources for permanent zone lands.

Sources have also been noted for all the lands and new sources also indicated. The one feature that deserves to be mentioned here is the fact, that in a few cases, the sources proposed for second crop are different from the first crop sources, and these have been specially made so, on the recommendation of the Special Deputy Collector to avoid percolation troubles. If in any case, doubt should arise, no

corrections should be made until after the second crop zone pocket book Nos. VII and VI, and the Special Deputy Collector's reports have been perused. Mistakes, if any, should be also corrected after such verification.

Rotation zone registers.

65. In the rules as originally framed, the Special Deputy Collector was to prepare detailed registers of survey numbers of all lands included in the rotation zone. When the Special Deputy Collector was removed in August 1927, I pointed out that the preparation of these lists would take an enormous amount of time and labour and would not serve any useful purpose, when actually the whole thing was done. On this Government were pleased to order in G.O. Mis. No. 2003, dated 11th October 1927, that for the rotation zone lands, detailed lists might be dispensed with, and that it was sufficient to define the outer limits or village boundaries up to which irrigation may be carried on each year in one set of lists, and the pipe sluices to be opened in each channel each year in another set of lists.

Original instructions amended.

In accordance with the above instructions villagewar and pipewar lists have been prepared and will be found in two bound volumes. A third volume contains what may be termed linking lists, as the two mentioned in themselves will not be readily intelligible to the Public Works Department officers. It is from these lists only that the two lists required by the Government Order have been prepared.

Three lists.

The original villagewar lists in loose sheets have been prepared and the areas all worked by the Special Revenue staff. The instructions to them were, that the total rotation area given for a particular village plus the excluded area should be equivalent to the wet ayacut in the village as per Revenue accounts. As this test has been applied all along, errors are unlikely.

The channelwar ayacuts in the case of Attili, Undi, Venkayya and Weyyeru canals have been worked from the areas furnished by the Special Revenue Inspectors and not from Divisional ayacut registers and the Revenue Inspector's lists have both been used. In all canals the lists do not include areas that did not pay up inclusion fees.

Ayacut figures.

Permanent zone lands within first crop ayacut are also included in the village and channelwar totals, but to enable the areas open in three years coming out equal, adjustments have been made taking the actual rotation zone areas in each rotation year into account.

Permanent zone lands included in canal ayacut.

It is to be noted that the boundaries given in the registers are inclusive of excluded areas in most cases. It is impracticable to define them in any other manner and consequently the fact, that the larger boundaries described cover also excluded zone areas, conveys no permission to raise dalwa paddy on them. The excluded zones and the boundaries are to be taken together, to determine what area is given permission to raise dalwa in any year.

Boundaries inclusive of excluded areas.

Final figures of excluded permanent and rotation zones.

66. The area of excluded zone is shown in the statement attached. The total figures for the whole delta omitting the cents is 114,178 acres. The distribution of this area over the various canals and their percentages on the first crop areas is also given in the statement. In this, some remarks on the percentages obtained may be added. The percentage of exclusion under Ellore canal is 97 per cent, and this means that but for a small area submerged by the Colleru the whole canal ayacut is excluded. This has been referred to already. In regard to Main and Junction canals, the percentages (average 20 per cent), indicate that the areas at the head of the delta are comparatively difficult to supply. The Bank and Attili canals are generally known as high level canals and

Excluded zone area.

Appendix V-a.

Percentages of excluded area to first crop ayacut.

consequently the percentage (average 14 per cent) in them is necessarily higher than in the others. Though Kukaraparru canal is nearly in the same category, it has no appreciable ayacut till near its end, where nearly all land is well commanded. Hence the lower percentage (9 per cent) in its case. The percentages on Narasapur and Gostanadi and Velpur canals are 6 per cent and Undi canal 8 per cent. These percentages are very reasonable, considering that they are all generally treated as low level canals. Of the three, Undi canal first reach lands are somewhat more difficult to supply. Hence the slightly higher percentage.

Distribution on various canals—Comments on.

The very high percentages 48 per cent for Vankayya and Weyyeru and 77 per cent for old Weyyeru are due to the existence in those canals of what may be termed first and second crop zones. Usually with but rare exceptions, lands in the first crop zone are not cultivated at all in the second crop season; further they are not also easily supplied. To attempt to supply them will only lead to wastage of water, as they will not be cultivated intensively if their past history is to be believed. Consequently not only lands difficult to supply but those which did not in practice raise any dalwa except in small patches in previous years, have been excluded, under those canals.

Venkayya and Weyyeru canals—Explanation for high percentages.

One other fact that may be mentioned is that the permanent zone (second crop zone) is largest under these two canals, viz., 8,280 for Vankayya and Weyyeru canals and 3/34 for old Weyyeru, and these form about 35 and 65 per cent respectively of the excluded areas; and as (as pointed out in some of the Revenue reports) in many villages, the ryots own lands both in the permanent zone and in the first crop zone, they leave waste lands first crop zone and cultivate the more valuable and easily commandable second crop zone lands. It is because of above reasons, that the incidence of exclusion on these canals is so very high. It may not be out of place to draw attention to the fact that this position strongly supports the argument in favour of the 5 per cent allowance for the deficit in actual cultivation urged elsewhere.

Exclusion supports allowance made.

Permanent zone.

The area included in the permanent zone for the whole delta is 23,991 acres, or 24,000 acres in round figures, consisting of 15,475 acres of wet lands, 4,214 acres classed dry and 4,302 acres assessed waste. The first figure includes all surveyed area in Baharzalli estate taken into the permanent zone. The two latter figures include also unsurveyed areas taken into the permanent zone. It will thus be seen that nearly 4,300 acres of Government land have been taken into the permanent zone. Thus, even at a modest estimate, Government stand to gain nearly Rupees 2,00,000 by the operations of the special duty.

Distribution of permanent zone.

Appendix V-b

Extent of Government land included.

Rotation zone.

The figures of rotation zone for the various canals, based on a system of averages of canal and villagewar totals is shown in statement III.

Appendix V-a.

The total rotation zone area for the whole delta which will be opened for second crop every year is 101,507. This together with the permanent zone of 23,991, makes up 125,498 or 125,500 in round figures.

Area opened for second crop every year.

The area fixed for the whole delta after making the 5 per cent allowance is 131,000 acres, and there is thus 5,500 acres, not filled in.

It has been noted elsewhere that the areas worked out do not contain areas for which inclusion fees have not been paid. On the other hand, in Baharzalli estate and other zamindari villages where manul wet has not been localized, irrigation is

much in excess of the manual wet area allotted for them and consequently, the figures finally shown show an excess over first crop ayacut, as second crop localization had to be done independently of the manual wet areas fixed. Indeed, it would be impossible to proceed otherwise, as these have in most cases been allotted to the entire estates and the allocation of these areas over various villages and again their localization on survey numbers has not been done; nor is it likely to be done for some years. Thus what is lost by way of omission of areas that did not pay up inclusion fees, has been more or less made up in the zamindari villages. It is also very probable that in filling up the first crop ayacut, preference will be shown to zamindari lands and most of the area to make up the first crop ayacut will first be found in those villages. The position is that very nearly the area that did not pay inclusion fees is already there and consequently even if it be decided later to limit the localization to manual wet area, the deductions made to those areas for first crop after localising the manual wet for first crop and the surplus transferred elsewhere, the same may be made applicable to second crop also, except as regards lands taken into the permanent zone. Should a reserve be still considered necessary, 2,500 acres of the balance of 5,500 will have to be kept for this purpose, as the area that did not pay up inclusion fees is nearly, 9,000 acres and nearly 2,000 acres of this is made up in the suspense register referred to below. There are some isolated lands classed dry and these have been entered in a register called suspense register. These consist mostly of lands which are in the midst of wet lands and which it is desirable to include in the first crop ayacut. The area according to the register is nearly 2,000 acres and on looking through the register it is seen that nearly 50 per cent of the area would fall under exclusions or into the permanent zone (already shown under dry). It is therefore sufficient to provide 300 acres, as the area in the rotation will get its turn once in three years.

Allowances to be made.

No allowance necessary.

As the extents of the three zones are considerable, it is further decided in consultation with the Collector to keep a reserve for errors and omissions and for effecting such other changes as may be found necessary. The total reserve therefore will be 1,300 acres. Hence the final ayacut figures will be as follows:—

Reserve for effecting changes.

Final ayacut figures.

	ACS.
Area already opened for second crop every year as per proposals now made	125,500
Total reserve	1,300
Total ...	126,800
Balance available for developing projects	4,200
Total ...	131,000

A separate report has been sent as to how the two projects of Muthyalapalli and Losarigutlapad covering 4,200 acres can be developed and no details are therefore given here.

A tracing showing at a glance, the excluded, the rotation and permanent zones is enclosed. The excluded zone is shown in yellow, and the permanent zone in blue, and the rotation in green, and special rotation zone in red. It is not intended to convey more than a general idea of the distribution of the zones fixed.

Appendix I.

Some suggestions.

67. The more important features of the localisation have all been dealt with but it will not be out of place to record a few things of a miscellaneous nature.

The rotation programmes drawn up have all been so arranged as to give equal areas for all the three years for the several canals. Though this is so, in nearly all cases, it is not possible to apply the second year programme on one canal and a first

year programme on another in one year. For this purpose, the Venkayya and Weyyeru and Undi canals should be treated as one unit, the Narsapur, Kakaraparru and Bank canals as another, Attili, Junction and Ellore canals as still another. The Gostanadi and Velpur canal is a separate unit by itself and in its case any year's programme can be applied in any year.

Owing to the fact that it has not been found possible, to open equal areas under Kakaraparru canal in all the three years the programmes have been so arranged that areas are equal only if the Kakaraparru and Bank canal rotation areas for any particular year are added together. It is therefore particularly necessary that the order shown in the rotation programme should not be altered. Similarly, it has been so arranged that the high level blocks in the first reach of Venkayya and Weyyeru canal are opened in a year when the high blocks in Undi and Venkayya and Weyyeru canal lower reaches are closed. Even if for some reasons, changes are necessary on other canals, it is better to stick to the order in which they are given particularly on the Venkayya, Weyyeru, Undi, Kakaraparru and Bank canals.

In regard to the questions as to what year's programme should be applied in the first year of operation, and what area should be opened when the Ellore canal is closed, I leave them open for decision of the Executive Engineer-in-charge, for the time being, but it is fairly obvious that the decision in the former case will, subject to the limitations noted above, depend on what year's rotation programme taken as a whole gives the chance of raising second crop to all lands which would have got their turn normally in that year. In the latter case, water may be given to such lands as deserve it taking into account seasonal conditions and to such other excluded lands which by reason of the Ellore canal being closed are likely to be better commanded : (Upper reaches of Attili and Junction canals).

The only concluding remark that I wish to make is that a good deal depends on the manner that the water regulation is done in the canals. I am of opinion that external turns should be resorted to, in all canals, as soon as second crop transplantation is over, and other conditions permit of this being done. Supply of water in high level channels, and sluices should be subject to greater elasticity, than the one rule, that all sluices in one reach should be closed, while another is having its turn. To clearly illustrate this point, cases of the direct sluices in the Narsapur canal in the several reaches may be mentioned. Some of them have to be opened both during turn and non-turn periods, to enable them to feed their entire ayacuts. Others have to be opened only during non-turn periods and closed during turn periods, paradoxical, though it may seem. The reason for doing so is not far to seek. In the first case, the turn duty supply cannot be drawn and in the second, the water level in the main canal is higher in the non-turn period when several large channels are closed than in the turn period. Again permanent zone lands may require supply during non-turn periods also.

It is further necessary to limit the cultivation of sugarcane to such channels where this is extensively cultivated and to limit the raising of new gardens to channels where they are already in abundance.

Concluding remarks.

68. The work of localization of second crop ayacut, covering broadly three zones, the excluded, the permanent and the rotation zones, involving four more zones, which are variations of the triennial rotation zone begun in May 1926 was completed on 29th February 1928. It would have been completed two months earlier, but owing to the removal of the Special Deputy Collector on administrative grounds four months before his term, and in the most critical period of the work, it was impossible to keep to the original programme.

The volume of work had to be done to be appreciated and what has been written above will reveal its complexity and magnitude. The one disadvantage was that though the second crop ayacut was only 136,300 acres, the entire first crop ayacut had to be covered. This is over four lakhs of acres and the parcelling out of this area into one or other of seven zones and the weaving of coherent patterns of rotation programmes from a tangled mass of material of every kind and description, gave

not a little trouble; and further the alterations suggested and accepted at the ryot's conferences, materially contributed to the difficulties in effecting adjustments, and balancing the areas. It is no exaggeration to say that but for the willing and hearty co-operation given and the more than kind courtesy shown, by the Special Deputy Collector, Mr. Muhammad Azimatullah Khan Saheb Bahadur and the hard work done and untiring energy and zeal displayed by the four overseers G. G. Rama Rao, A. Satyanarayanamurthi, J. Venkataramayya, and A. Jagathesa Mudaliyar and the two Revenue Inspectors G. V. L. Narasimhacharlu and P. Ramayya the work could not have been completed in time. All these subordinates and the clerk T. Venkataramayya are deserving of every encouragement.

I wish to particularly convey my thanks to M.R.Ry. S. Krishnaswami Ayyar Avargal, Executive Engineer, Godavari Western Division, for the generosity with which he placed all his records at my disposal often times in spite of inconveniences to his own work, his unfailing courtesy, and help during the several stage of the localization, to the other Public Works Department officers for similar help, and the several regular Revenue officers and subordinates in the district for the more occasional help they rendered.

The officers in charge of the localization from the beginning were as follows :—

Executive Engineer.

(1) Mr. N. Dorairaja Ayyar from 15th April 1926 till 12th August 1926.

(2) Mr. A. R. Venkatachari from 12th August 1926 till 29th February 1928.

Special Deputy Collector.

(1) Mr. Azimatullah Khan Sahib Bahadur from 11th September 1926 to 24th August 1927.

A. R. VENKATACHARI,
Executive Engineer, Special Investigation Division.

APPENDIX I (Map not printed).

APPENDIX II.

[Instructions to the Special officers for the localization of second crop areas in the Godavari Western Delta.]

G.O. Mis. No. 2138, *Revenue, dated* 14*th December* 1926.

[*Principles and procedure.*]

1. The purposes of this inquiry are—

(i) To form a regular second crop zone of lands unable to grow a first wet crop;

(ii) To exclude all lands which cannot conveniently be supplied with water for second crop;

(iii) To suggest the most economical distribution of water for the second crop for all lands not included under (i) and (ii).

2. For the purposes of this investigation, the maximum area that can safely be allowed for second crop cultivation should be taken as 186,000 acres (vide separate statement). In fixing the allotment to each canal the object to be aimed at will be to provide water for second crop once every three years to all lands in the rotational zone. This first step will therefore be to determine the areas of the permanent and rotational zones for each canal. If the totals of the permanent zone areas and of a third of the rotational zone areas fall short of the area that can be given water (viz., 186,000 acres), the Special Officers will submit an *interim* report to the Board, through the Collector, on the point how the excess area should be distributed among the several canals and whether a special biennial rotational zone should be formed for each canal. The report should give full details about the extents concerned. The final programme of rotation referred to in paragraph 3 below will be framed after orders are passed on this point.

The above will not apply to the Lillore canal in the case of which the present allotment will be adhered to generally.

3. The Special Executive Engineer will be responsible for the technical portion of the work referred to in paragraph (i).

The Special Deputy Collector will be responsible for the collection of all required information available in the Revenue Records and for making non-technical inquiries and inspections in the villages.

The Special Executive Engineer will be solely responsible for exclusions (paragraph 1 (ii) above).

The decision as to what lands should be included in the regular and rotational zones will be made by the two officers jointly. The Special Executive Engineer will frame a programme of rotation for each canal. From this, the Special Deputy Collector will prepare a list of survey numbers in each village to be irrigated each year. He will also prepare similar lists of fields in the regular zone and in the excluded area.

4. In selecting (or excluding) a piece of land for second crop, care should be taken to see that the full extent of the survey number or subdivision is selected (or excluded). At the same time the boundaries of blocks should be such as to be easily recognized not only by Government officials but also by ordinary ryots. The areas selected for inclusion (or exclusion) should, as far as possible, form compact blocks. When the area of submersible land under a channel forms only a negligible part of its ayacut, it should not be included in the regular second crop zone. Areas already classed as wet or proposed for inclusion in the first crop ultimate ayacut are to be given preference to dry areas.

5. There appears to be some zamindari and inam lands which are irrigated free of charge for second crop. The Special Deputy Collector will prepare a list of such lands. The lands should as far as possible be included in the regular zone provided they satisfy the general conditions laid down for inclusion in that zone. In the case of lands that cannot be included the Special Deputy Collector should negotiate with the tenants and proprietor for transfer of water rights for second crop to lands which can be included. When this is not possible he should report the case for the orders of the Collector who will consider whether the water rights should be acquired. If acquisition is necessary the orders of the Board should be obtained.

6. The submersible area bordering the Collair and commanded by the Ellore canal will be formed into a special rotational zone, since although these lands are liable to annual submersion the total quantity of water available does not permit of their annual irrigation during the second crop season.

7. The Special Executive Engineer will prepare a separate list of patta dry and unoccupied areas which only require extension of channels to bring them under second crop irrigation.

8. To prevent the indiscriminate extension of garden cultivation which would interfere with a system of fixed rotation, a notification will be issued in the gazette giving a list of the existing gardens which are usually given water all the year round and prohibiting the formation of new gardens without the permission of the Collector. This applies to permanent gardens, such as lime, orange, coconut and betel gardens and also to plantain gardens of the sorts that last from 5 to 10 years. The Special Deputy Collector will prepare this list.

A notification will be issued in the district gazette providing that all persons intending to grow sugarcane should obtain the previous permission of the Executive Engineer.

9. The Special Officers will frame rules for the supply of water to dry crops during the second crop season.

10. The Special Officers will report jointly to both the Superintending Engineer and the Collector except on purely Revenue or Public Works Department matters:—

Serial number and name of canal. (1)	First crop ultimate ayacut. (2)	Second crop paddy. (3)	Garden and other crops. (4)	Equivalent second crop paddy of items in columns (3). (5)	Total. (6)
	Acs.	Acs.	Acs.	Acs.	Acs.
1. Main canal	8,040	674	741	370	944
2. Ellore canal	68,611	3 878	1,122	561	6,432
3. Junction canal	25,056	4 675	1,842	921	5,638
4. Kakumparru canal	12,998	2,049	6,028	3,014	4,645
5. Bank canal	37,253	15,117	6,001	3,000	17,107

APPENDIX IV.

Notification.

It is hereby notified for general information that, with effect from fasli 1337, the Public Works Department will not supply water to new gardens of the undermentioned classes in the Godavari Western Delta unless the previous permission of the Collector has been obtained.

Applications for such permission should be sent in through the village officers to the Executive Engineer, Godavari Western division, who will communicate the Collector's orders to the applicants.

Those who desire to make plantain gardens should specify whether they propose to raise the shorter—known also as the "Company"—variety or the longer variety which requires water for a greater number of years.

2. Names of garden crops in respect of which water applications are required:—

Coconut.

Plantains—all varieties.

Betel gardens.

Gardens growing trees of the lime or orange family.

Other fruit trees.

3. All persons desiring to grow sugarcane should obtain the previous permission of the Executive Engineer, Godavari Western Division, Nidadavole.

4. This notification cancels that dated 20th September 1926 dealing with the same subject, published at page 74 of the *West Godavari District Gazette* for October 1926.

West Godavari Collector Office,
Chilakalapudi, 20th January 1927.

A. H. A. TODD,
Collector.

APPENDIX V (*a*).

Statement showing area excluded under various canals in relation to the first-crop ayacut.

APPENDIX VII.

Draft Rules.

1. The rules mentioned below apply to the irrigation with canal water of dry crops on dry and wet lands in the G.W. delta in the second-crop season. They will come into force from fasli 1338.

Scope and extent of application.

2. The term "dry crops" will include all classes of crops whether termed dry or garden crops other than the following :—

Nature of crops.

(1) Plantains—all varieties
(2) Sugarcane.
(3) Trees of the lime or orange family.
(4) Betels.
(5) Paddy.
(6) Other fruit-trees.

3. Subject to the prohibitions noted under rule 4 below and to such regulation arrangements as may be made, canal water will be supplied to dry crops of all kinds at the discretion of the Executive Engineer, so long as it is available and can be spared.

Conditions of supply.

Prohibition.

4. The channels given in the Schedule I annexed will however be permanently closed to dry crops of all kinds.

The channels and reaches of channels shown in Schedule II are prohibited from irrigating dry or garden crops with canal water in the particular years of rotation for dalwa paddy specified therein.

5. As a general rule no water will be supplied to any class or classes of dry or garden crops after 1st March, except with the special permission of the Executive Engineer, G.W. Division.

Latest date for supply.

6. The lists of channels and reaches of channels and other particulars given in Schedules I and II may be added to or subtracted from at the discretion of the Executive Engineer, and of every such alteration such notice as may be possible will be given.

Additions or alterations.

7. Notwithstanding anything in these rules, the Executive Engineer may with the approval of the Collector, after notice, prohibit permanently or temporarily at any time with or without assigning any reason, irrigation of dry crops with canal water of any land or block of land.

Prohibition in special cases.

8. Subject to compliance with the foregoing rules, no water applications for lands in other than prohibited areas (Schedules I and II) will be necessary for the irrigation of dry crops from authorized sources during the second-crop season.

Water applications.

No direct baling from channels will be allowed.

9. Irrigation in contravention of the above rules will be treated as irregular and dealt with according to rules.

Unauthorized irrigation.

10. Government reserve the right to alter or amend the rules, and they do not also guarantee the supply of water to dry crops.

Reservation of powers.

APPENDIX VIII.

Rules for irrigation of dry crops in the second-crop season.

Statements of objects and reasons.

Rules (1) *and* (2).—Define the scope of the rules and the extent of application.

Rule (3).—Removes restrictions as regards supply of water to dry crops under channels not prohibited under rule 4.

Rule (4).—The Schedule I has been prepared with reference to the statistics enclosed. Five acres or 1 per cent whichever is larger has been taken as the limit below which it is undesirable to allow dry crops under particular channels. Schedule II is prepared after consulting the Public Works Department subdivisional officers and subordinates in actual charge of regulation, taking into account the difficulties in the way of supply of water to paddy at the tail ends of channels, should the upper reaches be allowed to grow dry crops unrestrictedly.

Explanation of schedules I and II.

Both schedules are subject to alteration, the first, should there be representation from ryots under individual channels promising to grow a minimum area of dry crops such as would justify the channel being opened for the purpose; and the second, as experience is gained in working the various dalwa terms.

Additions or alterations allowable.

Rule (5).—That the date 1st March is the latest date up to which water can be supplied without control, is the unanimous opinion of the Public Works Department officers and is therefore put in. In favourable seasons, there is nothing to prevent water being supplied even later.

Explanation of reasons for fixing 1st March.

Rule (6).—Already explained under rule (4).

Rule (7).—1. This is similar to Board's Standing Order, Volume II, page 9, rule VI.

2. The idea of this rule is to enable prohibition being ordered even under channels not in Schedules I and II on administrative grounds. For instance, just as certain lands can be suspended from raising dalwa paddy for a number of years as a punishment for the irregularities committed by the owners on the channels (such as extensive breaching and so on) power is reserved to cut off water to dry crops at any time on same or similar grounds.

Punishment for irregularities

Rule (8).—Though according to Board's Standing Order no water applications are necessary for irrigation of dry crops on dry lands in second-crop season, the practice in the delta appears to be otherwise. Considerable volume of work is thrown on the Executive Engineer at present, due

Existing procedure explained.

to this procedure and the rule is intended to make it clear that no water applications are necessary, except in respect of prohibited areas. This is practically a repetition of the Board's Standing Order, Volume II, page 7, rule II (1).

The word "authorized sources" is advisedly used, as certain dry lands have been provided with sources on certain channels, from which the owners can in future irrigate them. If new sources are required water applications would be necessary or the irrigation would be unauthorized. The Board's Standing Order rule may require alteration in regard to this matter. If need should arise, a list of dry lands and their authorized sources may be published later.

Explanation of authorized sources.

Rules (8) *and* (10).—Need no explanation.

APPENDIX IX.

Schedule I.

Name of canal.	Name of channel or source.
Main canal	Arulla field sluice.
Ellore canal	Inlet No. I.
	Inlet No. II.
	Azzarala channel.
	Badampudi No. I sluice.
	Badampudi No. III sluice.
	No. 1 Escape channel.
	Yellamilli No. I channel.
	Kagupadu sluice.

	Tallapuram channel.
	Kaikaram No. I channel.
	Kaikaram No. II channel and all channels below it.
Junction canal	Nil.
Attili canal	Nil.
Gostanadi and Velpur canal ...	All except the following channels or sources :—
	(1) Direct Irrigation—First reach.
	(2) Do. Second reach.
	(3) Mamadur parallel channel.
	(4) Veeravasaram East side channel, omitting Rayakadura East and West side channels.
	(5) Mamadur channel.
Venkayya Weyyeru canal ...	Ravipadu parallel channel.
	Chintapalli sluice
	Mudunur No. 1 sluice,
	Kasipadu channel.
	Korumilli parallel channel and all channels below Paromella lock excepting Azzamur concrete sluice.
Undi canal	Kommara right side vent.
	Kommara left side vent.
	Pippara No. I field sluice.
	Pippara No. III field sluice.
	Kesavaram No. I Parallel channel.
	Aredu channel.
	Aredu parallel channel.
	Pandava channel and all channels below Pandava channel head up to end of Undi canal excepting Kolanapalli channel.
	Kolanapalli Lanka channel.
Kakaraparru canal	Nil.
Bank canal	Nil.
Narasapur canal	All channels below Mortair lock.

APPENDIX X.

Schedule II.

Name of canal.	Name of channel.	Description of area prohibited.
Main canal ...	Nil.	
Ellore canal ...	Nil.	
Junction canal.	Mid level channel ...	(a) Krishnayapalem, Alampuram, Pratipadu, Hacheria, Bodapadu, Ravipadu and Vallurpalli Agraharam are prohibited from raising dry crops in the third year of rotation.

Name of canal.	Name of channel.	Description of area prohibited.
Junction canal—cont.	Mid level channel—cont.	(b) Darisiparru, Pentapadu Agraharam, Kaspa Pentapadu, Akuthigapadu, Devarachuruvu Khandrika, Yagarlapalli, Umamaheswaram, Jatlapalem and Yanalapalli villages are prohibited from raising dry crops in the fourth year of rotation.
	Low level channel ...	(a) Alampuram, Bendalapalem, Durva, Darisiparru, and Modanur above or east of Tadepalligudem-Bhimavaram road, are prohibited from raising dry crops in the second year of rotation, (b) Ravipadu, Bodapadu, and Akuthigapadu villages are prohibited from raising dry crops in the third year of rotation.
Venkayya Wayyeru canal.	Ravipadu channel ...	In the year in which Kanuru and Pippara are given second crop, dry crops are prohibited on lands under pipes and branch channels above No. I dam.
Undi canal ...	Komamara channel ...	In the year in which Gunupavaram is given second-crop, dry crops are prohibited on lands under pipes and branches above notch at 2/0.
	Muggulla channel ...	In the year in which there is second crop below dam, dry crops are prohibited on lands under pipes and branch channels above dam.
Attili canal ...	Amudalapalem channel.	Gingelly is prohibited in Kaldhari limits when dalwa is given to Pasalapudi village.
	Godicharla parallel channel.	When Satyavada and the second half of Tatali are given dalwa, gingelly is prohibited in the area of Vaddur and Tatali coming between the two dalwa blocks.
	Rameswaram channel.	Gingelly is prohibited on the area under the pipes and branch channels above No. I dam, when dalwa is allowed for Rameswaram, Jattiga and Penumantra villages.
	Moyyeru channel ...	Gingelly is prohibited on the area under the pipes and branch channels above No. I dam, when dalwa is given to Kesavaram and Pippara villages.
	Belangi channel ...	All dry crops are prohibited on the Korukollu and Shanmugapuram branches when Mogallu village is opened for dalwa.
	Bobbarajupad channel.	Dry crops are prohibited on all but excluded area when the channel is open for dalwa.
	Palur channel ...	Dry crops are prohibited on the area under the pipes and branch channels above No. I dam, when Kondapad lands are opened for dalwa.
	Manchili channel and its branches.	All dry crops are prohibited under the channel when Attili lands are opened for dalwa.
Gostanadi and Velpur canal.	Nil.	
Kakaraparru canal.	Undrajavaram channel.	Dry crops are prohibited in the year the channel is opened for dalwa.
	Ramayagunta channel.	Do. do.
	Theeparru channel ...	Dry crops are prohibited on the right side from Palacodu drain to end when left side is opened for dalwa. Dry crops are prohibited on the left side from Palacodu drain to end when right side is opened for dalwa.
Buck canal ...	Pittalavemavaram channel.	Dry crops are prohibited on all but excluded lands, when Penugonda and Charakuvada villages are opened for dalwa.
	Deva channel and branches.	Dry crops are prohibited in upper reaches when the last reach is open for dalwa.
	Jaggaraju channel and branches.	Do. do.
	Kodumanchili channel and branches.	Do. do.
Narsapur canal.	Nil.

Fort St. George, May 21, 1929.

Whereas it appears to Government that the undermentioned lands are needed for a public purpose, to wit, for the canal system of the Cauvery-Mettur Project, notice to that effect is hereby given to all whom it may concern, in accordance with the provisions of section 4 (1) of the Land Acquisition Act I of 1894, as amended by Act XXXVIII of 1923 and the Governor in Council hereby authorizes the Special Deputy Collector No. II, Pattukkottai, and his subordinates to exercise the powers conferred by section 4 (2) of the Act. Under section 5 (a) of the Act, the Governor in Council appoints the Special Deputy Collector No. II, Pattukkottai, to perform the functions of a Collector under section 5-A of the Act. All persons interested in the land are required to lodge before the above-mentioned officer, within thirty days after issue of the notification, a statement in writing of their objections, if any, to the proposed acquisition.

Zamin, dry, T.S. No. 16-3, Veerappoke punji (No. 41-7), belonging to Chinnathambi Kaliyana, bounded on the north by T.S. No. 16-1 & 2, east by T.S. No. 16-4; south by zamin, west by T.S. No. 16-2	0·45

Canal No. 17.

Zamin, peramboke, T.S. No. 17-2, Sennilkolam nirpidam (No. 40), belonging to zamindar Muthia Chettiyar, kudiwaram elamanis Sokkara Chetti, Chinnathambi Kaliyana, M. Kulandaswami Kaliyana and minor Munian, guardian Sinnathal, bounded on the south by zamin, east and south by T.S. No. 17-1; west by T.S. No. 16-1	0·66

Canal No. 18.

Zamin, dry, T.S. No. 18-2, Kulabe punji (No. 8-4 D), belonging to Nelvali M. Gowala Konan, bounded on the north by T.S. No. 18-1 & 3, east by T.S. No. 18-3, south by zamin, west by T.S. No. 18-1	0·06
Zamin, dry, T.S. No. 18-3, Kulabe punji (No. 8-4 C), belonging to Nelvali S. Krishna Konan) bounded on the north by T.S. No 18-1 A; east by T.S. No. 18-5, south by zamin and T.S. No. 18-2, west by T.S. No. 18-1	0·61
Zamin, perambole, T.S. No. 18-4 A, Sennilkolam nirpidam (No. 40), belonging to zamindar Muthia Chettiyar, kudiwaram elamanis Sokkara Chetti, Chinnathambi Kaliyana, M. Kulandaswami Kaliyana and minor Munian, guardian Sinnathal, bounded on the north by zamin; east by T.S. Nos 19-1 and 18-3 & 5, south by T.S No. 18-1, 6 & 9; west by T.S. No. 18-1	0·22

Canal No. 19.

Zamin, perambole, T.S. No. 19-1 B, Sennilkolam nirpidam (No. 40), belonging to zamindar Muthia Chettiyar, kudiwaram elamanis Sokkara Chetti, Chinnathambi Kaliyana, M. Kulandaswami Kaliyana and minor Munian, guardian Sinnathal, bounded on the north by zamin; east by T.S. Nos 19-1 and 20-2, south by T.S. No. 18-1 A, 2, 4 & 6 and zamin, west by T.S No. 18-1 A ..	1·42

Canal No. 20.

Zamin, perambole, T.S. No. 20-2, Sennilkolam nirpidam (No. 40), belonging to zamindar Muthia Chettiyar, kudiwaram elamanis Sokkara Chetti, Chinnathambi Kaliyana, M. Kulandaswami Kaliyana and minor Munian, guardian Sinnathal, bounded on the north by zamin, east by T.S. No. 21; south by T.S. No 20-1 and zamin; west by T.S. No. 19-1 B	1·60

	ACS.
Canal No. 21.	
Zamin, perambole, T.S No. 21, Sennilkolam nirpidam (No. 40), belonging to zamindar Muthia Chettiyar, kudiwaram elamanis Sokkara Chetti, Chinnathambi Kaliyana, M. Kulandaswami Kaliyana and minor Munian, guardian Sinnathal, bounded on the north by zamin, east by T.S No. 22, south by zamin; west by T.S. No 20-2 ..	2·10
Canal No. 22.	
Zamin, perambole, T.S No. 22, Krishnapuram nirpidam (No. 8-4), belonging to zamindar Muthia Chettiyar, kudiwaram elamanis Sokkara Chetti, Chinnathambi Kaliyana, M. Kulandaswami Kaliyana and minor Munian, guardian Sinnathal, bounded on the north by zamin; east and south by Neyveli Tirupati village, west by T.S No. 21 ..	3 06
Total ..	46 26 and 250 sq. links.

NOTE.—The names entered as owners are kudiwaramdars and elamanis of kudiwaram shown in the compensation, and the description of land noted in the beginning is as per zamin village accounts and the numbers entered within brackets are those entered in the zamin village accounts to indicate different holdings.

The melwaramdar in all the cases is S. Ge. M. Ge. Muthia Chettiyar, zamindar of Sannya nadu. The zamindar has mortgaged his whole right in the village to M. Chinnah Chettiyar and V. Muthukumara Chettiyar of Kumbakonam, and again to M. A. M. Muthia Chettiyar of Thanjavur.

Fort St. George, May 17, 1929.

Under section 6 of the Land Acquisition Act, the Governor in Council hereby declares that the land specified below and measuring 7·31 acres, be the same a little more or less, is needed for a public purpose, to wit, for the canal system of the Cauvery-Mettur Project; and, under sections 3 and 7 of the same Act, the Special Deputy Collector No. II, Tanjore, is appointed to perform the functions of a Collector under the Act and directed to take order for the acquisition of the said land. A plan of the land is kept in the office of the Special Deputy Collector No. II, Tanjore, and may be inspected at any time during office hours.

Tanjore district, Tanjore taluk, Kannandangadi Melaiyur (Chatram Inam) village.

The President, District Board, Tanjore, is trustee of the chatram in the melwaramdar. The names of kudiwaramdars are given below.

Fort St. George, May 22, 1929
(G.O. Ms. No. 1126, P.H.)

No. 788.—In exercise of the powers conferred by section 209 of the Madras Local Boards Act, 1920 (Act XIV of 1920), the Governor acting with Ministers is hereby pleased to extend at the request of the Narsapur Taluk Board and the West Godavari District Board the provisions of section 357 of the Madras District Municipalities Act, 1920 (Act V of 1920), to the area under the jurisdiction of the Narsapur Taluk Board.

No. 789.—In exercise of the powers conferred by section 357 of the Madras District Municipalities Act, 1920 (Act V of 1920), as extended by Notification No. 788, dated 22nd May 1929, to the area under the jurisdiction of the Narsapur Taluk Board, the Governor acting with Ministers is hereby pleased to empower the Health Inspector employed in that area to exercise the powers of a public officer for the purposes of sections 3 and 4 of the Town Nuisances Act, 1889 (Act III of 1889).

S. RANGANATHAN,
Deputy Secretary to Government.

ERRATA

Fort St. George, May 28, 1929.

In Notification No. 438 of Part I-A of the *Fort St. George Gazette*, dated the 19th March 1929, relating to the acquisition of lands for the formation of road connecting Ettayapuram to Vilathikulam road with Palamcottah to Nagalapuram road:—

For 'the Revenue Divisional Officer, Kulpatti' wherever it occurs *read* 'the Special Deputy Collector for land acquisition, Tinnevelly.'

In the erratum to Notification No. 1405 of Part I-A of the *Fort St. George Gazette*, dated the 18th September 1928, published on pages 97 and 68 of Part I-A of the *Fort St. George Gazette*, dated the 6th February 1929, relating to the acquisition of lands in No 99, Patnam village, Kumbakonam taluk, Tanjore district, required for opening a unitary lane No. 25 of Ward I of the Kumbakonam municipality:—

For '462-1 part, belonging to Minakshi Ammal, mortgagee Sundaram Ayyar, Vallimmal, Sengamalam, Komaryalias Seppammal, Nagalingam Pillai and Lakshmana Pillai—1,364 square feet,' *read* 'No 462-1 A, Minakshi Ammal, mortgagee Sundaram Ayyar, Vallimmal, Sengamalam, Komaryalias Seppammal, Nagalingam Pillai, Lakshmana Pillai and Secretary, Vasa Vilas Sabha, Kumbakonam—2,495 square feet.

For 'total extent 4,260 square feet,' *read* 'total extent 6,400 square feet'

ACQUISITION OF LANDS.

No. 900.—Whereas it appears to the Government that the land specified below is needed for a public purpose, to wit, for the construction of travellers' bungalow, notice to that effect is hereby given to all whom it may concern in accordance with the provisions of section 4 (1) of the Land Acquisition Act I of 1894, as amended by the Land Acquisition (Amendment Act XXXVIII of 1923). The Government hereby authorize the Revenue Divisional Officer, Namakkal, and his subordinates to exercise the powers conferred by section 4 (2) of the Act and under section 3 appoint the Revenue Divisional Officer, Namakkal, to perform the functions of a Collector under section 5-A of the Act.

Salem district, Rasipur taluk,
Konaripatti village.

UNIVERSITY OF MADRAS.

NOTICE.

The ensuing Pre-Registration Examination will commence on Saturday, the 1st June 1929, and *not*

on the 8th June 1929, as originally notified in the *Fort St. George Gazette*.

Senate House, Madras,
17th *May* 1929.

NOTIFICATIONS.

It is hereby notified that Mr G. Srimangachari, who passed the B.E. Degree Examination in 1923, has been awarded the Sir Gabriel Stokes Prize for that year.

In modification of the notification published in the *Fort St. George Gazette*, dated the 23rd April 1929, it is hereby notified that the certificates of having passed the High School Examination held prior to December 1926, under the Code of Regulations for European Schools, will be considered by the Syndicate for purposes of recognising the examination passed as equivalent to the Matriculation Examination of this University, with a view to obtain admission to a University course of study.

Holders of such certificates should submit their original certificates, together with a treasury or bank receipt for a sum of Rs. 5, the prescribed recognition fee, through the Principal of the college which they desire to join.

Each case of recognition will be considered and decided by the Syndicate on its merits.

(By order)

D. C. ARUMAINAYAGAM,
Chief Superintendent in-charge,
Office of the Registrar.

Senate House, Madras,
21st May 1929.

THE GOVERNMENT SCHOOL OF INDIAN MEDICINE, MADRAS.

RULES REGULATING THE POST-GRADUATE COURSE OF TRAINING IN INDIAN MEDICINE.

INTRODUCTORY.

The Government School of Indian Medicine provides a course of Post-graduate training in Indian Medicine open only to those who have received a full course of approved training in a recognized college or school of Western Medicine (Allopathic Medicine).

ADMISSIONS.

2. The number of admissions is for the present fixed at a maximum of 20 per annum.

3. The course extends over a period of two academical years commencing from July in each year.

4. (a) Applications for admission should be made before the 25th June of every year in the prescribed form which may be had on application to the Principal. A registration fee of Rs. 5 should be paid into a Government Treasury or the Imperial Bank of India to the credit of "Government School of Indian Medicine—Fees" and the Treasury or Bank receipt should accompany the application. No application will be registered without the production of such a receipt. The registration fee will be counted towards the school fees in the case of applicants selected for admission who will then be required to pay only the balance due to complete their payment. The registration fee will be returned to the applicants not selected for admission but forfeited in the case of those who are selected but do not join on or before the prescribed date.

(b) Intimation of selection will be duly sent to all selected applicants who should then pay their fees and join the school on or before the prescribed date.

(c) Every application for admission should also be accompanied by a certificate testifying to the standard of general and professional training received by the applicant. No application will be considered without the production of such a certificate.

FEES.

5. (a) The fees payable by students for this course will be *Rs.* 120 per annum payable in advance in two equal half-yearly instalments.

(b) The fees should in all cases be paid into a Government Treasury or the Imperial Bank of India to the credit of Government School of Indian Medicine, Madras—Fees and the receipt granted by the Treasury or Bank filed at the school office on or before the prescribed date.

(c) If a student leaves the school during a session he shall have no right to claim remission for any portion of the fees paid.

CURRICULUM OF STUDIES.

6. The curriculum of studies for this course will be as follows:—

First year.

A. Lectures—(1) Fundamental Principles of Indian Medicine, (2) Anatomy, (3) Physiology, (4) Psychology, (5) Materia Medica and Pharmacy and (6) Pathology—One course each; (2) to (6) to be studied from the standpoint special to Indian Medicine.

B. Hospital Practice—throughout the year at the Government Indian Medical School Hospital—specially directed to Clinical Research.

C. Library study and preparation of study and notes as directed by the Director of Library study and research.

Second year.

A. Lectures—(1) Medicine, (2) Surgery, (3) Midwifery and diseases of women and children, (4) Ophthalmology, (5) Toxicology and Medical Jurisprudence and (6) Hygiene and Preventive Medicine—One course each; to be studied from the standpoint special to Indian Medicine.

B. Hospital Practice, } To be continued.
C. Library study. }

7. At the end of the course, there will be an examination conducted by a Special Board to test the fitness of the candidates for the award of the diploma of "Fellowship of Indian Medicine." Candidates successful at this examination will be permitted to affix the title F.I.M. to their names.

6. Mother tongue	
7. Is the following document attached? Receipt granted by the Imperial Bank or Government Treasury in evidence of payment of Registration fee.	
8. Present occupation	
9. Address in full	

Signature of applicant.

RULES OF THE GOVERNMENT SCHOOL OF INDIAN MEDICINE, MADRAS.

INTRODUCTION.

The school works in three sections, viz., Ayurveda, Siddha and Unani.

2. The school is intended to provide such training to its alumni as will enable them to become competent practitioners of Indian systems of medicine

with a good working knowledge of the Western system also. It is with this end in view that provision has been made in this school not only for the proper training of students in Ayurveda, Siddha and Unani but also for giving them courses of instruction in such subjects (the Modern Anatomy, Physiology and Surgery in all its branches, including Midwifery and Ophthalmology. Provision has also been made for clinical teaching (both out-patient and in patient) as well as for Herbarium, Museum, Library, etc. Vernaculars (Tamil, Telugu and Urdu) are the general media of instruction, but subjects of Western medicine are at present taught in English. It is hoped, however, that vernaculars will soon be used as the media of instruction for these subjects also.

ADMISSIONS.

3. The number of admissions is, for the present, fixed at a maximum of 120 per annum, of whom 80 will ordinarily be allocated to the Ayurvedic section and 20 to each of the two sections, Siddha and Unani. The vacancies occurring in any one section may, however, be filled in by admission to any other section provided that the total number in all sections does not exceed 120.

4. Selection will be made by a Selection Committee appointed by the Government.

5. The standard of preliminary general qualification required is a working knowledge of English in addition to proficiency in (a) Sanskrit or Telugu, (b) Tamil and (c) Urdu for admission to the Ayurveda, Siddha and Unani sections respectively. Other things being equal, preference will be given to candidates who possess the Secondary School Leaving Certificate (specially to those who took up science subjects as optionals) or any other equivalent or higher qualification.

6. The academical year of the school extends over a period of ten months consisting of two terms—a long term of six months from the beginning of July to the end of December and a short term of four months from the beginning of January to the end of April. The months of May and June constitute the school recess.

7. Candidates seeking admission to the school should not be below 18 years of age at the time of their admission to the school.

8. (a) Applications for admission should be made before the 15th June in the prescribed form which may be had on application to the Principal. A registration fee of Rs. 5 should be paid into a Government Treasury or the Imperial Bank of India to the credit of "Government School of Indian Medicine, Madras—Fees" and the Treasury or Bank receipt should accompany the application. No application will be registered without the production of such a receipt. The Registration fee will be counted towards the school fees in case of candidates selected for admission who will then be required to pay only the balance due to complete the payment. The Registration fee will be returned to the candidates not selected for admission, but forfeited in the case of those who are selected but do not join on or before the prescribed date.

(b) Intimation of selection will be duly sent to all selected candidates who should then pay their fees and join the school on or before the prescribed date.

(c) Every application for admission should be accompanied by the following certificates without which it will not be considered :—

(1) Certificate of physical fitness from a registered Medical Practitioner.

(2) Certificate of character.

(3) Certificate of the standard of general education attained.

FEES.

9. (a) The fees payable by students will be as follows :—

	Per annum Rs.	
Candidates who are natives of the Madras Presidency.	60	Payable in advance in two equal half yearly instalments.
Other candidates ..	100	

(b) A fee of rupee one for a term or rupees two for a whole year towards the Athletic Union of the school shall be paid in advance by each student.

(c) The fees should in all cases be paid into a Government Treasury or the Imperial Bank of India to the credit of "Government School of Indian Medicine, Madras—Fees" and the receipt granted by the Treasury or Bank filed at the school office on or before the prescribed date.

(d) If a student leaves the school during a session, he shall have no right to claim a remission of any portion of the fee paid.

FREESHIPS AND SCHOLARSHIPS.

10. (a) The Government have provided 20 free studentships to be awarded annually to deserving students who belong to this Presidency, preference being given to women and to students of backward communities.

The Government have also instituted five scholarships of the monthly value of Rs. 20 each to be awarded annually to women students who are not in receipt of stipends from other sources. The stipendiaries will be supplied with books and instruments at the cost of Government. On the completion of the course, successful candidates who were in receipt of stipends from the Government will be liable to serve the Government, if required, for a period not exceeding five years; but no guarantee of such employment will be given to any candidate.

(b) Local bodies are permitted to depute their own stipendiaries for study in the school subject to certain conditions. A few scholarships provided by private donors are also available.

(c) Applications for all freeships and scholarships should be made in the prescribed form which may be had on application to the Principal. Applications should reach the Principal not later than the 1st July of each year. Every such application should be accompanied by the certificates and other documents mentioned in the prescribed form. No application will be considered without the production of such certificates or documents.

ATTENDANCE, LEAVE AND GENERAL DISCIPLINE.

Attendance.

11. (a) No student will be eligible for promotion to a higher class unless his attendance and progress have been found satisfactory and all the school and hospital demands against him have been duly paid.

(b) Every student is required to attend regularly and punctually at the stated hours for lectures, dissections and demonstrations.

(c) No student will be eligible for the grant of a certificate of attendance in any class unless he has attended at least 80 per cent of the meetings of that class.

(d) No student will be eligible for the grant of a certificate of progress in any subject unless he has obtained at least one third of the maximum number of marks allotted to that subject in the class and sessional examinations of the school.

12. Every student who obtains not less than 75 per cent of the total number of marks in any subject will be eligible for the grant of a certificate of honour in that subject.

13. Students found indulging in unfair practices during any examination such as being in possession of or using text-books, notes or manuscripts or copying will be forthwith removed from the examination room and the matter reported to the Principal.

Absence and leave.

14. Candidates should not absent themselves without leave; in emergent or other exceptional circumstances however the cause of absence should be satisfactorily explained in writing at the earliest possible opportunity.

15. Absence at any sessional examination must be accounted for by production of a medical certificate when a re examination may be held to determine the grant of the progress certificate.

16. Any student who absents himself without leave shall be liable to be punished by loss of marks or fines unless such absence is satisfactorily explained.

17. When sickness necessitates absence a student shall produce a medical certificate to that effect from a registered medical practitioner.

18. Candidates applying for leave are strictly warned that the total number of their days of absence in any class should in no case exceed 20 per cent of the meetings of such class. The grant of leave to any student means that the reasons given for the grant of such leave are deemed satisfactory; it does not, in any sense, convey a guarantee that, after excluding the period of such leave, the student has, or will have enough attendance to enable him to obtain the certificate of attendance referred to in rule 12 (*c*) above. Students applying for leave are therefore strictly warned that, in every case, it is at the risk of the student himself that the leave is granted and that he will not be eligible for certificate of attendance referred to in rule 12 (*c*) if, after deducting the number of days he was absent on leave, it is found that the number of attendance in any class is less than 80 per cent of the meetings of that class.

THE CURRICULUM OF STUDIES.

19. The following is the curriculum of studies for all sections:—

(The names of the subjects are given in English so as to be applicable to all sections, viz., Ayurveda, Siddha and Unani but instruction in the various subjects will be based upon the Ayurveda, Siddha and Unani writings, respectively, the subjects included in Western Medicine being taught in accordance with English books on the subject.)

First year.

(1) Anatomy and Dissections, first course.
(2) Physiology, first course.
(3) Materia Medica and Pharmacy—General, first course.
(4) Materia Medica and Pharmacy—Special (Mineral preparations), first course.
(5) An elementary course of lectures on the physical and biological sciences with special reference to their applications in medicine, first course.
(6) Fundamental principles of Medical Science, first course.

Second year.

(1), (2), (3), (4), (5) } Subjects Nos. (1) to (5) of first year (continued), second course.
(6) Pathology and Diagnosis, first course.

Clinical Practice.

	MONTHS.
Compounding and dispensing practice ..	3
General out-patient practice	3
Total ..	6

Third year.

(1) Pathology and Diagnosis (continued), second course
(2) Medicine—General and special, first course.
(3) Surgery, first course.
(4) Midwifery and diseases of women and children, first course.
(5) Toxicology and Medical Jurisprudence, first course.
(6) Hygiene and Preventive Medicine, first course.

Clinical Practice

	MONTHS.
Out-patients department	2
Medical wards	3
Surgical wards	3
Women and children wards	2
Total ..	10

Fourth year.

(1), (2), (3), (4), (5) } Subjects Nos. (2) to (6) of third year (continued), second course.
(6) History of Medicine, first course.

Clinical Practice

(Ten months as in third year.)

20. At the end of the first, second and third year, there will be an annual school examination to test the fitness of candidates for promotion to the next higher class; final year students will however be examined by a special Board appointed by the Government, and those who are successful in this examination will be granted the Diploma of Licentiate in Indian Medicine (L.I.M.)

The examinations will be held each year in the month of April, candidates will not be considered qualified for promotion to the next higher class or, in the case of the final year candidates for the grant of the Diploma of L.I.M. unless they secure a pass at these examinations.

21. To secure a pass at any of these examinations, candidates will be required to obtain not less than one-third of the maximum number of marks in each subject in which they are examined.

A candidate who passes in all the subjects and obtains not less than 75 per cent of the aggregate total number of marks will be declared to have passed in the first class.

22. Candidates of the first, second and third year classes who fail to secure a pass at the examination held in April will be re-examined in the month of July of the same year in the subject or subjects in which they have failed. If they then secure a pass in the subject or subjects concerned, they will be considered to have passed the annual school examination and be declared eligible for promotion to the next higher class. If however they again fail in any subject or subjects, they will be referred to a further study of one year in the class in which they failed. Candidates of the final year class who fail at the Board examination will be referred to a further study of six months and be re-examined at the end of that period in the subject or subjects in which they failed.

23. Every student who completes the prescribed course of study in the school successfully and passed the prescribed examinations will be entitled to style

himself a Licentiate in Indian Medicine and to affix the title L.I.M. to his name.

PROSPECTS OF SUCCESSFUL CANDIDATES.

24. Passed L.I.M.'s are eligible for appointment in rural dispensaries subsidized by Government. They are also eligible for appointment in dispensaries under Taluk Board and Municipalities.

25. A hostel will be opened this year from 1st July 1929 to accommodate 100 students; for particulars regarding admission, etc., applications may be made to the Warden c/o Principal, Government School of Indian Medicine, Kilpauk, Madras.

FORM OF APPLICATION FOR ADMISSION TO THE GOVERNMENT SCHOOL OF INDIAN MEDICINE, MADRAS.

Signature of Applicant.

G. SRINIVASAMURTI,
Principal.

Government School of Indian Medicine, Madras,
16th May 1929.

GOVERNMENT COLLEGE, COIMBATORE, 1929-30.

Applications for admission into the Junior Intermediate class of the Government College, Coimbatore, should be sent in as soon as possible after the publication of the results of the Secondary School-Leaving Certificate public examination. No applications sent before these results are announced will be registered.

NOTE.—Requisition for application forms should be made to the Principal together with a half-anna postal label to cover postage.

2. The College is affiliated in Groups A and B of the Intermediate examination of the Madras University under the remodelled scheme as detailed below:—

Group A.

(1) Mathematics, Physics and Chemistry.
(2) Mathematics, Physics and Logic.
(3) Physics, Chemistry and Natural Science.
(4) Chemistry, Natural Science and Indian History.

Group B.

(1) Modern History, Indian History and Logic.
(2) Modern History, Indian History and Sanskrit.
(3) Modern History, Indian History and Tamil.

3. With his application for admission, a student should submit a certified copy of the marks obtained by him at the Secondary School-Leaving Certificate public examination with the serial number of his Secondary School Leaving Certificate book and a statement furnishing the following information:—

(1) Name in full

(2) Date of birth according to the Christian era.

(3) Caste.

(4) District to which he belongs.

(5) School in which he last studied.

(6) (a) The year in which he was declared eligible for a University course of study;

(b) whether he appeared for the first time; and

(c) if not, the number of times that he appeared for the examination.

(7) Group and the particular combination chosen.

(8) Vernacular or the classical language chosen under Part II.

(9) The address which will find the applicant when selected.

(10) Whether he plays games, and if so, what games.

4. Students desiring an acknowledgment of their applications should enclose with them an addressed post-card.

5. Each student selected for admission will receive a post-card to that effect which he should present himself in person to the Principal on the reopening day of the College after the summer vacation or any other date fixed.

A vaccination certificate as specified below should also be produced by selected students on admission:—

(1) either a certificate of vaccination after the completion of the tenth year, or

(2) in case there are marks of smallpox, a certificate signed by two respectable house holders that, to their personal knowledge, the individual was attacked with smallpox after he completed his tenth year.

When neither of these is found possible to be produced, the student should vaccinate himself afresh and produce a certificate to that effect.

Selected students who do not present themselves on the prescribed date without good reason previously explained will be liable to lose the seats promised.

6. The College reopens after the summer vacation on the 17th June 1929.

K. SRINIVASA PATRACHARYA,
Principal.

Government College, Coimbatore,
22nd May 1929.

MADRAS MEDICAL COLLEGE.

The oral and practical examination in the above subjects will be conducted on each of the above dates, the candidates being divided into three groups for the purpose. The time-table for the rest of the subjects will be as already notified.

W. C. GRAY, Lieut.-Col., I.M.S.,
Acting Principal.

Madras Medical College,
21st May 1929.

RULES OF ADMISSION TO THE GOVERNMENT VICTORIA COLLEGE, PALGHAT.

SESSION 1929-30.

JUNIOR B.A. CLASS

Students seeking admission into the Government Victoria College should apply to the Principal in the form given below :—

(1) Name of the applicant.
(2) House or village name.
(3) Name of parent or guardian.
(4) Occupation of parent or guardian.
(5) Residence of parent or guardian.
(6) Date of birth according to Christian Era.
(7) Religion, caste and sub caste.
(8) Whether vaccinated or had smallpox.
(9) College last attended with year.
(10) Register number of the Intermediate Examination with the year or years of passing.
(11) The language selected under Part II (Sanskrit, Tamil or Malayalam).
(12) The group in which admission is sought under Part III.
(13) The address which will find the applicant when the selection is made.

Place ———

Date ———

Signature of applicant.

2. Each applicant selected for admission will receive intimation from the Principal to that effect.

3. Applicants selected for admission should pay their term fee and submit their transfer certificates on the date on which the class will be started, i.e., 3rd July 1929. The seats will not ordinarily be reserved after the re-opening day.

4. The standard rates of fees of the B.A. Class are Rs. 36 if paid in advance and Rs. 38 if paid in two instalments for each of the three terms of the year. An admission fee of Re 1 per head and a reading room and games fee payable in advance as below will be charged in addition :—

	First term.	Second term.	Third term.
	Rs. A. P.	Rs. A. P.	Rs. A. P.
Reading room fee ..	0 12 0	0 12 0	0 8 0
Games fee	4 8 0	payable in advance.	

Provision is made for imparting instruction in the following groups :—

(i-A) Mathematics.
(ii) Mental and Moral Science.
(iv) History and Economics.
(v) Sanskrit or Malayalam.

JUNIOR INTERMEDIATE CLASS.

Applications in the form given below should reach the Principal as soon as possible after the list of Secondary School-Leaving Certificate holders eligible for admission to the University courses is published, or, in the case of Matriculates, after the results of the Matriculation Examination are published :—

Form of Application.

(1) Name of the applicant.
(2) House or village name.
(3) Name of parent or guardian.
(4) Residence of parent or guardian.
(5) Occupation of parent or guardian.
(6) Date of birth.
(7) Religion, caste and sub caste.
(8) Whether vaccinated or had smallpox.
(9) School or College and class last attended with year.
(10) Subject in Group C of the S.S.L.C. studied at school.
(11) University or S.S.L.C. Examination centre with the register number.
(12) Group in which admission is sought under Part III.
(13) Language proposed to be taken under Part II.
(14) Address which will find the applicant when the selection is made.

Place ———

Date ———

Signature of applicant.

2. Application of Matriculates will be considered only after the marks of the Matriculation Examination have been received from the University.

3. The courses offered under Part III are (i) Mathematics, Physics and Chemistry, (ii) Natural Science, Physics and Chemistry, and (iii) Indian History, Modern History and Logic. There will be provision for Malayalam, Tamil and Sanskrit under Part II of the course.

4. Applicants will be admitted into those groups for which their marks in the Matriculation Examination or their attainments as certified by their Secondary School-Leaving Certificates show them to be qualified.

5. Applications from holders of Secondary School-Leaving Certificates will not be considered unless they are accompanied by their Secondary School-Leaving Certificates (Copies will not do.)

6. Each applicant selected for admission will receive intimation from the Principal to that effect. The Secondary School Leaving Certificates of rejected applicants will be returned to them with as little delay as possible by book-post unpaid.

7. The fees of the Intermediate class are Rs. 28 for each of three terms if paid in advance, or Rs. 30 if paid in two instalments. An admission fee of Re 1 per head, a reading room fee of annas 12 for each of the first two terms and annas 8 for the third term and a games fee of Rs. 4-8-0 per year payable in advance will also be charged. Students of groups (i) and (ii) under Part III will be required to pay also a laboratory fee of Rs. 2 per term.

The Principal may require residence in the Hostel as the part of students who are not living with their parents or guardians or in approved lodgings.

The College hostel provides furnished accommodation for 100 students. The charge per head, rent, establishment charge, club fee and boarding fee included will come to about Rs. 15. Each boarder will be required to pay an admission fee of Re. 1 and to deposit an advance of Rs. 25 which will be adjusted towards the accounts at the time of leaving the hostel.

H. C. PAPWORTH,
Principal.

Government Victoria College, Palghat,
11th May 1929.

ADDITIONAL HOSTEL FOR THE QUEEN MARY SECONDARY AND TRAINING SCHOOL FOR WOMEN, VIZAGAPATAM.

Government have sanctioned the opening of an additional Hostel for the Queen Mary Secondary and Training School for Women, Vizagapatam, with effect from 1st July 1929. This is chiefly intended for the Boarding and Lodging of Indian Christian girls whose parents live abroad and are not permanent residents of Vizagapatam town. The following charges are incurred by Government :—

(i) House-rent, (ii) wages of the cook and other menials.

A matron will supervise the Hostel and she will be a member on the staff of the school.

It is therefore requested that those who wish to educate their daughters in the High School may send them to the High School.

Applications for admission may be sent in before 25th June 1929 stating full particulars of the parent or guardian, etc.

Deserving pupils will also be given Government scholarships in their respective classes.

D. B. JESUDASAN,
Senior Assistant in charge.

Queen Mary Secondary and Training School for Women,
Vizagapatam, 22nd May 1929.

SCHOLARSHIP.

Applications are invited for a Government scholarship to be awarded for study in the Associateship course in Mining or Geology at the Indian School of Mines, Dhanbad. The scholarship is tenable for four years and is of the value of Rs. 60 per mensem. Candidates should have passed in the first class or with distinction the Intermediate Examination in Science of a recognized University. Full particulars of the rules governing the award of the scholarship can be obtained on requisition from the Director of Industries, Post Box No. 432, Chepauk, Madras, to whom applications with copies of testimonials, etc., should be submitted on or before the 10th June 1929.

M. BAZL-UL-LAH,
Director of Industries.

Madras, 21st May 1929.

EX-PUPILS OF THE GOVERNMENT TRAINING SCHOOL, BERHAMPUR.

The following ex-pupils of the school are either unemployed or their whereabouts are unknown. Inspecting officers, managers and heads of institutions are requested to report to the undersigned at an early date if any one of them is serving in an institution under their control.

Berhampur, 15th May 1929.

NOTIFICATIONS.

The T S.L.C. Certificate No. 406,22 of P. Thiruvengadathu Ayyangar, Headmaster, Kanavadi School, Kumbakonam, has been cancelled in Proceedings Dis. No. 1756/29, dated 25th April 1929, of the Director of Public Instruction, Madras, as he has been convicted by a court of law. He is consequently unfit to be a teacher in any recognized school.

P. S. SASTRI,
District Educational Officer.

Tanjore, 15th May 1929.

Y. Subrahmaniam, pupil, Form VI (Supplementary pupil), R.P.B.S. (Board) High School, Kalahasti, has been debarred by the Director of Public Instruction, Madras, in Proceedings Dis. No. 1980/29, dated 8th May 1929, from admission into any secondary school in the Presidency for grave misconduct, but the pupil has been permitted to appear privately for the S.S.L.C. Examination subsequent to 1930.

M. V. Subrahmanyam, pupil, Form VI of the same school, has also been debarred by the Director in the above Proceedings for grave misconduct, from joining any school in the Presidency for a period of one year, i.e., till June 1930.

C. RANSFORD,
District Educational Officer.

Chittoor, 17th May 1929.

In the notification published on pages 151 to 156 of Part I B of the *Fort St. George Gazette*, dated 19th March 1929, the following corrections are made, as intimated by the headmasters of the institutions concerned :—

G. DAMODARAM MUDALIYAR,
District Educational Officer, East Godavari.

Cocanada, 11th May 1929.

It is hereby notified for general information that the Kistna district has been separated from the jurisdiction of this circle and attached to the second circle, with headquarters at Nellore, with effect from 1st April 1929.

2. All communications relating to girls' schools in the Ganjam, Vizagapatam, East Godavari, and West Godavari districts should as hitherto be addressed to this office, while those relating to Kistna district should in future be addressed to the Inspectress of Girls' Schools, II Circle, *Nellore*.

The designation of this circle has been changed from "Northern Circle" into "First Circle".

Vizagapatam, 15th May 1929.

It is hereby notified that the Government have been pleased to sanction the opening of a Government Middle School for girls, at Ellore, with effect from 1st June 1929 and the school will be opened and admissions made in the classes and lower forms I to III from the commencement of the school year 1929-30.

A. DE ROZARIO,
Inspectress of Girls' Schools, First Circle.

Vizagapatam, 10th May 1929.

Residential scholarships of the value detailed below will be awarded by the Commissioner of Labour during the year 1929-30 to students of the depressed classes (boys as well as girls) studying in the secondary and college classes in all the districts where there are no hostels maintained or subsidized by this department. The scholarships are not open to students who are converts to Christianity.

Name of scholarship.	Monthly value.
	Rs.
Forms III to VI	16
College classes	25

These scholarships are tenable for nine months during the year. They are intended to cover not only the boarding charges of the pupils, but also the other expenditure that will have to be incurred by them, such as the payment of school or college fees, purchase of books, etc.

2. Applications for scholarships should be forwarded by the head or manager of the institution in which the pupil studied in 1928-29 through the head or manager of the institution in which the pupil intends to study in 1929-30.

3. All applications for scholarships should reach the Commissioner before the 1st July 1929.

4. The scholarships will be sanctioned by the Commissioner subject to the conditions specified in this notification. Any scholarship vacated in the course of the period for which it is tenable will be awarded for the remaining period to an eligible applicant.

5. The names of the students to whom scholarships are sanctioned will be notified in Part I-B of the *Fort St. George Gazette*.

6. Heads of institutions may grant leave without diminution or loss of scholarship for a period not exceeding one month to scholarship-holders who are absent in consequence of sickness; but, if the leave exceeds this period, no scholarship is to be granted for the excess period. Casual leave without diminution or loss of scholarship may be granted for good and sufficient reasons for a period not exceeding fifteen days in the year, provided such leave does not immediately precede or succeed gazetted holidays. Under the above conditions, leave for the scholarship-holders in schools may be sanctioned by the head of the institution who shall then report it to the Commissioner of Labour.

7. No person receiving a scholarship under this notification shall be permitted to hold any other scholarship provided wholly or partly by Government without the special sanction of the Commissioner.

8. All scholarships tenable under the above rules are liable to forfeiture for misconduct, irregularity or failure to make due progress or to secure annual promotion.

9. The scholarships are payable monthly and in advance. They should be drawn in nine instalments beginning from 1st July 1929 and ending with 31st March 1930.

10. The scholarship sanctioned may, on the scholarship holder's promotion to the next higher class, be renewed, provided the scholarship-holder's progress and conduct have been satisfactory.

11. A register of scholarships and an acquittance roll, copies of which will be supplied from this office, shall be maintained by the heads of institutions concerned and shall be produced at the time of the departmental inspection of the institution and when required by the officers of the Labour Department.

12. The scholarships in this notification are open only to students of parents whose pecuniary circumstances are certified by the head of their school to be such as to prevent them from prosecuting their studies without assistance.

J. GRAY,
Commissioner of Labour.

Madras, 11th May 1929.

VACANCIES.

APPLICATIONS are invited from candidates who are fully qualified for employment as a clerk under the Public Service Notification and who have passed the higher grade test in typewriting for the post of Second clerk of this College in the time-scale of 35—35—1—50—1—60.

Candidates whose register numbers and names do not appear in the list of candidates who have passed the examination in full or in the list of candidates who have still to appear only in the one subject or the two subjects, *have failed completely in the examination* and have to appear in *all* the subjects when they come up again. Enquiries from candidates as to the cause of their failure will not be attended to.

Office of the Commr. for Govt. Examinations,
Madras, 18th May 1929.

GOVERNMENT TECHNICAL EXAMINATIONS, APRIL 1929.

TYPEWRITING (HIGHER GRADE).

The following candidates, having satisfied the Examiners in the Written test, have still to undergo the ORAL AND PRACTICAL EXAMINATIONS. Particulars as to the day, time and place at which the examinations will be held, will be notified in Part I-B of the *Fort St. George Gazette*. No intimation will be sent to the candidates from this office. All other candidates whose names are not mentioned below, whatever they may have been examined, will understand that, having failed in the Written test, they will not be required to appear for the Oral and Practical examinations.

NOTE.—Candidates will, if necessary, be examined in batches. Every four candidates must have one machine among them.

[N B.—*Applications from unsuccessful candidates asking for information as to the cause of failure or for a revaluation of their answer papers will not be attended to.*]

Season Report for April 1929.

Abstract of Season Report for week ending 26th May 1929.

APPOINTMENTS, LEAVE, ETC.

Judicial.

No 23. Leave.—In modification of High Court's Notification No. 24, dated 2nd May 1929, published at page 769 of Part II of the *Fort St. George Gazette*, dated 7th May 1929, the High Court hereby directs that the leave granted on average pay to M.R.Ry. Madhabusi Krishnama Acharya Avargal, District Munsif, from the 23rd April to the 26th May, will be converted into leave on half average pay.

High Court, Madras,
16th May 1929.

No. 27. Transfers.—The following transfers of District Munsifs have been ordered by the High Court:—

(1) M.R.Ry. Chennazhi Krishna Moosad Avargal, from Manamadura to Alattur. (To join on the reopening day.)

(2) M.R.Ry. Swaminatha Ranganwami Ayyar Avargal, from Dharapuram to Manamadura. (To join on the reopening day.)

Note.—(1) This cancels the transfer to Alattur ordered in Item No. (2) of the High Court's Notification No. 13, dated 16th April 1929.

(2) The transfer of No (2) will carry claim for transit pay and allowances under Fundamental Rule 102.

V. VENKATARAMANA AYYAR,
Second Assistant Registrar, Original Side (in charge),

High Court, Madras,
21st May 1929.

Madras, 22nd May 1929.

N. R. UGHAYA, Captain,
Acting Director of Public Health.

JUDICIAL NOTIFICATIONS.

NOTIFICATIONS.

Under the provisions of sections 122 of the Code of Civil Procedure, 1908, the following amendments to the first schedule to the Code of Civil Procedure, 1908, is published for the information of all persons interested, and it is hereby notified that the said amendments as well as any objections or suggestions relating thereto which may be received from any person interested in the matter, will be taken into consideration by the High Court on or after the 15th July 1929, namely :—

(1) In sub-rule (2) of rule 11, of Order XXI, between clauses (*f*) and (*g*) *insert* the following new clause :—(*ff*) "*whether the original decree-holder has transferred any part of his interest in the decree and, if so, the date of the transfer and the name and address of the parties to the transfer.*"

(2) In rule 22 of Order XXI, between sub-rules (1) and (2) *insert* the following :—(1-A) "*where from the particulars mentioned in the application in compliance with rule* 11 (2) (*ff*) *supra or otherwise the Court has information that the original decree-holder has transferred any part of his interests in the decree, the Court shall cause notice of the application to all parties to such transfer other than the petitioner where he is a party to the transfer.*"

(3) In sub-rule (1) of rule 22, after clause (*b*) *insert* the following :—"*or (c) where the party to the decree has been declared insolvent, against the Assignee or Receiver in insolvency.*"

High Court, Madras,
10th May 1929.

With the sanction of His Excellency the Governor of Madras in Council granted by order in Council, dated the 11th day of May 1929, numbered Mis. 2081, Law (General), and by virtue of the powers conferred by the enactments set out in Appendix I to the Insolvency Rules of the Madras High Court, 1910, and of all other powers hereunto enabling, it is hereby ordered that the following amendment be made in the Insolvency Rules of 1910.

It shall come into force with effect from the date of its publication in the *Fort St George Gazette*.

Order III *substitute* the words "and upon all creditors of the insolvent who have not been served with notice of the petition for adjudication" *for* the words "and upon such other creditors as the Court may direct" occurring in rule 84.

S. V. PADMANABHA AYYANGAR,
District Munsif.

Vellore, 16th May 1929.

IN THE MATTER OF THE INDIAN COMPANIES ACT, 1913, AND THE PAVARTY TRADING COMPANY, LIMITED.

Whereas communications addressed to the Pavarty Trading Company Limited, at its registered office remained unanswered;

And whereas it appeared accordingly that the company was not carrying on business or in operation;

And whereas a notice, dated the 6th February 1929, was published on page 389 of the *Fort St. George Gazette*, Part II, dated the 19th February 1929, to the effect that unless cause were shown to the contrary before the expiration of three months from the date of that notice, the name of the said company would be struck off the register and the said company would be dissolved;

And whereas the said company has not shown such cause within the time allowed which expired on the 18th May 1929;

Therefore the name of the said company has under section 247 (5) of the Act been struck off the register.

A. V. KARUNAKARA MENON,
Addl. Assistant Registrar of Joint Stock Companies.

Pulghat, 22nd May 1929.

FINANCIAL NOTIFICATION.

NOTIFICATION.

T. S. PILLAI,
Currency Officer.

Currency Office,
Madras, 4th May 1929.

REVENUE NOTIFICATIONS.

NOTIFICATIONS.

No. 8.—The following amendment will be made in Commissioner's Notification No. 8, dated 14th October 1922, published on pages 1975—1977 of Part II of the *Fort St. George Gazette*, dated 31st October 1922:—

Add the following proviso to the preamble of the notification:—

Provided that in the case of the villages of the South Arcot and Tanjore districts mentioned below, the transport of liquor other than perfumed spirits in quantities not exceeding half a pint shall be covered by special permits issued by the Land Customs officers at the Pondicherry and Karikal frontiers.

W. A. BRITO,
Secretary to the Commissioner of Excise.

Madras, 16th May 1929.

In exercise of the powers conferred by section 55 of the Sea Customs Act and in supersession of all previous orders on the subject, the Collector of Customs, Madras, as the Chief Customs Officer, prescribes the following rules for regulating the levying of fees for the amendment of manifests:—

(1) Supplementary manifests and additional entries in an import General Manifest may be admitted under orders of the Assistant Collector, Imports, on an application in writing by the Agents. No fee will be charged for the admission of supplementary manifests and supplementary entries (a) when such manifests or entries are filed within 24 hours of the ship's arrival or (b) when the number of supplementary items does not exceed 10 per cent of the number of items entered in the manifest and the store list. Where the above limit is exceeded, a fee of one rupee will be levied for each supplementary item except in special cases in which the circumstances are such as, in the Assistant Collector's opinion, to justify the levy of one consolidated fee.

(2) Amendments of obvious errors in manifests either original or supplemental, such as mistakes in marks and numbers of packages will be allowed free up to 10 per cent of the manifested entries, a fee of one rupee for each such amendment in excess of this percentage will be charged.

C. R. WATKINS,
Officiating Collector of Customs.

Custom House, Madras,
23rd May 1929.

W. J. DAVIS,
Executive Engineer, Coimbatore Division.
Coimbatore, 14th May 1929.

SALE OF RIGHT TO CUT, COLLECT AND REMOVE THE STANDING GROWTH IN COUPES I TO III OF SOUTH CUDDAPAH FOREST DISTRICT.

THE right to cut, collect and remove the standing growth except standards in Gunakuppa Improvement Coupes I to III of South Cuddapah Forest district as noted in Schedule from the date of agreement for one year will be sold in public auction on the date and place and by the officer noted against them subject to the conditions set forth below.

2. Intending bidders are warned to inspect the coupes beforehand. The sale will commence at 1 p.m. on the date advertised.

3. No person will be allowed to bid at the auction unless he has previously deposited Rs. 50 as earnest money with the officer conducting the sale. Intending bidders must produce a solvency cert ficate signed by the Tahsildar or the Deputy Tahsildar of the place within whose jurisdiction he possesses immovable property. The District Forest Officer may, however, exempt any well known or long standing contractors from the production of the above certificate. Successful bidders who fail to produce the solvency certificate, will have to pay the full bid amount at the close of the sale on the spot or within seven days after the date of sale if the officer conducting the sale so permits, failing which, they forfeit their initial deposit of Rs. 50. No person will be allowed to bid for another unless he holds a power of attorney duly executed in his favour authorizing him to bid on behalf of such other person. The deposits of unsuccessful bidders will be returned at the close of the sale while those of the successful bidders will be retained.

4. The sales are subject to confirmation by the District Forest Officer who reserves to himself the right to reject any bid, including the highest, without assigning any reason for doing so. Sales exceeding Rs 3,000 are subject to confirmation by the Conservator.

5. The bid shall be for the whole of a coupe at so much per acre.

6. In the case of sales exceeding Rs. 100 the highest bidder should, immediately after the sale deposit half the sale amount less the earnest money deposited by him subject to a maximum of Rs. 3,000 after the sale is confirmed, the above amount will be credited towards the first instalment of the bid. The balance of half the sale amount if any should be paid within seven days of receipt of confirmation order and before the execution of agreement.

In the case of sales not exceeding Rs. 100 the whole amount should be paid immediately after the close of the sale.

The District Forest Officer reserves the right to extend the period for paying the balance of the half the bid amount less the earnest money deposit amount to seven days in special cases.

7. Within fourteen days from the date of receipt of the order confirming the sale, the successful bidder should, in addition deposit in the Postal Savings Bank 25 per cent of the sale amount subject to a minimum of Rs. 25 and maximum of Rs. 300 as security for the due fulfilment of the conditions of the contract by him and also execute an agreement in the prescribed form with the District Forest Officer. The conditions of the agreement can be seen either of the District Forest Office or at any of the Range offices in the division.

8. If the successful bidder fails to furnish the deposit referred to in paragraph 6 or to furnish the security deposit or to execute the agreement referred to in paragraph 7 supra, the lease may be resold at the risk and loss of the highest bidder who will not only forfeit any deposits already furnished by him but will also be liable for the loss, if any, accruing by the resales. He will, however, not be entitled to any profit that may result by the resale. Any removal of the produce by the contractor or his heirs before the execution of the agreement will be treated as an offence under the Forest Act.

9. Interest at 12½ per cent will be collected on all overdue payments.

10. If the instalments are not paid on the due dates, the enjoyment of the lease will be suspended until such time as the amount is paid with penal interest and in addition, the District Forest Officer may either cancel the contract, forfeit the security deposit and resell the coupe at the risk of the contractor who will not be entitled to any profit arising by the resale. Any amount due from the contractor is also recoverable as arrears of land revenue under section 66 of the Madras Forest Act V of 1882.

11. The sale list shall immediately after the sale, be signed by the bidder in whose name the sale is knocked down and a certificate must be appended thereto by him to the effect that he had read and understood the terms of the sale notice and that he agrees to abide by them.

12. The contractor will have no right for any bamboos that are or may be found in the foul or improvement coupes.

13. The areas noted in the schedule are only approximate; the correct areas will be notified at the time of sale.

14. Any further information can be had either from the District Forest Officer or from any of the Range officers of the division.

15. The District Forest Officer reserves the right to issue permits for removal of timber and bamboos

by the free grantees from the coupes under working and the purchasers shall not be entitled to any compensation for such removals.

16. The lessees of timber, fuel, bamboos, etc., coupes are bound to sell the produce of coupes after they are cut and collected at edge of coupes, to bona fide ryots for domestic and agricultural implements at rates noted in the statement published in the Forest Sheet of the District Gazette for January 1929.

The Standard Barometer and Thermometers are read at 8 a.m., 10 a.m., 4 p.m. and 8 p.m. and the daily means are obtained by the application of hourly corrections, deduced from twenty years' observations. The cistern of the Barometer is twenty-two feet above the level of the sea, and the receiver of the rain-gauge is two feet from the ground. The wind, rain and general weather registered are for the current civil day—from midnight to midnight.

The total quantity of rain collected since 1st January 1929 is 9·59 inches, the average due for the same period being 4·14 inches.

A. A. NARAYANA AYYAR,

Assistant Meteorologist.

THE FORT ST. GEORGE GAZETTE

No. 22] MADRAS, TUESDAY EVENING, MAY 28, 1929. [PRICE, 6 *pies*

ABSTRACT OF SEASON REPORT FOR THE WEEK ENDING 25th MAY 1929.

GENERAL SUMMARY.

Reports from Kurnool and South Kanara not received. Light showers generally in the Presidency. Sowing of paddy proceeding in parts of the central districts. Standing crops generally fair to good. Harvest of paddy in parts of the Circars and the central districts proceeding; outturn poor to normal. Condition of cattle generally fair to good. Fodder generally sufficient. Water-supply generally sufficient except in parts of Ganjam, Vizagapatam, Bellary, Anantapur and Ramnad. Prices generally stationary.

B. G. HOLDSWORTH,
Secretary.

BOARD (LAND REVENUE AND SETTLEMENT),
MADRAS, *28th May 1929.*

DISTRICT REPORTS.

GANJAM.

Water-supply insufficient for agricultural purposes in parts. 43·26 feet of water in the Russelkonda reservoir (F.T.L. 45·5) and 26·10 feet of water in the Serada reservoir (F.T.L. 28). Standing crops fair. Harvest of ragi and castor proceeding in parts; outturn of ragi fair; castor poor. Pasture generally available. Fodder generally sufficient. Condition of cattle good.

VIZAGAPATAM.

Water-supply insufficient for agricultural operations in a few taluks. Pasture available. Fodder sufficient. Condition of cattle generally good.

EAST GODAVARI.

Water-supply sufficient. The Godavari 0·87 feet above the crest of the anicut. Standing crops fair. Harvest of second crop paddy proceeding in the plains; outturn fair to normal. Pasture generally available. Fodder sufficient. Condition of cattle generally good.

WEST GODAVARI.

Water-supply sufficient for drinking. Harvest of second crop paddy concluding; outturn poor to normal. Pasture scarce. Fodder sufficient. Condition of cattle generally good.

KISTNA.

Water-supply generally sufficient. The Kistna 0·70 foot above the crest of the anicut. Harvest of second crop paddy and indigo proceeding, outturn fair. Pasture available except in parts. Fodder sufficient. Condition of cattle generally good.

GUNTUR.

Water-supply sufficient for drinking. Standing crops fair. Harvest of paddy concluding; outturn fair. Pasture generally scarce. Fodder sufficient. Condition of cattle good.

KURNOOL.

[Report not received.]

BELLARY.

Water-supply for irrigation sufficient in wells and river channels and generally insufficient in spring channels and tanks. Drinking water generally sufficient except in parts of three taluks. Cutting of sugarcane proceeding in one taluk; outturn normal. Pasture generally scarce. Fodder sufficient. Condition of cattle good, but rinderpest prevails in parts.

ANANTAPUR.

Water-supply insufficient for irrigation except in limited areas under wells and some tanks. Pasture scarce. Fodder sufficient. Condition of cattle generally good.

CUDDAPAH.

Water-supply generally sufficient. Pasture scarce. Fodder sufficient. Condition of cattle generally good.

NELLORE.

Water-supply generally sufficient in wells 9·0 feet of water in the Kanigiri reservoir (F.T.L. 21·45) and nil in Mopad reservoir (F.T.L. 27·4). Pasture generally available. Fodder sufficient. Condition of cattle generally good.

CHINGLEPUT.

Water-supply generally sufficient. Pasture available. Fodder sufficient. Condition of cattle generally fair.

SOUTH ARCOT.

Water-supply generally sufficient. Harvest of paddy proceeding in one taluk; outturn not reported. Pasture available. Fodder sufficient. Condition of cattle generally good.

CHITTOOR.

Water-supply generally sufficient in wells and below normal in tanks. Standing crops good. Harvest of paddy, ragi and groundnut and cutting of sugarcane proceeding in parts; outturn not reported. Pasture generally available. Fodder generally sufficient. Condition of cattle not encouraging.

NORTH ARCOT.

Water-supply generally sufficient. Standing paddy crop generally fair. Pasture available. Fodder generally sufficient. Condition of cattle generally fair.

SALEM.

Water-supply for irrigation sufficient in parts of Tiruchengode, Omalur, Krishnagiri, Uttangarai, Dharmapuri, Attur and Hosur and under the Cauvery channels in the Namakkal taluk and generally insufficient elsewhere. Drinking water generally sufficient except in parts of two taluks. Sowing and transplantation of paddy commencing and sowing of gingelly, cholam and cumbu proceeding. Sowings normal. Standing crops fair. Pasture generally available. Fodder sufficient. Condition of cattle generally good.

COIMBATORE.

Water-supply sufficient in tanks and channels. Supply in garden wells generally sufficient. 7·60 feet of water in the Cauvery at Erode. Transplantation of paddy and ragi and sowing of cholam and cumbu proceeding; extent restricted. Standing crops generally fair to good. Harvest of paddy and cholam proceeding and picking of cotton concluding: outturn of cotton poor to normal; rest fair to normal. Pasture generally available. Fodder sufficient. Condition of cattle fair but rinderpest and foot-and-mouth disease prevail in Kollegal.

TRICHINOPOLY.

Water-supply in wells and rain-fed tanks insufficient in parts. Supply in river channels and river-fed tanks moderate. Pasture available. Fodder sufficient. Condition of cattle fair.

TANJORE.

Water-supply sufficient. Height of water at the Grand Anicut 3·3 feet below crest. Discharge in the Coleroon over Lower Anicut northern and southern branches nil and 0·3 foot respectively. Pasture generally available. Fodder generally sufficient. Rinderpest prevails in parts.

MADURA.

Water-supply generally sufficient for drinking. Sowing of cholam proceeding. Standing crops fair. Pasture available. Fodder sufficient. Condition of cattle generally good.

RAMNAD.

Water-supply sufficient for drinking but insufficient for irrigation except in parts. Standing cotton crop fair. Picking of cotton proceeding; outturn fair. Pasture generally available. Fodder sufficient. Condition of cattle fair.

TINNEVELLY.
